

THE OLD POST OFFICE TURNED ABOUT

The old Post Office building, which is now being remodelled as a new Town Hall for Summerside, is of historic interest.

Built of brick, it was completed in October, 1886, at a cost of \$31,000 with Mr. Pierce Perry as the contractor and the interior architecture was finished by Mr. T. J. Clark. An unusual sidelight, remembered only by a few, is the fact that this building was designed and intended to face in the direction opposite to which it was constructed. When the foundation had been completed, it was discovered that an error had been made in the reading of the federal blueprints and the only way of overcoming that mistake was to redesign the front.

In 1847 the town's first Post Office was established in a small house a short distance west of where the Clifton House stands with Mr. Patrick M. Power as postmaster.

Tradition relates that Mr. Power was instrumental in having the early name of "Green's Shore" or "The Wharf" changed to its present name by requesting the postal authorities in Charlottetown to mark the mailbags "Summerside" and he led the way by dispatching

his mails per "Summerside". This occurred just a few years after Colonel Harry Compton, who lived on the Richmond Bay side of the island, came over the hill to the southern side one March day and, surprised with the strength of the sun, exclaimed to Mr. Joseph Green at "The Wharf", "Why, you are on the summer side here."

This remark so intrigued Mr. Green that he placed the word "Summerside" over the door of his hotel.

In those days the people stood on "Broadway" so designated in old leases, and now called "Water Street" to receive their letters and papers. That was in the time of the stagecoach when no stamps were used and when one paid a shilling a letter. In Spring and Fall, "Broadway" was practically a bog hole. From "The Islander" dated 1886 we quote: "The important town of Summerside is now nearly submerged. Its streets are ankle deep in mud."

The Journal of that date called vehemently for "Better Drainage" and the laying of a narrow sidewalk especially for the ladies.

Mr. Power held office for seven years, after which Mr. Thomas Crabbe was appointed to the position which he kept in Crabbe's

Boarding House, where the Small-man block now stands. In 1871, Mr. H.C. Green received the appointment as postmaster and, with the assistance of his son, Mr. Fred Green, served with the utmost care and exactness for approximately twenty years. His office, until 1886, was kept on the north side of Water Street in a building which is now part of M. L. Frank MacKenzie's Store.

A money order office was established in 1874 under the superintendency of Postmaster Green and during the year 1886, orders to the amount of \$15,000 were issued. Approximately 400,000 worth of orders are now issued yearly.

Mr. Richard Hunt became postmaster in August, 1891, and kept that position for two years, after which his son, Mr. L.B. Hunt, received the appointment.

In 1914 and 15 the building was remodelled by putting an extension on the east side to allow for working space and for rural couriers. The contractor was Mr. Harry Wood. At the same time the government installed a four-sided illuminated clock on the roof.

Mr. Hunt continued in office until his death in 1924, when the present Post Master, Mr. W. Arthur Allen, was appointed.

In 1944 alterations were made within the building to make room for extra new boxes. The parcel post door was also removed. This Post Office was quite inadequate to take care of the vast amount of mail which was being handled and in January, 1952, the beautiful new Federal Building, which contains the Post Office, was opened on Central Street. Other offices within are the Unemployment Insurance Commission, R.C.M.P., Customs and Fisheries Inspector.

The Customs Office was removed from Bodeque in 1952 to a building on Central Street, now the location of Jenkins' Groceries, with Mr. Charles F. Strong the first officer in charge in Summerside. It was transferred to the former Post Office rected in 1886.

Since the Town Hall was burned over a year ago, the police force have used the old Post Office building as their headquarters, as it had been purchased from the government by the town in 1952.

This old landmark, centrally situated in the town, now in the process of being remodelled for use as a Town Hall, will provide an attractive and serviceable building up-to-date structures in Summerside in architectural contrast to the

Ask Railway To Delay In Curtailing Train Service

At a general meeting of the Summerside Board of Trade held yesterday afternoon in the Canadian Legion Home to consider the proposed curtailment of the C. N. R. passenger and freight schedule in Prince County, the end of this month, the following motion after discussion was passed unanimously:

"Resolved that representations be made to the proper authorities requesting that any change in the present train schedule be deferred until the Canadian National Railways has met with the shippers in an endeavor to arrange mutually satisfactory freight service, as ordered by the Board of Transport Commissioners in the decision handed down subsequent to the hearing held in Charlottetown June 21st and 22nd 1955."

Premier A.W. Matheson, representatives of the potato shippers, livestock shippers, the president of the West Prince Board of Trade, Mr. J. Frank Bryan, and interested business men from various parts of the county were present at the meeting during which much discussion was held to determine what effect the proposed changes will have on the economic and business life of the county should they go into effect from April 30th to December 15th of each year.

The result of the overall discussion was that a committee was appointed to draw up a brief which the said committee will take to Moncton where it will be presented to Mr. Hayes, vice president of Maritime transportation pointing out the conditions which will prevail should the changes become

effective at the end of April, and failing to get proper assurance from Mr. Hayes that better arrangements be made for freight service in Prince County that proposed to be made to the Board of Transport Commissioners, asking that a hearing be held in Summerside, and in the interim, until that hearing is held that no change be made in the present schedule.

John S. Wright, president of the Summerside board, who presided at the meeting appointed the following to serve on this committee and go to Moncton to make its presentation: John Mungall, Fred Bingham, James MacDougall, Summerside; Mr. J. Don Campbell, Alberton, and Mr. J. Frank Bryan, president of the West Prince Board of Trade, Cascoque. Mr. Wright said that he would serve on the committee, ex officio, and accompany the committee to Moncton.

Premier A.W. Matheson, after hearing the comments and discussions, said that the motion which had been passed was a sensible one. He complimented those who had taken part in the discussions. "Your general arguments are very reasonable," he said.

The Premier pointed out that this Province has a railway which is part of the terms of confederation and that this method of transportation had been used quite extensively until the automobile, although at its best it had never been very satisfactory. With the coming of the auto as a means of transportation, people gradually grew away from train travel. He referred to the offer that the C.N.R. had made when they suggested the installation of a bus service

in the Province and said that perhaps it might have been better to have accepted this arrangement at the time it was made.

Mr. Bryan, president of the West Prince Board of Trade said that it was his opinion that if the people of West Prince lose the regular freight train schedule, something very vital to their livelihood will be lost as well.

The consensus of opinion was that the special trains which the C.N.R. propose in lieu of the regular freights are no good as a service to the domestic market. Shippers have to know exactly what time the train will run and particularly in the potato game, an irregular schedule of freight service will have a decided adverse effect on the producer.

Speaking for the livestock shippers, Mr. J. Don Campbell, said that under the proposed arrangement to load the livestock on at the stations nor any facilities to house them overnight. Such a proposed curtailment of freight trains on regular runs, he said, will seriously affect the economy of this province.

Others who were present and indicated complete agreement with the resolution were, Reuben Large, president of the Potato Producers Association, Elric Campbell, manager of the Potato Producers Association and William MacLennan, president of the Marketing Board.

Mr. John Wright said last evening that following the meeting he had called Mr. Hayes in Moncton and made arrangements for the committee to meet him on Monday April 23rd at 2.00 p.m.

Would Have Canadians Stress Their Ownership Of Arctic

TORONTO (CP) — Governor-General Vincent Massey said Wednesday night Canadians should remind themselves "and others" that the Canadian north belongs to Canada.

In an address to the annual banquet meeting of The Canadian Press, Mr. Massey told of the historic tour of the Arctic he recently completed and declared: "I shall keep the romantic vision which I think most of us have when we enter the Arctic, for it is a land strange and mysterious, with a beauty and overwhelming solitude."

Mr. Massey became the first governor-general to fly over the North Pole on his 17-day, 10,000-mile tour which included visits to the Lewis and Clark monument in the United States.

"To most of us, the Arctic seemed until recent years almost a no-man's land," Mr. Massey told the 230 guests, including Premier Lester B. Pearson, at the CP banquet. "All these conceptions are changing. First, we are learning to think of our north as Canadian, just as Canadian as the east or the west or the south."

"It is important to remind ourselves and others that this is so. What we call 'the north' is over one-third of Canada"

Text of Mr. Massey's banquet address was released in advance of delivery.

The governor-general was introduced by D. B. Rogers, editor of the Regina Leader-Post and newly-elected president of The Canadian Press, and the vice-regal representative was thanked by Emile Castonguay of L'Action Catholique, Quebec, president of the Canadian Daily Newspaper Publishers Association.

In whimsical vein, Mr. Massey said his only experience with newspaper work was as a youth on two ill-fated college papers.

"But mine is really a reporting job all the same," added the governor-general, who has travelled more than 100,000 miles since taking office four years ago.

"It is my privilege . . . to learn what I can of the facts about our national life, and to report them as opportunity offers."

Canada's 10,000 Eskimos, are held in "respect and affection" by those who know them.

In general notes, the governor-general noted "The Eskimo is reliable, intelligent, good-humored, self-respecting and proud of his race"

Urged To Relax Loan Policies Industrial Development Bank

OTTAWA (CP) — Finance Minister Harris was urged Wednesday to relax lending policies of the government's industrial development bank to provide larger loans at lower interest rates to medium-sized companies.

The Professional Association of Industrialists, in a 3,000-word brief to the minister, said companies frequently find it difficult and expensive to get loans from the bank which required "too much security."

The association, made up mostly of Quebec's French-speaking industrialists, suggested also that the bank should become an industrial discounting institution, buying company bonds secured on general credit. In most cases, the bank requires mortgages as security.

Though interest charges and loans ceilings by the federal bank are not fixed by statute, the bank currently charges about six per cent for loans which range up to \$1,000,000 or more. Maximum term usually is about 10 years or so.

The association's brief, presented by Lt.-Col. Herve Barbeau of Levis, Que., said the bank's interest rate is about one-half per cent higher than normal commercial rates. The charge should be lowered.

"In the case of new establishments, the bank should grant higher loans than at present. The bank thus would be helping Canada to reduce the amount of foreign capital she now is seeking to develop new industries."

To reduce lending costs to companies, the bank should absorb all professional fees over one per cent of the loan when the amount of the loan is less than \$100,000.
