ON PRAIRIES

Crop Prospects Reported Good

OTTAWA (CP) — Although drought, excessive heat and hail have taken their toll, crop prospects on the prairies generally are good to excellent, the Dominion Bureau of Statistics reported Wednesday.

In its ninth crop report of the season based on telegraphed information from correspondents across the prairies, the bureau said recent rains over wide areas will help crop development and arrest deterioration which had started in some districts.

Rains throughout Manitoba last weekend stopped deterioration and will provide moisture needed to fill the grain.

While early seeded crops were too advanced to benefit noticeably, cooler weather that accompanied the rains has improved prospects for other crops.

In Saskatchewan, cooler weather with light to heavy showers maintained an extremely favorable crop outlook. Moisture supplies in many areas now are sufficient to carry grains to maturity.

HEAT HELPED

The recent hot spell hastened advancement and some swelling of spring grains now is under way in southern districts. Increased harvesting activity is expected this week.

Recent rains have helped crops in all areas of Alberta except in northern parts of the Peace River district.

Moisture now is generally sufficient to ensure good filling of cereals but because crops are one to two weeks later than normal, warm weather will be needed from now on to bring them to maturity.

Wheat leaf rust has increased in the last three weeks on the prairies and is present in moderate amounts on susceptible varieties but the increase has occurred too late to affect wheat yields.

Crop Mood — honor clinics, when 200 donors registered on the 50 objective on 122 per cent. The Souris area, where the annual grain is sponsored by the local branch of the Royal Canadian Legion, has been the winner of this coveted trophy for the past two years and surpassed Charlottetown's 126 per cent chalked up at this year's April clinics.

The 50 additional donors secured in Souris made up for the deficit at Mirell but the overall results for the first three days show the quota to be 75 short of the objective. This shortage could still be overcome if the 270 objective for today's clinics at Cardigan this afternoon, and at Montague this evening, can be substantially exceeded.

Kensington Residents Have 'Theatre Party'

A Theatre Party has been organized by the Kensington area Board of Trade as a club project under the Summer Festival Community Night Scheme whereby a block of tickets can be obtained by a rural community organization at a discount. Taking advantage of this opportunity are 200 residents from the Kensington area who will arrive at Confederation Center Thursday night to see "The Adventures of Private Turvey".

The Kensington group will assemble Thursday evening at 7 p.m. at the railway station to form up a 60-car motorcade which will be led by the RCMP. The motorcade will proceed through Charlottetown to the Confederation Plaza parking lot on Kent Street where a parking space has been reserved, and the group will then gather in the theatre lobby to be escorted to the section of seats reserved for them.

Commented Festival artistic director Mavor Moore, "We most certainly welcome the residents of the Kensington area to their night at the Festival, and I would like to personally congratulate the members of the Board of Trade for their enthusiasm and drive in making the project work."

"Community backing of this kind from all over the Island means a great deal to everyone connected with the Festival, and it's heartening to see such evidence of festival spirit in this rural area. It's my hope that other communities will follow the lead offered by Kensington and plan theatre-nights of their own."

It's with a great deal of pleasure that I on behalf of the Festival officially designate this August 11 performance of "The Adventures of Private Turvey" Kensington Night at the Summer Festival!
