# Gov't. Studies Proposal Coal Board Become Selling Agency

OTTAWA (CP)—The federal government is studying a proposal that the Dominion Coal Board be given power to market surplus coal as a means of keeping mines operating, Mines Minister Comtois said Tuesday.

The proposal came from officers of the United Mine Workers of America (Ind.) in Cape Breton, where five collieries are scheduled to be closed Feb. 1.

Mr. Comtois was replying in the Commons to a question by Hazen Argue, CCF House leader. The coal board is the federal agency for promoting the coal industry. It now has no power to market coal. A major function is to advise on and administer federal treasury subsidies to assist in movement of coal to markets.

In another phase of questioning council and one two-year period as mayor.

Members of last year's council, Elmer Doucette, Keith MacKenzie, and Elmer MacDonald, and former Mayor, Joseph J. Campbell, did not seek re-election.

On the same day, he said, the minister had told the Halifax Chronicle-Herald that the cabinet was studying a memorandum concerning coal subvention payments following Dominion Coal Board meetings attended by company officials.

"Information was refused to the House and given to the press," Mr. Robichaud said. "It is a shock to the rights of Parliament."

The House had been "misled and misinformed."

Mr. Comtois said there was no conflict between his statements to the House and to the press.

Outside the House, he had stated that the government had received representations from the company for increased subventions.

Replying to a question in the House, he had said he had not received official notice of the proposed reduction in personnel.

**PAPER MILL STRIKE**  
MECHANICVILLE, N.Y. (AP)—The United Papermakers and Paperworkers Union struck the West Virginia Pulp and Paper Company plant here Tuesday.

Gerald Clark, London correspondent for The Montreal Star, former war correspondent and Weekend Staff Writer, emerged from his most recent trip behind the Iron Curtain "staggered and terrified." Why? Because he witnessed the most enormous social and industrial transformation in all human history—one which makes the Russian revolution insignificant by comparison. Read this illustrated first-hand account of Red China's feverish exploitation of her natural resources, the fast-being-realized ambition to surpass the United Kingdom, the toppling of precious old idols such as family allegiance. What subtle techniques are being used for "persuasion" to wreak such a vast—and frightening—face-lifting operation?
