THE DAILY EXAMINER

OCTOBER 27, 1897.

LATE NEWS BY WIRE AND MAIL.

DRUMMONDVILLE, Que. Oct. 22.—The Drummond County Railway was formally opened from St. Hyacinthe to Chaudiere today by a special train passing between these points containing 175 persons. The run was accomplished in good time and all on board were pleased with the condition of the road. Messrs Tarte, Fisher and Borden were among those present.

TORONTO, Oct. 22.—The directors of the Dominion Bank have offered rewards aggregating twelve thousand dollars for information which will lead to the conviction of the person or persons who stole the money recently stolen from the bank vaults at Nepesee, for which teller Ponton was recently tried and acquitted. Ponton is suing the bank for fifty thousand dollars for false arrest.

MADRID, October 22.—The Imparcial in an article entitled "The Denouement of the Drama—Another attack of the United States," declares Spain cannot remain silent in the face of America's persistent injustice. The government must not forget the national honor and ought to pay more attention to the moral than to material interests. A memorandum should be sent to the powers comparing the attitude of Spain and of the United States. It would have a great moral effect, unless notions of the justice and rights of nations no longer exist.

OTTAWA, Oct. 24.—For some years past American and Canadian fishing companies have been plying their business in Lake of the Woods and Lake Winnipeg to such an extent that these great sheets of water are somewhat depleted. These companies are now turning their envious eyes upon others of the inland waters of Canada. Two companies have started business at Lake Winnipegosis and unless the minister imposes strict regulations in regard to fishing and limits the number of companies who may operate there a few years will repeat the tale of the other depleted waters.

NEW YORK, Oct. 23.—A special to the Sun from Richmond, Va., says: The Rev. T. H. L. Vint, a North Carolina evangelist, who is conducting a revival in a church here last night saw two young women smiling during service. Walking down the aisle to where they were, he knelt and prayed that they would die immediately and go to hell. Rev. S. Hatcher, who was present, and who has attended the revival, left the church. When he was asked why he left the church he is said to have replied: "I think it my duty to pray people out of hell, not to pray them in."

PARIS, Oct. 22.—The Temps today, referring to Great Britain's refusal to agree to the proposals of the United States monetary commission, says: "The British government has not hesitated to disappoint the hopes of those who counted upon the re-opening of the Indian mints and the

meeting of an international monetary conference. Now it is only a risk to keep alive the unfortunate illusions. Nobody will dare to talk of the pretended inclinations of Great Britain to change her currency, and as nobody will have the impudence to demand for France a coinage repudiated by our neighbors we can again have full confidence in sound currency. Any doubt on this point is now dissipated.

MONTREAL, October 21.—Hon J. I. Tarte, minister of public works and his party had a narrow escape from death when returning to Montreal from St. Croix, Lotbiniere county, where the ceremony of inaugurating some public works had previously been gone through with. The Montreal harbor tug St. James conveyed the minister's party. When opposite the Champlain, the tug was diverted from the channel to obtain a view of the stranded steamer Lake Superior, when it collided with the sailing vessel Blanche, brick laden. The cabin was knocked off the tug Mr. Tarte's secretary was somewhat hurt and the minister and his friends, including Coote, the deputy minister, began disrobing, preparatory to leaping over board. This latter step, however, was not necessary, when it was ascertained that the St. James was in no danger of sinking.

MADRID, October 22.—Senor Sagasta, the premier, presided at the cabinet council today. The draft of the proposed reply to the United States presented through General Stewart L. Woodford, the American minister, shortly after his arrival here, was under consideration and was unanimously approved. Its full text has not yet been published. The reply explains that General Weyler has been replaced for political reasons, and includes a statement of the government's decision to grant autonomy to Cuba and a protest against filibustering expeditions from the United States. The council also approved unanimously the proposal introduced by Senor Moret, minister for the colonies, to grant amnesty to political prisoners in Cuba and Porto Rico. Prior to the meeting of the council Senor Sagasta had a long conference with the Queen Regent at the palace. Senor Guillon, the minister of foreign affairs in the course of an interview today denied that there had been the least trouble between premier and himself as to the course to be pursued, adding that he had communicated to Senor Sagasta the contents of all the despatches from Senor de Lome, the Spanish minister at Washington, and had consulted the premier on all instructions sent to Senor de Lome.

Moncton Times: The Transcript refers to Rattenbury's pork packing factory at Charlottetown as "a new industry developed under the Laurier regime." This will be news for scores of merchants who have been buying the Rattenbury pork for years. That the pork packing industry continues to flourish is due to the fact that the liberals did not touch the pork duties which they so roundly denounced in opposition.

A DASTARDLY ACT.—Some one threw a stone through the window of the Free Baptist Church, Moncton, during the service on Sunday evening, to the great alarm of the congregation. The stone passed through a large pane of glass behind the pulpit, only a foot or so above the head of Rev. Mr. Parker, who was preaching.

A SUCCESSFUL TRAINER.—Minota, the bay flyer, which did such great work in yesterday's races, was shipped back to Amherst by the Canada Eastern this afternoon, Driver Cox accompanying her. Mr. Cox has made a great record for himself during the past season as a trainer and driver. He has put three horses in the charmed circle, Kickapoo 2.29, Curtis 2.27, Pandect jr. 2.29 and one in the 2.20 list, Minota, 2.19 (the fastest mile ever made by a province bred horse on a provincial track) all trained and driven by himself.—Fredericton Gleaner.

NOVA SCOTIA IN KLONDIKE.—Mrs S. B. Chisholm, of Liverpool, N. S., recently received a letter from her son J. W. Chisholm, who left in the early part of the summer for the Klondike gold fields. The letter is under date of Sept 13th. Mr. Chisholm writes: "We will be over the White Pass this week. Four of us have an outfit of 3,500 lbs of food, etc., and two horses. We go over the lakes towards the gold regions. We will do away with the horses now and pack over ourselves as best we can. I send this letter by party going on to Dyea. All well—good courage." The letter was received from Washington, having a 2-cent American stamp and enclosed in a new envelope.

THE WINDSOR FIRE.—The police searched the house of McIntyre, the Windsor fire suspect a few days ago and in five minutes sufficient evidence was found to send him to the penitentiary. A military guard was placed in the house. Several lamps were found recently emptied, also an oil can which was filled with oil for McIntyre late on Saturday night. Fires had been started in three places in each bedroom, in the upper hall and under the eave. The floor was saturated with paraffine oil and the corner partially burned. Several mattresses were found saturated with oil. When a trunk was broken open a valuable roll of cloth and velvet and fur tippets was found, costing about one hundred dollars. Whole webs of dress material and sail faced cloths were found hidden away in a closet. Fletcher has virtually thrown up the sponge. He admits almost everything but applying the torch.

It is rumored in Montreal that the fate of the Canadian mail contract has already been decided, and that the New York boats will carry the Canadian mails this winter. The Beaver Line is, however, to be awarded the packet post portion of the mails as their boats will run to St. John, N. B., thus making a Canadiana port their terminus on this side of the Atlantic.

DUTY OF PARENTS.

Wise Guidance Needed For the Youth Who Is Leaving Childhood Behind.

"There is something pathetic in the struggle of the child to cast aside its child nature and put on the nature of manhood and womanhood," writes Florence Hull Winterburn in *The Woman's Home Companion*. "He is beset internally by misgivings even while he is urged on by ambition. He wants he scarce knows what, but something new and never before possessed. Perhaps, in a nutshell, the great desire of his soul is to be left somewhat to himself, yet with sympathy within call, and to be trusted. It is a great evidence of tact now for the mother or father to say, with a kind smile: 'Do what you think best about this matter, my son. You are old enough to judge what is right.' Happy responsibility! Delightful confidence! Influence is never stronger than when it withdraws slightly into the background, leaving its object apparently free. A good deal is said nowadays about the extraordinary freedom our children have. Seemingly it is so, but looking here and there an observer notes little real change among the average people.

"A young friend of mine whose happy married life has not yet driven from her memory a cramped and embittered youth confided to me that the one idea that haunted her from 8 to 18 was that of running away from home. If she had been less conscientious, a little more reckless, what a gulf of ruin her innocent feet might have plunged into to escape the intolerable nagging and interference she was subject to in her father's house!

"We little know what effect our thoughtless and meaningless words of comment and chiding for every small matter that goes wrong produce upon the half grown girl and boy. They are apt to be reserved and to become sullen under restraints they dislike, and when this sullen attitude once sets in we may say farewell to all confidential intercourse between parent and child. To avert such an evil we will do well to apply all our powers of tact and kindness. Let us avoid arousing the spirit of perverseness that stirs in every young creature at this period of life, and, by enlarging his opportunities for action as his ambition extends, soothe any budding revolutionary ideas and inspire in him the trust and confidence in parental benevolence that will be his safeguard when he needs advice and assistance, for youth never stands in deeper need of wise guidance than at this time when there is a desire to dispense with it. But the guidance must be so wise, so tactful, so gentle, that even the most independent young soul will feel that love, and not force, is the motive power that draws him toward what is best, and that he is restrained by nothing except his own honor and trained sense of right."

During the critical period when a woman is looking forward to motherhood, the best protection she can give to the tender little life which is dependent upon her own, is to fortify herself with the health-bringing "Favorite Prescription" prepared by Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., and sold by all dealers in medicines.

All the dangers of motherhood and most of its pains and discomforts are entirely banished by the use of this rare "Prescription." It gives elastic strength and true healthful vitality to the special organs and nerve-centres involved in motherhood. This healthful condition is transmitted to the baby both by the improved quality of the mother's secreted nourishment and by the child's increased constitutional vigor.

It is a perfect health protector to them both. No other medicine was ever devised by an educated, scientific, physician for the express purpose of bringing health and strength to the special feminine organs. No other preparation ever accomplished this purpose so scientifically and effectually.

A more particular description of its remarkable properties with a full account of some surprising cures of female difficulties is given in one chapter of Dr. Pierce's great thousand-page illustrated book, "The People's Common Sense Medical Adviser," which is sent free paper-bound for the mere cost of customs and mailing—31 one-cent stamps; or, cloth-bound, for 50 stamps. Address the Doctor as above.

A whistling moth is an Australian rarity. There is a glassy space on the wings crossed with ribs. When the moth wants to whistle, it strikes these ribs with its antennae, which have a knob at the end. The sound is a love call from the male to the female.

The leaders of a flock of migrating wild geese become tired sooner than others and are frequently relieved by their fellows.

ECONOMY in taking Hood's Sarsaparilla, because "100 doses one dollar" is peculiar to and true only of the One True BLOOD Purifier.

FIFTY YEARS OF PROGRESS

The Success of a Great Canadian Industry.

A Short Sketch of the Mammoth Plant where the most Famous Malt Liquors that Canada Produces are Manufactured—A Toronto writer describes his Visit to the Establishment of the Carling B. & M. Co., (Limited), London.

From the Toronto Globe, Sept. 18, 1897.

The immense establishment of the above company, covering a ground area of 38,600 feet and five stories in height, with elevator running from top to bottom, stands out conspicuously as one of the leading manufactories of London. It was founded on a small scale fifty years ago by the late Thomas Carling. It is one, however, whose fame and reputation is not confined to London or Canada alone, but is known all the world over. Through the kindness of Sir John Carling the Globe's representative, had yesterday the opportunity of examining into the resources of his immense industry, and he was amazed not only at the gigantic operations carried on, but at the amount of machinery and stock necessary to conduct a business of this magnitude. London is exceptionally favored in having such an industry within the limits, while the company are to be congratulated on having their plant in such a flourishing city and surrounded by counties whose fertile acres well entitle them to be called "the garden of Canada." In all the products of the company the same care as to the tone and excellence of the qualities of liquor is observed.

Their celebrated porter deserves especial mention, not only as being an excellent beverage, but because physicians recommend it strongly for invalids and persons with weak constitutions. Its constituent elements are the "Dublin" malt, the same as that used by the world famous brewer, Guinness, and pure spring water. This water is kept in a beautiful reservoir on their adjacent grounds. It is the purest in Canada, as shown by chemical analysis, and is employed in the manufacture of all the firm's output. It produces during 24 hours 60,000 gallons of water, and is thus kept in a perpetual state of purity and coolness.

The Carling's ales and lager are also famous throughout Canada on account of their superior quality, purity and delicacy of flavor, being produced from the very best quality of barley and hops. As a result there has been a great falling off of the imported articles in these lines in recent years, as Canadians are quick to recognize the merits of an article of home production when the quality meets their approval.

Their exhibits at the Western Fair this year is a model of artistic arrangements. It is pyramidal in shape, 12 feet in diameter, and 25 feet high. Fifteen hundred bottles of their ale, lagers, porters etc., are employed in its construction, making it one of the most striking features of the exhibit, and one showing the enterprise and push which characterize all the actions of this company.

As an evidence of the popularity of their goods it may be further stated that they were granted special diplomas and medals at the World's fair in Chicago for the general excellence of their goods as well as at every other exhibition of importance where their goods were displayed.

What Guinness and Bass are to Great Britain, or Pilsen to the United States, Carling is to Canada, and it is safe to predict that in the future as in the past this company will occupy the foremost place in this line of manufacturers in Canada. The Company's branch establishment for the Maritime Provinces is located in St. John, N. B., with Mr. George Fairweather as agent. Mr. Fairweather's well equipped bottling cellars and storage vaults make it possible for him to supply the trade with goods properly matured and guaranteed to give satisfaction at all times.

COFF BROS.

Fifty Years Ago.

This is the stamp that the letter bore which carried the story far and wide, of certain cure for the loathsome sore that bubbled up from the tainted tide of blood below. And 'twas Ayer's name and his sarsaparilla, that all now know, that was just beginning its fight of fame with its cures of 50 years ago.

Ayer's Sarsaparilla

is the original sarsaparilla. It has behind it a record for cures unequalled by any blood purifying compound. It is the only sarsaparilla honored by a medal at the World's Fair of 1893. Others imitate the remedy; they can't imitate the record:

50 Years of Cures.
