A QUEBEC CONTEST.

Lumbago Driven Out by Dodd's Kidney
 Pills.

QUEBEC, Sept. 2.—Although Quebec is
 called "the Gibraltar of America," and
 well deserves the name, it is by no means
 impregnable against the assaults of Kid-
 ney Disease. Fortunately the inhabitants
 have an ally in Dodd's Kidney Pills that
 succeeds in driving the enemy out every
 time it gains an entry.

Some time ago Mr. John Ball, of No.
 57 Little Champlain St., was attacked by
 Lumbago. He suffered for two years
 without getting relief from any of the
 medicines he used. Then he tried Dodd's
 Kidney Pills and the first box he used
 helped him. He used only three boxes,
 and is now well and strong in every way

MIRACLES OF MEMORY.

The Extraordinary Feats Performed
 by Chess Master Pillsbury.

One of the most extraordinary feats
 of memory ever known was that of
 Henry Nelson Pillsbury, the American
 chess master, when he played 20 simul-
 taneous games without seeing any of
 the boards. One blindfolded game is
 far beyond the power of 99 out of 100
 chess players, but Mr. Pillsbury suc-
 ceeded in the colossal task of remem-
 bering for several hours the constantly
 changing positions of 640 bits of wood.
 Not only did he win 14, draw five
 and lose but one of these 20 games,
 but at the close also remembered the
 details of every play and corrected
 several mistakes which had been made
 in recording them.

Wonderful as this is, it need not
 alarm Mr. Pillsbury's friends with
 fears of a mental breakdown. He has
 merely given the world one of the most
 remarkable examples of what we call
 visualism, a peculiar and rarely cul-
 tivated function of memory.

There is nothing abnormal in a feat
 of this kind, and it need not be regard-
 ed as an enormous strain upon the
 mind. Abnormality only appears when
 one faculty stultifies all the others.
 The probable fact is that Pillsbury
 has discovered a better method of play-
 ing chess than others, which makes a
 hitherto impossible task comparatively
 easy for him. I am certain that he
 could not have played 20 tables by the
 aid of any artificial memory system.

These systems are like crutches—
 they help up to a certain point and
 then are apt to hinder. Visualizing is
 simply a matter of concentration and
 development of a certain pictorial qual-
 ity of memory. Those who are most
 likely to excel are those who devote
 themselves entirely to one mental pur-
 suit. They develop the faculty of be-
 coming oblivious of all that takes place
 around them.

I once knew a minister who mem-
 orized his sermon by this method of
 visualizing. He would reproduce in
 his mind the manuscript just as it had
 been written, so that whenever it was
 blotted he would have difficulty in re-
 membering it. Most of us have this
 power to some slight degree, and it
 may be cultivated. One of the simplest
 methods of strengthening the memory
 in this line is to endeavor to recall
 what we have seen during a walk
 through the streets.

Some people seem to be entirely
 without this power of mental photog-
 raphy, and the following story is some-
 times used in classrooms as a test: The
 story relates that when Napoleon was
 visiting one of the military hospitals in
 Paris he stopped by the bedside of an
 old soldier who had lost both an arm
 and a leg. The old soldier in an ecstasy
 of loyalty sprang from the bed and,
 drawing his sword, cut off with a sin-
 gle blow his one remaining arm.

If Pillsbury were to be told this
 story, he would see its absurdity at
 once, but a person who has no power
 of representing ideas as pictures would
 believe it to be a possible occurrence.

We hear frequently of the marvelous
 achievement of some actor or actress
 who commits to memory several thou-
 sand words in a single season. This is
 not done by visualizing, but by se-
 quence. Change the sequence of the
 speeches and the memory often fails.
 Memory is an exceedingly complex

thing. It is not the highest type of
 mental function, and it is noticeable
 that this power of visualizing decays
 as the power of abstract thought
 grows.—Professor Charles H. Judd in
 New York Exchange.

Ants Alarmed by Sounds.
 Recent observations tending to show
 that ants possess a sense of hearing
 have been described in this column.
 Professor Metcalf of the Woman's col-
 lege, Baltimore, adds some interesting
 testimony on the subject in a letter to
 Science. One of his students discover-
 ed that a colony of black ants was
 thrown into a state of great excitement
 by sounds of one particular pitch. Other
 sounds did not affect them, but when
 the peculiar note was struck, either
 on a violin or with a whistle, the
 ants would become excited and
 if the sounds were continued would
 grow frantic, some of them falling into
 a water moat surrounding their nest.
 Ants of other species paid no atten-
 tion to the sounds.

Siam's Navy.
 The Siamese navy consists of be-
 tween 40 and 50 vessels, the largest of
 which is a well armored and capable
 vessel of 3,000 tons, named the Ma-
 chacha-ri. Nearly all the vessels are
 armed with quick firing, modern guns
 and are manned by native crews who
 are strictly disciplined and have shown
 considerable adaptability as sailors.
 There are three or four English, Dan-
 ish or German officers on each of the
 vessels of the fleet, the only American
 being Dr. Hayes of Baltimore, who is
 a surgeon on the staff of Admiral de
 Richelieu

Diamond Mining in Brazil.
 While the diamond mines at Kimber-
 ley have been producing about \$18,-
 000,000 worth of gems a year the in-
 dustry in Brazil, formerly the most im-
 portant producing country in the
 world, has fallen to a low ebb. It is
 now carried on only by individuals or
 small associations working in a crude
 manner. The yield was never much
 over \$1,000,000 in any year, and the
 product is now worth annually less
 than \$200,000, and yet the quality of
 the Brazil stones averages higher than
 that of the Kimberley output.—New
 York Sun.

Save Your MONEY.

To save your money, by getting more for it,
 ask your dealer in medicine to show you the
 new 50 cent size bottle of JOHNSON'S AN-
 ODYNE LINIMENT. It contains over three
 times as much as the old 25 cent style, which
 is a great saving to those who use this valu-
 able family medicine. The superior quality
 of this old Anodyne has never been equalled.

JOHNSON'S ANODYNE LINIMENT

Fifty years ago this month, Dr. Johnson left
 with me some Johnson's Anodyne Liniment.
 I remember him distinctly, and could tell you
 just how he was dressed on that day. I have
 sold Johnson's Liniment ever since. Can truly
 say it has maintained its high standard from
 that time to this. No medicine today possesses
 the confidence of the public to a greater extent.

A Town in Ashes.

Victoria, B. C., September 2.—The
 steamer Anur, from the north, brings a
 report of a disastrous fire which swept the
 town of Atlin on Sunday last, practically
 wiping it out of existence. Ten of the
 largest and most important business build-
 ings in the town were destroyed, causing a
 loss that is estimated at about \$40,000.

Imitations

of Dodd's Kidney Pills are
 legion. The box is imitated,
 the outside coating and shape of the
 pills are imitated and the name—Dodd's
 Kidney Pills is imitated. Imitations are
 dangerous. The original is safe. Dodd's
 Kidney Pills have a reputation. Imita-
 tions have none or they wouldn't imitate.
 So they trade on the reputation of Dodd's
