

Sex Survey Results

Welcome back to the Panther Prints Annual Sexuality Survey.

The results of the survey are compiled by the staff and volunteers of the Panther Prints. While we try to be accurate, the numbers given below may not be 100% correct. Unlike most stats we cannot guarantee that the results will be correct 19 times out of 20.

1. Let's introduce the players in this years survey:

	Male	Female
First year	36%	45%
Second	20%	34%
Third	24%	10%
Fourth	28%	10%
Fifth	4%	0%
Not Sure	12%	

All the women were sure what year they were in.

2. Most of the respondents were from the Arts Faculty, although we did have a couple of Holland College students answer the survey.

4. While 17% of males in the survey called themselves gay, only 7% of the women were lesbian.

5. When asked about sexual experience with people who are gay, lesbian or bi-sexual only two men and two women claimed such encounters.

6. Fantasy...16% of males and 29% of the females had fantasized about someone of the same sex.

7. No one who took part in the survey felt themselves to be a person on transgender tendencies.

8. Has anyone accidentally hit on a transgender, well as one respondent put it..."not that I know of."

9. The big question...have you ever had sexual intercourse

91% of all males have lost their virginity and 88% of all females have taken the plunge.

10. Most people knew the definition of **virginity**, a person who has not had sexual intercourse. The best response was "me".

11. Of the respondents who were virgins all but one had participated in **heavy petting** at some point in time.

12. Why are they still virgins...A lot of people said they hadn't found the right person or it was against their religious beliefs. One poor guy said it was because no one would have sex with him.

13. **Doing it by yourself**.....Masturbation...86% of all males masturbate, 56% of all females masturbate but remarkably 7% of males and 12% of females either don't know what masturbation is, or they weren't sure if they had ever done it.

14. Instead of boring numbers about how often its done, here are the best answers to "Where do you prefer to masturbate?" "Every third email" "Depends on how tired I am" "**Once every three months**" "a lot" "two times a year" The staff would like to know, the people who masturbate twice a year or once every three months do you mark that on the calendar? "Oh look, its February 18th time to masturbate. Just curious.

15. Where do you like to do it...in the shower or in your bedroom. Most original answer... "computer room in Main. P.S. a mouse comes in handy."

16. Everyone had received **oral sex** except for the two poor souls didn't know if they had or not.

17. Once again almost everyone had preformed oral sex...all except for one guy and one girl **wasn't sure if she had or not.**

18. Sexiest part of the body...in order of votes received

Males thought	W o m e n
breast	thought
ass	eyes
eyes	hands
legs	back
face	stomach
	chest

19. **What is pornography**....Well, it seems to be anything you want it to be. Some people defined it as great, others as exploitative and unnecessary. Most felt it was graphic pictures of naked people.

20. Do we object to porn. Most men didn't object, but the women were tied. Half did and half didn't object to porn.

21. **We like to watch**....13% of females claim to be voyeurs and 34% of males did as well.

22. Most people had not had phone sex and for those that had, most did not initiate it. Only two males and one female had paid for the privilege of having sex over a telephone.

25. Even in this age of technology and the **internet** only five people of each sex have had cyber sex. Oddly enough only one female initiated it but no males did.

27. Are UPEI student into S/M activities? It would appear so. Just over 50% of women have participated in S/M but only 40% of men have.

28. What kind of toys do we take to bed? scarves, knives, bungee cords, vibratos, Halls (yes, the cough suppressent),

poppy/fizzy candy, oils and whipped cream.

29. 60% off the males who responded to the survey are circumcised. One poor guy didn't know.

30. **Would they make it bigger?** Well, one male doesn't see any need for enlargement, one said maybe and all other respondents said NO! they would not get their penis enlarged.

31. 66% of all the females who responded to the survey would not consider getting their breasts enlarged. 17% would and 17% weren't sure or didn't understand the question.

32. 100% of the female respondents had never solicited a **prostitute**. But, 21% off all the males who responded had been with a prostitute.

33. **You've been with how many people!** One male in the survey had been with somewhere between 19 and 31 women, he couldn't remember. For the most part though most people, males and females had had three sexual partners. Although there was a large number of males who fit into the 10-20 partners category. (Makes you wonder who they are having sex with if the women haven't had that many partners.)

34. **How often does the earth move?** Well apparently most sexually active respondents felt that they weren't having sex enough. The numbers went anywhere from once a month to once a day. One ambitious person has sex 80 times a month. They counted!

35. **Do you wear rain gear?** The condom or combination of condom and pill seems to be the method of birth control used by most people in the survey.

One smart guy seems to think the withdrawal method is the best.

36. Only four men have ever **faked** an orgasm, but over 75% of females had.

37. If the respondent had a one night stand they were likely to both brag and be regretful at the same time. As one woman put it "I can't feel bad about it, I wanted to do it in the first place."

38. In throught the back door....Only four women have had anal sex but about 60% of males had tried it at least once. Most did not want to try it again.

39. It would appear that everyone enjoys foreplay. Most respondents felt that foreplay was preferable to actual intercourse. Everyone also likes to smoke after sex. Believe it or not the favourite response to what people do after sex is smoke.

41. About 50% of males and females have had sex with women on their period or while they themselves were on their period.

43. Best response in describing sex: Sex feels Good!

44. It depends on who you are with in determining if people make love or have sex and yes, they do know the difference.

Bonus Section:
Due to a lack of space for now this is the strangest place to have sex: "Probably in an airplane. (Small plane while friend flew.) My boyfriend is a pilot."

And the worst experience someone had was with a guy from Summerside.
