RUBBERS. SLIPPERS. MORE LIGHT!

THE Charlottetown Gas Light Company

has imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £130,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best union Burners attainable at moderate cost, I have selected them for a series of experiments."

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Wills, F. C. S., F. I. C. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three score of Burners reported upon, which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Taber, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devos's Brilliant Oil and ordinary Oil, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devos's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles.

A good Argand or Johnson's Burner, the burner used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of Scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.65 per 1000 feet as now charged here when consumed, more especially through Bray's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced."

CAPT. JOHN HUGHES, Water Street, July 12—18w tf

LORNE HIGHLAND WHISKY.

AN ANALYTICAL SANITARY INSTITUTION, 54, HOLBORN-VIA-DUCT, E. C. LONDON, ENG. 1879

REPORT on the LORNE HIGHLAND WHISKY: "We have visited the bottling stores of Greenlees Brothers, and have selected from the vats, samples of their Lorne Highland Whisky, and have subjected them to careful examination and analysis. The samples were very fragrant, mellow, and of pleasant flavor, and possessed all the characteristics of pure and well-matured Scotch Whisky of the first quality."
