THE ROCKFORD

is a watch that can truly be called a "TIME-KEEPER."

ONE of the principal Jewelers of Albany, N. Y., says:—"We have noted by our observatory time the rate of a number of Rockford Watches sold by us, and their variations. Watch of Fred Racey, conductor, Hudson River R. R., 10 seconds in three months; watch of Franklin Lusk, engineer Boston & Albany R. R., 1 1/2 minutes a year; watch of Jacob Link, postmaster, six seconds a month; watch of Albert Morey, engineer, B. & A. R. R., five seconds a month; watch of Charles Cornelius, conductor, B. & A. R. R., eight seconds a month; watch of Captain Feehan, pilot of B. & A. steamer, four seconds a month."

We find, after properly regulating to our customers' time, that the

Rockford Quick Train Watch is all that it is represented to be.

FOR SALE.

BRIGHTON TANNERY, with its Steam Engine, Boiler, Splitting Machine, Stuffing Machine and other Plant is offered for sale at private contract.

The above Tannery was formerly operated by the late Donald McKinnon, of the late firm of McKinnon & Co., of this city. It is fitted up on the most modern principle, and has hitherto paid a large percentage on the capital invested. To capitalists no better investment for their money, either by Bank or Manufacture, can be offered.
Possession given immediately.
MARY J. MACKINNON, Executrix.

Ch'town, Oct. 17, 1885.

The Clyde River Races.

The races which took place at Clyde River on Saturday, the 27th, were a decided success. Quite a number of turfmen were present with their "fyers," and the day being fine, all looked forward for an afternoon's sport. Shortly after two o'clock the free-for-all was called, in which four horses faced the starter, viz.: Gay Boy, owned by Ewen Henderson; Maud Morgan, owned by Neil McLean; Mollie Morton, owned by Angus McPhail; Clingstone, owned by Mr. Darrat.

First Heat.—The horses were started off on the second score, with Gay Boy about a length behind, but before the quarter pole was reached, Gay Boy had passed Mollie Morton and Clingstone, and made several attempts to collar the leader, but the driver of Maud M. having her well in hand, succeeded in keeping in front until the finish, with Gay Boy second, Clingstone third, Mollie fourth.

Second Heat.—The horses all started about even but when near the quarter Gay Boy took a slight lead and maintained it until the finish with Maud M. second, Clingstone and Mollie in the order named.

Third Heat.—In this heat at the word "go" Maud M. went off her feet and fell in the rear. Gay Boy who had one heat to his credit started in to win and did win handily in 2.51 1/2, with Clingstone second, Mollie third and Maud M. fourth.

Summary.

R. G. Gay Boy..... 2 1 1
B. M. Maud M..... 1 2 4
B. G. Clingstone..... 3 3 2
B. M. Mollie Morton..... 4 4 3
Time..... 2.54 2.53, 2.51 1/2

The second race was for four-year-olds in which four horses took part, viz.: Slashing Harry, owned by A. Gillis; Flying Eagle, owned by Mr. Campbell; Navigator, owned by Duncan McLean, and Nellie Grey, owned by M. Dixon. A protest was entered against Flying Eagle on the ground that she was not a square trotter, and, after a great deal of talk, it was decided to let her start.

First Heat. The horses came up in splendid style, and at the word go Flying Eagle shot to the front, and maintained the lead until the end of the first half mile was reached, when Harry, who was doing some pretty trotting, came up and passed her, and came in a winner by half a length, with Flying Eagle second, Nellie Grey third, Navigator last.

Second Heat.—In this heat an accident happened to Flying Eagle by the casting of a shoe, but notwithstanding this she trotted the entire heat without a skip, and came in a winner in 2.48, with Harry second, Nellie third, and Navigator last.

Third Heat.—In this heat there was a considerable amount of scoring, the horses coming up for the tenth time, and then they were obliged to start Navigator running. The position changed rapidly in this heat for the first half mile, when Harry spurred and took the lead and kept it until the three-quarter pole was reached, when it could be seen that the mare Flying Eagle was steadily gaining on Harry, when the cry from the spectators was that Harry was a getter, but the practical eye could see that the driver of Harry was holding, and as he had one heat to his credit, he started in to win and did win in 2.48 1/2, with Flying Eagle second, Navigator third and Nellie Grey last.

Summary.

B. G. Slashing Harry..... 1 2 1
B. M. Flying Eagle..... 2 1 2
G. M. Nellie Grey..... 3 3 4
R. S. Navigator..... 4 4 3
Time..... 2.48 1/2, 2.48, 2.49 1/2

The officers of the races were: Starter—John Charleton.

Judges—John Robertson, V. S.; G. A. Dockendorff, A. Hyde.

Clyde River, Feb. 27, 1886.

The Adulteration of Food.

The Dominion act relating to the adulteration of food and drugs, is exceedingly strict. In a case of adulteration of food if any substance has been mixed with it which impairs its quality or strength, if an inferior or cheaper article is substituted for that purported to be sold, if any valuable constituent of the article has been taken away, or if the article consists in part or wholly of any deceased or decomposed substance, or, in the case of milk or butter, is the product of a deceased animal. The penalty for violation of the act by adulteration of food or drugs is not more than \$50 or less than \$10 for the first offence, if the adulteration is injurious to the health, with much larger penalties for subsequent offences. In case the substance is not injurious to health, the maximum penalty for the first offence is \$30, and for the second \$100. The penalty for the sale of adulterated articles is also heavy. In addition, the goods so adulterated are forfeited to the crown. The sale of watered milk is an offence under this act, as is the sale of skimmed milk unless specially asked for by the purchaser. The act provides for the appointment of a chief analyst for the Dominion and of efficient analysts for various districts. The local inspectors of food, &c., are empowered to call upon the analysts to analyze any samples of food, drugs, or fertilizers, as may inland revenue officers, and certain other specified officers.

All workmen of foreign birth have been discharged from employment in the German government dockyards. This action has been taken because of disclosures in the case of Captain Sarau, recently convicted of having sold plans and information of German fortifications to Major Grizot, of the French general's staff. Capt. Sarau is a Dane, and no man of German birth has yet been arrested for his offence. It is thought that no persons of foreign birth will be permitted to remain in the service of the German war department.

The population of London now exceeds every other city, ancient or modern, in the world. New York and all its adjacent cities combined are not equal to two-thirds of it. Scotland, Switzerland, and the Australian colonies each contain fewer souls, while Norway, Serbia, Greece, and Denmark have scarcely half so many. Yet at the beginning of the present century the population of all London did not reach one million.

Frank Phillips, of Bethel, Sullivan Co., N. S., when going to church on a recent Sunday, saw a bear lying under a stump near the road. He got a rifle and a couple of friends with rifles, and they attacked the bear. She would not run, but fought gamely, and was not killed until thirteen shots had been fired at her. Then it was found that she had been protecting four baby bears, only a few hours old.

The boiler in Stokes Bros.' flouring mill at Wyoming, Ont., exploded last week, killing David Service, the engineer, and badly wrecking the building. A young man named Robert Brown was also very seriously hurt. A number of millwrights who were putting machinery into the mill all escaped without serious injuries. It is believed low water in the boiler was the cause of the explosion.

A Night of Horror.

A few weeks ago an Indian, who lived near Pogamasing, a station on the Canadian Pacific Railway a little over 500 miles west of Montreal, died under circumstances which called for an investigation. The coroner for the district was notified, but other duties prevented him attending at once. In the meantime, as the best mode of preserving the body, it was reared up against the side of the shanty which served to accommodate the railway employes at that point, and the weather being very cold, the corpse was frozen hard and stiff.

About two weeks after the occurrence a prominent official of the Eastern and Ontario divisions of the Canadian Pacific Railway in the course of his official duties had occasion to stop off at Pogamasing on a night when the thermometer was a long way below zero. Noticing the Indian, apparently standing outside the shanty, he insisted on his receiving accommodation inside, not knowing that the man was already dead, and the men, never imagining that he was ignorant of the fact, complied with his request; but not caring to have the dead body near them placed it in the guest's chamber, where the official slept. The extreme cold necessitated an enormous fire being kept up in the shanty, and under the influence of the heat, the body soon thawed out. The official being tired of his labours, had almost at once after reaching his couch fallen into a profound slumber, lasting for a few hours. To his horror on waking about midnight he saw by the flickering light of the shanty fire the body of the defunct Indian gradually collapsing and sinking on the floor of his room. For some time he took no notice of the matter, supposing the Indian had fallen asleep while standing upright. The peculiar odour which permeated his room first called his attention to the state of the Indian's remains, and on his calling to one of the men in the shanty he first learned the truth. The body was at once taken out of the building and again reared up alongside the end of the shanty to await the coming of the coroner, and the inmates retired to their couches to rest. The horror of having been in the same room with the corpse of an Indian for some hours, however, robbed the official of his sleep for the remainder of the night, and when morning broke he left Pogamasing on his way to Fort Arthur. The night's experience was terrible, and one the official will remember to his dying day.

CURRENT NOTES.

The army of Hungary has been supplied with a new repeating rifle, which is said to be superior to anything of the kind, yet manufactured.

The editor of the Ames (Iowa) Monitor, has brought suit for \$2,000, for alleged libel, against the editor of the Intelligencer, of the same place, because the latter intimated that the former had been stealing coal.

The governing authorities of the Wisconsin State Prison permit the publication within the walls of the institution of a paper entitled The Prison Press. This novel sheet, presumably edited by prisoners, advocates the abolition of the jury system, leaving the verdict with the Judge alone.

"Come here, Tommy, and sit with me until your sister comes down. I want to tell you about the railroad accident I've just been through." "Guess you didn't get hurt, did you?" "No, but how did you know that?" "Why, because paw said the other day that your cheek would carry you through anything."

A cutlass that once belonged to Lord Byron has been presented to the museum of the Historical and Ethnological Society of Athens. It bears an inscription stating that it was given to Dr. Petros Stephanitzis, of Santa Maura, at Missolonghi, on March 10, 1824.

Naturalists now count no less than 1,870 different kinds of fishes in North American waters, of which 500 live in the rivers and lakes, and 550 kinds belong to the Pacific. Of the remainder, 105 dwell only in the deep waters of the Atlantic and Gulf of Mexico, never approaching the shores or the surface.

A daily newspaper has been started in Greenland. During the year when the days are three months long the editor doesn't get down to the office until three weeks after breakfast, and stops work two months before sundown. An editor can get up a pretty good paper in eight or nine days if he has a large exchange list and a sharp pair of scissors.
