

STUDENT EXCHANGES

Are you interested in travelling and continuing your education at the same time? If so, a student exchange might be just the thing for you.

We currently have 4 exchange options: Dundee University (Scotland), University of South Florida, Eastern New Mexico University, and Muskingum College (Ohio, not South Carolina as previously printed).

Anyone interested in participating is invited to an information meeting on Thursday, Oct. 24. It is being held in Robertson Library 109 at 7:00 p.m. Also on hand will be information on working in Nagano City, Japan.

So if you are interested in an exchange or in Japan, I'm looking forward to seeing you at the meeting. Feel free to drop by Student Services to see me. My hours are:

Mon. 8:30 - 9:30

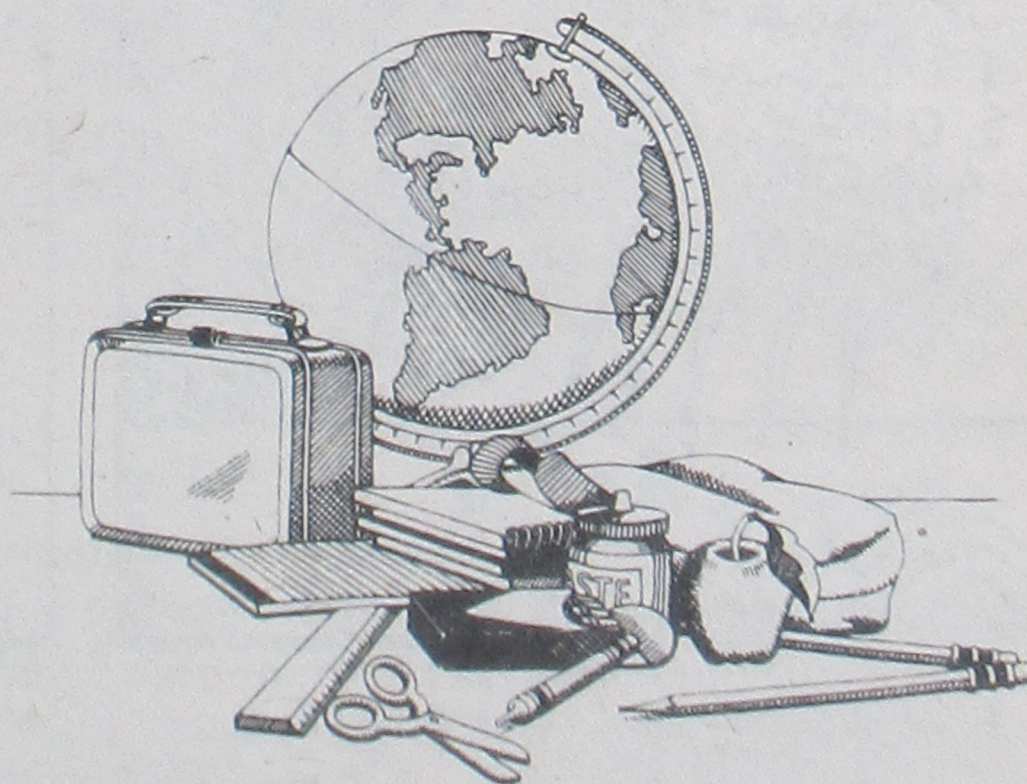

Tues. 10:00 - 11:30, 2:30 - 4:30

Thurs. 8:30 - 11:30, 2:30 - 4:30

See you around.....

Janice Ployer

Exchange/International Student Advisor

Then I began requesting that he save his personal pleasuring times for time when he was on his own, in his room, or in the bath for example. I would turn my back and read while he bathed and played only checking once in awhile to be sure he was alright.

There he would be, standing in the tub, his penis and scrotum pulled up as high as they would stretch, examining them closely. But that didn't slow down his mouth one little bit.

Finally, I reached my wits end with this child and his penis which made itself apparent everywhere we went. I asked the health nurse about it. I was told that this was developmental and would go away in a few weeks (which of course it didn't).

I was in one of those rare situations where I wished I was not a single parent and that Daddy would materialize and deal with this problem (which of course he didn't). I of course was not qualified - I was a girl- I could not have one. But the solution had to be somewhere. I simply had to locate it. But after months, only one solution surfaced.

I took him to a friend's house, a friend who had horses. We went out to the pasture to watch the geldings graze. Eventually, one of them extended to full length - about four feet - in order to urinate.

'Now that is a penis,' I stated calmly and walked away.

I never heard from Pauly about his penis again though I am sure that in private moments he still engages in self pleasure and examination. I am sure he is waiting for the day when he will grow, as will his penis and people will look at him and say, 'now that is a penis!'

One would think that was the end to the penis problem but just the other day, my younger son, Peter, started showing an interest in potty training. I suppose by next week, I will have to relieve him of his diaper and open up a whole new unexplored world for him. Heaven help us all!'
