Career Counselling Program Set For Ch'town RHS Pupils

George W. Cheverie, manager of Charlottetown office of the National Employment Service, announced yesterday the local office has completed plans for career counselling of grade nine and 10 students of Charlottetown and surrounding districts.

In co-operation with the Parkdale Lions Club and the department of education, the National Employment Service will counsel more than 500 grade nine and 10 students of the Charlottetown Rural Regional High School, which includes Parkdale and Sherwood students in these grades. The counselling sessions will be held Friday morning, Feb. 20 at the Vocational Institute of Malpeque Road.

A special committee of the Parkdale Lions Club, headed by Ian Webster, is working closely with Clifford Orford, Special Services Officer of N.E.S., and Frank Costello, principal of the Charlottetown Rural Regional High School. Premises and other physical arrangements are being provided through the co-operation of Joseph MacLellan, principal of the Vocational Institute.

Mr. Webster reports that the response from experts in the twenty-three occupations to deal with has been most encouraging. The interest of these

N. Wiltshire Woman Hurt In Collision

Mrs. Robert Allken, New Wiltshire, suffered facial lacerations as the result of a head-on collision between two cars, on the Trans-Canada Highway, a short distance north of Cornwall at about 11:30 yesterday morning.

Mrs. Allken was a passenger in the front seat of a 1964 model car driven by her husband, Robert, which collided in a narrow cutting with another late model car operated by Rev. George A. MacDonald of Charlottetown.

The injured woman was transferred to the Prince Edward Island Hospital by ambulance from the Charlottetown General Home, where she was treated and following examination was released to her home. Mrs. Allken suffered the injuries when she was thrown forward into the windshield.

Both vehicles received extensive front-end damage, and were towed from the scene to Charlottetown.

The accident was investigated by the Charlottetown RCMP.

Breeders' Sale Added To Easter Beef Show

A "Breeders' Sale" of pure bred beef cattle which is to be held in conjunction with the Easter Beef Show and Sale will be staged the forenoon of March 12, it was learned last night from Dr. H.H. Kelly who secretary of both livestock events.

The beef show will be staged on the afternoon of March 12, and the sale of breeding animals on the following forenoon, and the best steers will be sold on the afternoon of March 13, Dr. Kelly explained.

"We prefer," Dr. Kelly explained, "that the animals offered in the breeders' sale be of breeding age, and the number has been limited to 30. That will be staged the forenoon of March 12 at 10 for each of the Shorthorn, Hereford and Angus breeds. But in case any breed does not fill its allotment of 10, the balance can be made up from one or other of the remaining breeds.

"We expect to get out a catalogue with an extended pedigree to three generations, for the animals listed for breeding purposes," Dr. Kelly added.

Work Delayed By Storms

R.M. Rickard, project superintendent for Pilgott Construction Company, said yesterday that unless there is let more adverse weather, the theatre siting of the Fathers of Confederation Memorial Building will be ready for the Dominion Drama Festival finals scheduled for here in early May.

In referring to Sunday night's storm which dropped 15 inches of snow in the Charlottetown area, Mr. Rickard observed "The snow hurt us badly," and added "we'll lose two or three days by the time the men get in from the country."

He noted that they had hoped to be finished pouring the library roofs before now but there is still one more to go. "We hope to have it finished this week," he said.

SDU Debating Team Wins Unanimously In Chatham

St. Dunstan's University accomplished the almost impossible last night — winning a Maritime Intercollegiate League debate by a unanimous decision away from home.

Debating the resolution: "Resolved that education at the university level be federalized," St. Dunstan's upheld the affirmative of the resolution last night. The judges praised the Island debaters for their clear outline, their development of the topic and their presentation.

This Saturday night, St. Dunstan's will host Acadia University in an attempt to win their third debate in a row.

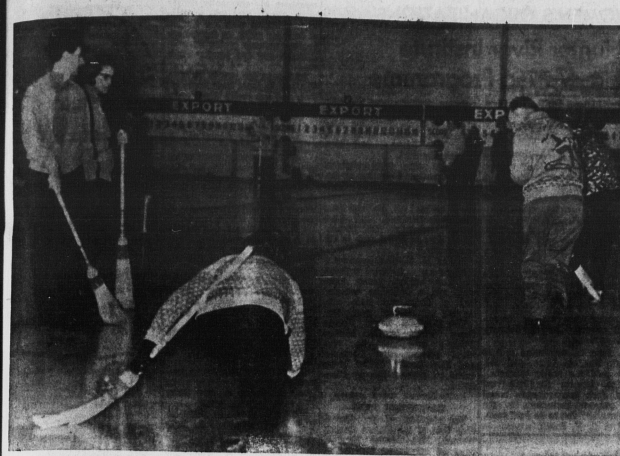

John R. MacDonald and David Campbell will represent St. Dunstan's in this all important encounter. The topic of this debate is: "Resolved that Canada's role in promoting world peace has been minimized by the acquisition of nuclear arms."

A win on Saturday night would very likely result in another

Maritime championship. However in the event that another university wins it's three debates, a playoff would be necessary before the national playoffs to be staged here in March. Saturday night's debate is at 7:30 in the SDU gymnasium.

P.E.I. MIXED CURLING BONSPIEL UNDERWAY

The provincial mixed curling bonspiel got underway yesterday at the Charlottetown Curling Club, and will conclude Saturday. Shown above is action during the 4:30 p.m. draw as a stone is delivered during the game. Opposing team members look on as the other team prepares to sweep the stone.

Storms Bring Trouble To Civic Departments

By RALPH CAMERON

Inspector A.J. Dowling yesterday pointed out that plow operators and street department employees are not the only ones that are seriously affected following heavy snowstorms.

Following any major storm, each of which brings meter parking to a standstill, the Inspector said he has to realign the traffic squad to provide police service for other purposes.

Particularly, he stated, it is usually necessary to have traffic police on duty where the snow removal crew is loading the snow into trucks for transportation away from the centre of the city.

The reason for the need of traffic police, Inspector Dowling stated, was that need in getting the loaded trucks out of the area is important in order to make room for others waiting to be loaded. This means it is necessary to get the loaded trucks across intersections as quickly as possible.

For this reason, police must be on duty particularly at corners where there are traffic lights in operation in order to prevent delay to the trucks through being held up by red lights.

GOOD JOB
Inspector Dowling paid tribute to the work of the employees.

Tenders Are Called For Garbage

Tenders for garbage collection have been called by the village of Parkdale and Sherwood. The closing date is March 2.

Chairman of the Sherwood Village Commissioners, Fred Cannon, said yesterday it was "an open tender" and the awarding of the contract would depend largely on the village of Sherwood and Parkdale will be using Charlottetown's new tepee incinerator. Charlottetown garbage collection is by the firm of Jenkins and Clark.

Asked if the village would be predisposed to hand the contract to Jenkins and Clark, Mr. Cannon said this was not so.

"If we can get the same service cheaper by another firm we'll do it," he said.

He said several people have indicated their interest in the contract, and their intentions of securing the "pucker type" of truck which is required for the collection.

LOCAL BRIEFS

IN HOSPITAL
John R. MacDonald, Cornwall, is a patient in the Prince Edward Island Hospital.

IS PATIENT
L.G. Anderson, 40 Maple Ave, Sherwood has entered the P.E.I. Hospital, for treatment.

SHOWING FILM
A film on Billy Graham's last crusade in London, England, will be shown tonight at Faith-View Baptist Church at 8 o'clock and tomorrow night at Loas G. Baptist Church at 8 o'clock.

RCMP Plan Refresher Courses Here

Weather and road conditions permitting, two one-day refresher courses for members of the RCMP will be held at the Malpeque Road barracks starting today, Supt. A. S. McNeil stated.

With several members of detachments having taken courses away they are in an excellent position to bring others up to date on a wide range of procedures, at the same time senior members of the force will refresh the memories of others on day to day matters.

They maintain the blade of the plow is not being lowered sufficiently. The end result is that in a relatively short time there are sets of tracks made in soft snow and as time passes the areas outside the tracks become frozen with the result that cars can easily be thrown against an oncoming vehicle if they happen to bump against the hard raked ridge.

While city traffic was moving more freely yesterday than Monday, there were vast piles of snow in many city streets requiring removal.

Though motorists generally are cooperating fully in a snow removal effort, they have one complaint heard on many sides.

The superintendent said it was his intention to have one-half the force in the city today with the other half attending tomorrow.

He also said Feb. 24 was the starting date for a three-day police course for all municipal police units as well as members of the Canadian National Railway investigative staff, park wardens and representatives of the RCMP.

charged with snow removal, many of whom work through the night in an endeavour to have streets open for travel in the morning. Their efforts have to be supported, he said, by the police.

During these periods little attention is paid to parking meters because windblown snow frequently either completely buries the meter or makes getting to it virtually impossible. In any event the still active motorists ignore the coin cell before they even when a chance wind blows a parking area available.

While city traffic was moving more freely yesterday than Monday, there were vast piles of snow in many city streets requiring removal.

Though motorists generally are cooperating fully in a snow removal effort, they have one complaint heard on many sides.

SURPRISE!

F-85 just put you in the market for an Oldsmobile

F-85's lower 1964 price now means you can put yourself in command of an Olds—with everything that implies. For a start, it means you'll get a choice of outstanding engines — from the Econ-O-Way 155-hp V6 (one of the world's few V6's) to the swashbuckling Cutlass 290-hp V8*. And you can pick a transmission to match 'em — 3-Speed or 4-Speed Synchro-Mesh*, or the new Jetaway automatic*. Then there's handling... the word "great" will spring to mind as you enjoy the outstanding manoeuvrability. F-85's convenient size makes it wonderfully nimble to drive or park. And as for style, it's of the stand-back-and-whistle variety. All of this put you in the mood for Olds F-85? The price puts you in the market.

*Optional at extra cost (Cutlass V8 engine standard on Cutlass models)
