Canada Atlantic and Plant STEAMSHIP LINE.

FOR BOSTON,

—CALLING AT—
Hawkesbury and Halifax.

S. S. OLIVETTE will leave Navigation Co's Wharf, Charlottetown, FRIDAY, May 17, at 12 noon, and every Friday thereafter until further notice. Will leave Hawkesbury at 6 p. m. same days, and Halifax on Saturdays at 10 p. m., arriving at Boston Mondays at 7 a. m.

FROM BOSTON—Tuesday, May 14, at 12 noon, and every Tuesday thereafter until further notice, calling at Halifax and Hawkesbury, and arriving at Charlottetown on Thursday evening.

For rates of passage, freight, etc., apply to local agents, or the general agents as below.

HALIFAX SERVICE.

S. S. "Halifax" or "Olivette" will leave Plant Wharf, Halifax, every WEDNESDAY, 8 a. m., and SATURDAY, 10 p. m., until further notice, for Boston direct. Returning, will leave north side of Lewis' Wharf, Boston, Tuesdays and Saturdays, 12 noon, until further notice. Passengers arriving in Halifax TUESDAY evenings can go directly on board the steamer without extra charges.

Tri-weekly services by S. S. Olivette and Halifax, between Boston and Halifax, and weekly service by S. S. Florida between Boston and Charlottetown will be resumed in June, as last season.

Through Tickets for sale and baggage checked at all stations on the Intercolonial Railway.

For rates of passage, freight, etc., apply to local agents, or

H. L. CHIPMAN,
Agent for Canada, Plant Wharf, Halifax.
RICHARDSON & BARNARD,
Agents, north side, Lewis' Wharf, Boston.

TAKEN FROM THE DARK VALLEY.

LED OUT TO THE ENJOYMENT OF HEALTH!

Paine's Celery Compound Saves a Well-Known Norfolk County Farmer.

Completely Cured After Four of the Best Doctors Had Failed.

Few men in Norfolk County, Ontario, are better or more favorably known than Mr. Joseph Rolston, of Nixon. This gentleman, some time ago, was in such an extremely alarming condition of health, that relatives and friends were fearful of results. Four skilled physicians did all for the sick man that could be done, but a cure was beyond their best efforts. Providentially Mr. Rolston was induced to give Paine's Celery Compound a trial, with the result that sickness and disease were banished, and a valuable life saved to the community. Mr. Rolston, who writes for the benefit of suffering men and women, has his statements vouchsafed for by two well-known Methodist ministers, Rev. T. R. Clark, of Delhi, and Rev. D. Williams, of Nixon.

Mr. Rolston says:—
"It gives me great pleasure to add my testimony to the ever increasing popularity of your preparation known as Paine's Celery Compound. It is now a year past since I had a severe attack of nervous prostration caused by chronic dyspepsia, and for a year I could not sleep at night. This condition of sleeplessness brought on delirium. I was attended by four of the best doctors of the country, and took a great quantity of medicine, but all failed to do me any good. Having been persuaded to read your book I thought I would try your Paine's Celery Compound; and after I had used four bottles the nervousness and dyspepsia left me, and I have done more work since than for years past. I now enjoy excellent health and consider myself completely cured. I have highly recommended your Paine's Celery Compound to others, and I know of several persons who are now using it."

DINING AT THE ZOO.

A BILL OF FARE THAT IS UNIQUE IN ITS VARIETY.

Among the Animals at the London Zoological Gardens—An Enormous amount of Food Consumed Annually.

I have been initiated into the mysteries of the kitchens of a great West End hotel during the preparation of innumerable toothsome banquets; I have explored the larder of a noble lord, the depths of turtle soup; but I must say that the kitchens and storehouse of London Zoo are more interesting to me. For they have both at the Zoo, and very curious and very interesting were the revelations which Mr. Bartlett made to my mind. It was that of a man past middle age, his face tanned yellow, and his hair grizzled by wind and sun. The man carried a pack on his back, but it seemed scarcely to impede his progress, for he went along at a rapid shuffle and it was with difficulty that I kept pace with him. He had a small tin of food, and then I found that on the top of his pack was a box full of mice, which the sack itself was filled with dozens of frogs.

Thousands of frogs must be consumed in the Zoo during the year. The snakes and the salamanders like nothing better, and really you may suppose that the frog is a very common article of food in the Zoo. The frogs are fresh and tender, and probably much more toothsome than many a dainty which chefs rave of. In the winter months after a frost may be seen in the reservoirs of the Zoo, waiting their time, and consuming in their turn vast quantities of worms. These frogs are sent to the kitchen. All sorts and conditions of vendors find their way to this little office. Boys bring for sale their rabbits pigeons, and guinea-pigs. There are some, too, who bring the butcher, the baker, the fishmonger, and the greengrocer also pay their daily calls; and I must not forget the milkmaid, who comes to the Zoo to sell her living creatures in the gardens, each of whom has a palate of the greatest delicacy. It may be a choice mutton chop, or a parrot, or a turkey, or a pineapple for a chimpanzee. Poor Sally was such a gourmet. Individual families must be gratified in such a valuable collection, and it is a little "color," as they say, he likes nothing better than a rabbit with the fur on. It is as if you or I might fancy an oyster and a glass of Chablis after a night's fishing. Of eggs, 17,000 are consumed in a year. Some of them go to the reptile-house, but most of them are boiled and chopped up fine, as the cookery book says. In this state they form part of the breakfasts and dinners of a multitude of birds and monkeys. Fresh shrimps, which form another item, are sent to certain birds, and the guinea-fow and fowls are extremely fond of them. As for the fowls' heads, they go to such animals as the otter and the pig. The heads, of course, go to the monkeys and squirrels.

In a day an elephant will eat about 224 pounds of food. Knowing this you will have no difficulty in understanding where those huge quantities of dry-stuffs disappear. This mighty meal includes rice, biscuit, hay, clover, and a little mangel or turnip. The hippopotamus takes about the same weight of food, which includes vast quantities of green grass. The rhinoceros also takes a great deal of hay and so on. The polar bear takes flounders and cooked meat with much fat. The seals eat most of the whiting, while the cormorants, flamingoes, pelicans take the trout in the fish. The bears eat meat and biscuits, the army of deer and cattle of all sorts are responsible for a large consumption of hay, straw, and hay. Bread and milk—the pleasant compound we all know—is given to monkeys and to other fortunate animals who possess delicate palates. The lion and tigers are also fond of a drink of milk. The rodents take most of the carrots.

Many favorite horses end their days in the Zoo. An aged carriage horse, a hack who has done his work, an animal that is incurably vicious, a violent animal that has thrown his master or his mistress—these find their way to the Gardens. It is better that they should die an easy death than linger on in the shafts of a hansom under the lash of the streets beater and hungry. The lions and the tigers and leopards, whose allowance varies from ten pounds to six pounds a day, consume, on an average, one horse a day. The price of a cart-horse. Before passing on to the reptile house, I may mention that the owls and hawks like nothing better than dead birds or dead rats, or even a dead cat, fur and all.

You will notice that no mention is made of the frogs, ducks, rabbits, guinea-pigs, rats, and mice, which find their way into the reptile house. Nor, indeed, of the cockroaches, of which there is an ample supply in the Gardens. Nor again of powdered oyster shells, which the ostrich loves. These may be called the "extras," but like most "extras," they mount up to a considerable total in the bill. It is on delicate grounds in dealing with the live food. Years ago there was an absurd outcry by sham humanitarians against the practice of giving live food to the snakes. But as snakes prefer to slaughter their own food or starve, the question resolved itself into one of ZOO, or no ZOO. The ZOO carried the day, but by a blessed compromise the public are no longer allowed to be present at these banquets. Mr. Bartlett, the wisest of practical zoologists, who has passed years of hours in the reptile house, says that the theory that snakes fascinate their food is all nonsense. The guinea-pigs and cocks are happy in the snakes' cages as in their own hunting-grounds. The rattlesnake feels hungry, say; he sees them; he uncovers himself; he notices his heart and the rattlesnake is paralyzed in a few seconds, dying a painless death. The python crushes his ducks with terrible certainty, which is quite agreeable to the ducks having his neck wrung. I'm sure. Some years ago there was a cage full of spiders in the insect-house. One day a live-cockroach was dropped in. The spider surrounded him; the cockroach was surrounded by his savage foes, and made mincemeat

ANTICHOFF PALACE, ST. PETERSBURG, DEC. 6, 1894.

MER MAJESTY, EMPRESS MARIE FEODOROVNA, FINDING GREAT BENEFIT FROM THE USE OF YOUR TONIC-WINE, REQUESTS THAT A CASE OF 50 BOTTLES VIN MARIANI BE SENT IMMEDIATELY, ADDRESSED TO HER MAJESTY THE EMPRESS."

Antichoff Palace, St. Petersburg, Russia.
41 Boulevard Haussmann, Paris, France.

VIN MARIANI

"The Ideal Tonic Wine."
Fortifies, Nourishes and Stimulates the Body and Brain.
It restores Health, Strength, Energy and Vitality.

For Descriptive Book with Portraits and Testimony of Noble Celebrities, write to Sole Agents for Canada

Grateful—Comforting.

EPSS'S COCOA

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal ailment by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled "Epps's Cocoa."

JAMES EPSS & CO., Ltd., Homeopathic Chemist, London England.

P. E. Island Railway

STMR. FASTNET

Will commence the season of 1895 by sailing from Halifax on the 30th April. For freight, etc., apply to
W. W. CLARKE,
Agent.
April 18

Black Diamond Line.

The S.S. COBAN, sailing from Montreal on Friday, 17th inst., will also be here at Charlottetown Tuesday morning, 21st inst., and will leave for St. John's, Newfoundland, via Sydney, carrying horses, cattle and sheep on deck and produce under her deck, at lowest possible rates.

For further particulars as to freight and passage apply to
PEAKE BROS. & CO.,
Agents.

Coal! Coal! Coal!

FROM
Dominion Coal Co's. Mines in C. B.

Now that navigation is open, we beg to inform the public that we are prepared to grant orders for cargoes of **Serened, Run of Mine and Stack Coal** from the above Company's Mines, and will deliver cargoes at any of the outports at very lowest prices.

To our customers, both in town and country, we offer to supply any quantity they may require, at prices which cannot be beaten.

The large quantity of Coal which we have sold during the past and present year is a sufficient guarantee of the Coal being first-class, and our many customers are perfectly satisfied.

Our motto is "Quick Sales," "Small Profits and "Justice to All."

PEAKE BROS. & CO.,
Selling Agents for Dominion Coal Co., Ltd.
Charlottetown, April 30, 1895.—dy & w

REDUCED

EMPIRE TOBACCO CO.

PURE & SURE

Merely a suggestion. Why pay a quarter for three cigars when you can get five "Something Goods" for the same money?—and they are equal to any ten center. We don't want you to take our word for it either, we only ask you to buy a quarter's worth and judge for yourself.

They are on sale everywhere, and are manufactured by the
EMPIRE TOBACCO CO.,
may 3-246 & w Montreal.

FORMATION OF COAL.

In some Places the Complete and Perfect Form of the Decayed Trees Have Been Found.

The formation of coal, according to Dr. Homer Greene's chemical theory, was due to the solar or bringing forth, millions of years ago, when it was larger and hotter than to-day, a wonderfully luxuriant vegetation, including plants of strange kinds, mosses as large as forest trees, and ferns 20 feet in height, growing up richly from the clayey soil and forming dense jungles in the vast marshes, the latter covering great areas of the earth's surface; these ferns, mosses, and the leaves, branches, and trunks of trees, falling and decaying where they grew, only to render the soil more fertile and the next growth more luxuriant—year after year, century after century, this process of decay and decay going on, until the beds of vegetable matter thus deposited became of great thickness, the earth's body, however still continuing to shrink, in consequence of which her crust at times contracted and fell in, the land then sinking through vast areas, the beds of vegetable matter being thus brought to the water sweeping again over the great marshes, sand and mud and gravel were laid down anew over the deposits, and the clayey soil from which the next rich growth would spring was spread out on the surface, this process being repeated again and again, as often, indeed, as seasons of cool air in any coal bed.

In this way, according to Dr. Greene, the conditions for the formation of coal were made complete, atmospheric air being entirely excluded, and the vegetable beds underwent the processes of decomposition, so that in some beds of coal whole trees have been found, with their branches, leaves, and roots, and all converted into the same kind of coal as that by which they were surrounded.

HOW TO WALK.

The Proper Length of a Step Twice the Length of a Foot.

A Delaware teacher, who is peculiar in knowing something of Deslartes's system of expression, says that women can improve their walk without a teacher, though they can't learn about walking from print. The proper length of the step is twice the length of one foot, and it is measured from the hollow of one foot to the hollow of the other. Now take a piece of tape, and sew on it bits of flannel at intervals twice the length of one of your feet, stretch it across the longest room you possess, and then dispose of the flannel as you please. Maybe you don't know that each foot should cross the same line with each successive step? It would—the only very important step, so you must walk your tape and set one foot and then the other, right over one of those bits of flannel. Do this until you are used to it, and then do this and turn your toes out well, and swing your leg from the thigh, and you are far on the road to a beautiful walk.

Current Literature.

The newspaper, people say, and the magazine are coming to monopolize the attention of reading men and women, dissipating their minds, trifling away their care for books and all sustained intellectual effort, bringing on gradually a sort of softening of the general brain, which makes the serious book a feverish and impossible thing. Our busy, overworked generation, they say, is sliding from the book to the magazine and review, from the review to the review of reviews, to the newspaper, to the headlines in the newspaper, where the popular pressure already centres. The evils of the newspaper and of much of our newspaper readings are undeniable and every graduate who has not read much about them, and are we not to praise much more? If we think well of the magazine—our own and some others—let us not be misled by the headlines, say, is sliding from the book to the magazine and review, from the review to the review of reviews, to the newspaper, to the headlines in the newspaper, where the popular pressure already centres.
