## SKIN-BREATHING BABY EXPOSED BY DOCTOR WHO DELIVERED HER

**FAKEPLACE (GEM) -**  
A SKIN-BREATHING baby has been discovered in Fakeplace, Prince County. According to reports from fabricated sources, this amazing little girl was born without a set of lungs.

The existence of the girl was kept secret by the community. However, testimony by Dr. Q. Duckus, who delivered little Mary Ellen Madeup, finally revealed her existence.

Dr. Duckus told *The GERM* that he initially gave Mary Ellen little hope of surviving.

After Mary Ellen was born the nurses caring for her noticed that she had an irregular heartbeat and breathing pattern. A series of complicated tests were performed. Everything seemed fine except for the X-ray.

Said Dr. Duckus, "I immediately rushed little Mary Ellen into the operating room and performed open-chest surgery. The X-ray was right, she had no lungs! I couldn't believe my eyes. The thoracic cavity was completely empty except for a small lump of tissue that appears to be acting as her heart".
