SUB KILLER — Framed by its Lancaster predecessor, a P2V Neptune stands poised on the runway

at RCAF Station Summerside. A number of these modern anti-submarine aircraft are expected at RCAF Station Summerside next week to complement the Lancasters presently in use at the station. The Neptune, the most modern anti-submarine aircraft in use today is gradually replacing the Lancaster for maritime work throughout the RCAF.

Courier Injured In Hitching Up Box Sleigh

Mr. Donald MacPherson, Dartington, farmer and rural mail courier, underwent an emergency operation at the P. E. I. Hospital yesterday, the result of injuries he sustained the day before at his farm.

Mr. MacPherson had apparently been in the process of hitching his horse to the sleigh when he slipped upon a patch of ice and fell across the box of the sleigh. Unable to help himself back to his feet, his cries for help attracted some school children. The children summoned aid and Mr. MacPherson was taken to North Wiltshire.

From there he was rushed to Hunter River on the C.N.R. sectionmen's motor trolley. He was given emergency treatment by Dr. Murchison and later placed aboard a freight train bound for Charlottetown.

When first admitted to the hospital it was thought that his injuries were not too serious, but yesterday afternoon it became evident that Mr. MacPherson was suffering from internal hemorrhage.

Following the operation it was reported that the patient was resting comfortably.

Destroyer On Rescue Call

HALIFAX, (CP)—The Canadian destroyer Nootka is racing to aid the explosion-damaged freighter Antonios in the Atlantic 230 miles northwest of Bermuda, the navy reported Thursday night.

The Antonios, believed to be a 7,200-ton ship of Liberian registry, reported an explosion in her forepeak stores compartment.

She was not believed in danger, however. No injuries to crew members were reported. The navy said her captain asked for a ship to stand by.

The Nootka, commanded by Lt. Cmdr. E.M. Chadwick of Halifax, was 150 miles east of the Antonios when she received the call for help.

The trib-class destroyer is expected to reach the stricken freighter about 2 a.m. AST today.

The warship, on a training exercise in Bermuda waters, had been due in Halifax Saturday.

Trinity W. A. Cake Sale at Holman's this afternoon.

Dance St. Peters Bay, Holy Name Hall tonight, Burns Orchestra.

Regular Saturday night dance, St. Peters Bay Hall, Messers, Orchestra.

See "Molly Darling" St. Mary's Hall, Souris, Wednesday, April 18, 8:30.

Come to the play "It's An Irishmans Dream", put on by Souris players at Morell Community Hall, April 18, dance after.

Hockey North River rink to-night. Final game between Cornwall and Hampshire for R.R. Bell Trophy. Game time 8:30. Skate after.

Showing at Mt. Stewart Friday and Saturday—"So This Is Paris"—Technicolor musical comedy, depicting the adventure of three sailors on leave in Paris.

New Neptune Sub-Killers For R.C.N. At Summerside

RCAF Station Summerside has announced that a number of P2V Neptune aircraft are expected to arrive at the airport next week, and be permanently based there. The Neptunes will complement the Lancasters presently in use and will be used by Number Two Maritime Operational Training Unit in their training program.

The arrival of the Neptunes, the most advanced anti-submarine aircraft in use today, will introduce several changes in the training programme carried out at the local station, though its function, the training of crews for maritime reconnaissance work, will remain the same.

Accompanying the arrival of the new sub-killers will be an increase in the number of personnel on staff at the air station. The strength increase is necessitated by the overall increase in aircraft strength and the greater maintenance problems raised by the highly complicated anti-submarine that is carried in the Neptune. This increase will

partially offset the departure of the RCN Avenger Squadron. The new personnel are expected to arrive at varying intervals during the next few months.

Similar Neptunes are presently in use by the Royal Canadian Air Force at RCAF Station Greenwood, by the USAF, RAF and several other NATO countries.

The twin engine patrol bomber is roughly the size of a Lancaster but incorporates technical developments that are required for efficient execution of Maritime warfare. One of its Wright turbo-compound engines alone will develop more horsepower than two of the Merlin power plants used by the World War II Lancaster. Accompanying the boat in external power is the most up to date equipment available for war against an undersea killer.

Presently protected by a high security classification, the interior of the Neptune houses every device used by modern airforces in tracking, locating and killing submarines.

Norway Refuses To Sell Arms

OSLO, (AP)—Norway's Socialist government declared Thursday it will not sell arms to Israel or any other nation in the Middle East during the present tense situation there.

The statement was made in the wake of a campaign by some sections of the press for sale of 33 obsolete Vampire jet fighters to Israel for about \$430,000.

Escaped Jail Prisoner Found

MONCTON, (CP)—Francis Gauthier of Moncton, sought for two weeks following a break from the Dorchester jail during a Good Friday storm, was found Thursday living here under an assumed name, police said.

Gauthier was arrested in a rooming house where he had been living for three days under the name of George Warren. He said he was an ill employee of a local meat processing firm.

Gauthier appeared in court briefly Thursday and was remanded to Monday.

Still Hope War Can Be Headed Off In Mideast

Labrador On New Mission

OTTAWA, (CP)—Her rescue mission to Greenland cut short, the navy's Arctic patrol vessel Labrador was headed south Thursday on another.

The navy said the 6,500-ton ship has been ordered to Pictou, N.S. to free the coastal escort HMCS Wallaceburg, ice-bound in Pictou harbor.

The Wallaceburg, which has just completed a refit at Pictou, has been prevented from leaving harbor by heavy ice outside. The Labrador, scheduled to arrive there today, will attempt to cut a path to open water in the vicinity of Cabot strait.

The Labrador was northbound for Greenland to free nine Norwegian sealing ships trapped in ice when word reached her that the vessels had gained open water safely.

UNANIMOUS RESOLUTION

Southport Wants Road Brought Closer To Village

A request that the Trans. Canada Highway be brought nearer to the village of Southport than the route now being considered was contained in a resolution passed unanimously at a largely attended meeting of the people of the District held in Southport School last night. Mr. Roland MacDonald presided.

The resolution pointed out that the highway should be of the most benefit to the largest number of people possible. A three-man delegation consisting of Roland MacDonald (chairman) Dr. R.D. MacDonald and Athol Roberts was named to wait on the Minister of Highways at the earliest possible date to see if the proposed route could be changed.

Hon. Eugene Cullen who represents the district in the Provincial Cabinet was present at the meeting and spoke briefly. He said that when the Trans. Canada route was being considered last fall, great concern was expressed by the people of Cross Roads, Pownal, etc., but not one word was heard from the people of Southport at that time.

Some time later a delegation from Southport waited on the Minister, "and as far as I can judge the proposed route is going pretty near what the people asked for," said Mr. Cullen.

Mr. Cullen said he agreed that it would be nice to have the road

as close to the village as possible and assured those present that the extra cost involved in making the road a little longer was not the main factor taken into consideration by the Federal Government.

He said the tourist industry was important but the freight being hauled over the TCH was also a very important matter. Mr. Cullen explained that the main thing taken into consideration was to build the road with the shortest distance

Police Seek Hit And Run Car After Two Accidents

Two cases of hit and run occurred yesterday evening, in both cases the same car was the hit and run vehicle. The first took place near the corner of Euston and Great George Streets when a car proceeding east on Euston was sideswiped by the car which failed to stop.

The second occurred at the corner of Prince and Fitzroy Streets when the same hit and run vehicle struck a car going south on Prince.

At a late hour last night City Police had not yet located the car or operator, although the number of the car was known to them.

Minor damage resulted to the two vehicles that were struck.

Grave View Taken Of Air Incident

JERUSALEM, (AP)—Israeli and Egyptian jet planes battled Thursday high over the Holy Land.

Israel claimed one and possibly two enemy planes shot down.

One Egyptian jet crashed 20 miles inside Israel, an Israeli military spokesman said. The pilot, Mohammed Latif, was quoted as saying his plane was on a patrol mission. He was taken to a hospital with head and leg injuries.

A search was organized in Israel's southern desert for a second Egyptian plane reported hit. Israelis close to the border said they saw four Egyptian planes fly north and only two return.

FIGHT OVER DESERT

The dogfight raged over Israel's Negev desert. Both countries had just promised to forego force except in self-defence. The pledges were made to Secretary-General Dag Hammarskjöld of the United Nations in Cairo on his mission for peace in the Middle East.

Despite the air battle, reports from Cairo said hopes for Hammarskjöld's mission brightened a bit.

The semi-official Egyptian news agency reported Israel had agreed in principle to pull back forces from the frontier by 500 metres (slightly less than a third of a mile).

This was one prime point proposed by the UN Security Council last week when it asked Hammarskjöld to undertake the mission.

Israel said two of its fighters intercepted four Egyptian planes and shot down a British-made

QUEENS MEMBER SPEAKS

Regrets Budget Omitted Potatoes, Fish Reference

OTTAWA, (CP)—Angus MacLean Progressive Conservative member for Queens said he regrets the budget had nothing to say about tariff problems of two important Maritime products—potatoes and processed fish sticks.

He had hoped for assurance of an adjustment in tariffs to provide more equity between United States and Canadian potato growers, he said Thursday in the budget debate. Processed fish sticks had been expected to bring great benefit to the fishing industry but a high U.S. tariff had wiped out much of that benefit.

There had been no satisfactory recognition of present Maritime problems. The Atlantic provinces had entered Confederation on the assumption all provinces would be equal. Now they found this was only a theory.

There had been no satisfactory recognition of present Maritime problems. The Atlantic provinces had entered Confederation on the assumption all provinces would be equal. Now they found this was only a theory.

There had been no satisfactory recognition of present Maritime problems. The Atlantic provinces had entered Confederation on the assumption all provinces would be equal. Now they found this was only a theory.

"Instead they find they are the little fellows, off at the far end of the Canadian table," Mr. MacLean said. "When the platter gets to them they find the best has been well picked over, if not removed entirely."

One example of the Maritimes' lessening importance in national affairs had been the dwindling of its Commons representation to 26 members out of 265 from 34 seats out of 181 at the time of Confederation.

EVOKES LAUGHTER

One of the few bursts of laughter in a dull week-long Budget debate was evoked in the Commons by Mr. MacLean when criticizing the principle of Federal Government "matching grants".
