## Perkins & Sterns

Why the Columbus Watch is the Best  
THE Main Spring barrel is completely covered, making the watch perfectly dust proof.  
There can be no interference between the Balance and the Barrel.  
The Regulator is nearly double the length of others, rendering accurate regulation a very simple matter.  
To replace a broken Main Spring, the Barrel can be removed without disturbing the Balance or interfering with the regulation.  
The Pins of the Regulator are so formed and located that two or more coils of the Hair Spring cannot catch between the Pins and cause the Watch to stop or gain time at an unusual rate.  
The Balance comes under the round, or edge, the strongest part of the case, not as with all others, under the center and weakest part.  
The Main Spring Power is the lightest used in American Watches.  
The calculation of the Train is such that this Watch runs 8 to 10 hours longer than others, with one winding, giving more uniform power and rate.  
These are improvements that cannot be claimed by any other manufacturers, and once seen, all must agree with us in saying that this is the strongest and best Watch made; and with all the above improvements, the Columbus Watches cost no more than others.  
G. H. TAYLOR,  
Jeweler, Charlottetown, P. E. Island.

**Paid Representatives.**  
Some curious statistics have just been published concerning the salaries given to members of parliament in various foreign nations. To begin with France, the senators and deputies receive the same remuneration—namely, £1 sterling a day. In Belgium each member of the Chamber of Representatives gets £17 a month. In Denmark the members of the Landsting are paid about 15s a day. In Portugal the Peers and Commons are given the same sum, which is £67 a year. In Sweden the members of the Diet receive £65 for a session of four months, but they have to refund a fine of 18s for every day's absence. This is not a bad idea. In Switzerland the members of the National Council get 10s per diem, and those of the Council of States 6s to 10s. In the United States Congressmen are paid \$5,000 per year, and 10 cents per mile for travelling to and from their constituencies. In Norway the members at the Storthing receive 14s a day during the session, which lasts about six weeks. In Italy the senators and deputies are not paid, but they are allowed travelling expenses and certain privileges. In Spain the members of the Cortes are also unpaid but enjoy many advantages and immunities. In Greece the Senators get twenty pounds a year, and the deputies ten pounds. In Germany the representatives receive an average of 10s a day. In Austria the pay is the same as in France, £1 a day. England is the only country where members of Parliament are not only unpaid, but have no rights or privileges. In Canada members of the House of Commons and senators are paid \$1000 per session and travelling expenses to and from their homes. In Ontario and Quebec members of the Legislature receive \$800 indemnity and travelling mileage. In Nova Scotia the sessional indemnity is \$400 and travelling mileage, and in New Brunswick \$300 and 10 cents per mile for travelling expenses. In P. E. Island the sessional indemnity is \$160 besides mileage.

**Ayoub Khan's Escape.**  
Ayoub Khan has again become a quality in the world's political problem. Several years ago this young man dropped out of public notice, and since that time no one has heard anything about him whatever. When his cousin, the present ameer of Afghanistan, ascended the throne of that turbulent country this particularly fierce mountaineer objected to the proceeding with a very loud voice, and in every material way at his command. Ayoub did not cease his efforts until he had organized a first-class rebellion. For some time there seemed to be good prospects that his enterprise would prove a complete success. He proclaimed himself the only true ameer, and presently found himself the leader of a large army, all of whom heartily hated the government, and therefore had considerable temporary love for their commander. He captured Candahar, and had the pleasure of winning nearly every engagement, until all of a sudden his excessively combative soldiers got up a general engagement on their own account. In this social fight about one-third of the army was destroyed, and the rest rushed away to the hills in about as many directions as there were prizes represented, vowing vengeance on each other and everybody else. With the laudable desire of keeping his head in the position where nature had placed it, Ayoub made haste to get out of the country and into Persia. Here, at the request of England, he has remained a prisoner of state. But it now appears he has made his escape from Teheran, and gone no one can be certain whither. Most likely the would-be ameer is now on Russian territory. Before long he will take an active part in Afghan affairs. Those who have lately rebelled are all his friends, and he may succeed in making the bloody confusion even worse than it is at present.

**Chinese Affairs.**  
China, in many respects, is now adopting European manners and customs, and also European appliances. In a few years, in time of peace, her affairs will be largely conducted along the lines of western civilization. In the matters of warfare she is already closely following the models of England and Germany. But this old country emerges from the gloom and darkness of her antique institutions very slowly and very reluctantly. Among other cumbersome affairs which nothing can induce the celestials to abandon is the peculiar form and marvellous number of characters that make up their alphabet. A goodly number of telegraph lines are now in thorough running order, and after the operators get used to the queer letters, business is transacted without any difficulty. About 7,000 characters are required for the ordinary, every day affairs of mercantile subjects. In order to handle this vast foundation of the language the telegraph authorities have had a book printed containing these characters, and numbered from 1 to 7,000. When a person sends a message he simply wires numbers representing the characters, and the receiver marks them down. Reference being made to the book, the characters are ascertained and the words spelled out. This strange system has been working for thirteen years, and to the Chinese it is perfectly satisfactory.

**Mysterious Death of Cattle.**  
The Guelph, Ont., Township Board of Health are enquiring into the cause of the death of numerous cattle along the River Speed. It seems that the disease spread by inoculation. A man who had a slight cut in his hand while skinning one of the dead animals afterwards suffered severely from the wound. Prof. Brown, of the Agricultural College, could find no poisonous plants along the stream except old hemlock, which is thought to be poisonous to cattle, and he is making an experiment on a pig and a lamb with tea made from its leaves. Another suspicion is that as a paint-house was burned in the vicinity where the deaths have occurred and the paints washed into the river the plants along the river might have been poisoned. Prof. Bryce, of Toronto, has taken away for analysis the blood of one of the animals that have died. The local Board will spare no pains to reach a solution of the mystery.  
George Mired Picking Splice just received by Burt & Co's.

**ODDS AND ENDS.**  
**An Interesting Budget Compiled for Easy Reading.**  
A church organ constructed entirely of paper is on exhibition at Milan.  
Wesley Urquhart, of Uxbridge, Ont., was gored to death by a bull on Saturday.  
The royalty on the "gospel songs" of Moody and Sankey, amounted to over \$200,000.  
The Salvation Army, entering India five years ago, has now 120 English and 80 native missionaries.  
Alex. Dogherty, of Stratford, a convict in the Kingston penitentiary, suicided on Saturday by hanging.  
It is curious to read that the crops in the Shahhandataluka of the Kurrachoe district have been injured by crabs and turtles.  
There are in New York city about 160 woman physicians. Half a dozen of them make incomes of about \$10,000 a year.  
Pine City, W. T., claims to have the smallest living woman. She is 27 years old, 29 inches tall, and weighs 29 pounds.  
Everybody found smoking on the streets of Sangaturk, Mich., during the dry spell, was liable to be arrested under the orders of the village council.  
The eccentric American artist, Whistler, is sketching picturesque retreats of poverty in London to complete his series of pictures for exhibition in this country.  
Fish liars are always pre-eminently prolific in their tales. This time it is a lobster 200 years old and weighing 32 lbs., that was caught at Clements, N. S.  
The Pope has received home contributions amounting to \$50,000, and foreign amounting to \$90,000, to be devoted to paying the expenses of his jubilee celebration.

Ministers are so scarce in Idaho that they have to be imported in many cases where people wish to get married. Trains are stopped that they may be searched for ministers.  
An Arizona stockman gave his wife \$12,000 worth of jewelry and \$3,000 for pin money within three days after his marriage, whereupon the woman eloped with an eastern drummer.

A nine-year-old step daughter of a Mr. Peppard, of Moncton, is asserted to imitate the cries of animals and cause furniture to move about the room, while unconscious of any such act.

Rev. Horatio Bonar, D. D., the well-known hymn writer of Edinburgh, is to be presented with a testimonial from Christians throughout the world on his birthday anniversary, Nov. 30.  
A man named Cook on the India river, Florida, became so exasperated over the continued drumming on a piano that he started out with a shot gun and killed the piano player, Hoyt by name.

According to a parliamentary return, the British national debt decreased \$39,199,518 during the last financial year, and \$490,812,513 in the last 30 years. The present amount is £736,278,688, or \$3,582,005.  
A Mexican paper says the condition of the poor in the City of Mexico is most lamentable. Neither Naples nor Constantinople in their lowest quarters can show worse squalor or more saddening spectacles.  
A clergyman on a sultry afternoon paused in his sermon and said: "I saw an advertisement last week for 500 sleepers for a railroad. I think I could supply at least fifty and recommend them as good and sound."

One of the most obliging men on record lived the other day in St. Louis. He walked into a newspaper office, gave the city editor a sketch of his career and jumped into the river. The average obituary account is not obtained so easily.  
A beggars' agency in Paris supplies for two francs, the addresses of persons who are known to assist beggars. It also supplies professors of mendacity, who sell beggars' manuals containing phrases calculated to soften the hard-hearted.  
The rust and rot are making great havoc with the potato crop in Maine. Entire fields of vines are leafless as if scorched by fire, and on digging, in many instances over half the tubers are rotten. A farmer in Augusta the other day dug 60 hills to get a half bushel of marketable potatoes.

Mr. Gladstone has written a reply to the Duke of Argyll's recent attack. He says: "The Duke of Argyll is an old friend, whose attacks I prefer bearing silently. I do not excuse tyranny, but wish to have the National League dealt with legally, not by an arbitrary decision of a viceroys or chief secretary for Ireland."  
A romantic story comes from Moscow. A young student was charged with attempting to conceal explosives in a private house. A young girl was compelled to appear against him, and on her evidence he was sentenced to 20 years' hard labor in the Siberian mines. After the trial the girl sold her jewels and bribed the Cossacks in charge of the condemned man, who allowed him to escape. The couple repaired to Switzerland, where they have just been married.  
Engineer in Chicago Journal:—Have you ever noticed at a railroad crossing how people will rush across the tracks just ahead of the engine, and then stand on the other side and watch the train go by. It's a mighty curious thing; everybody does it, though, men, women and children. Sometimes a whole family will tear madly across the track as though their existence depended on getting over ahead of the train, and then all turn round and stare at the train as it shoots past. Now it's the easiest thing in the world to get your foot caught between the ties of loose boards on a crossing, and the majority of people killed by the cars are run over while attempting to cross the track ahead of the train. I can't begin to understand why people with any sense at all will continue to do this, but they do.
