By looking at the quotations of the Virginia tobacco markets, it will be found that the highest price paid for fillers—which is the tobacco which forms the body of the plug—very closely corresponds with the increased price of tobacco leaf imported into Ontario. As over four-fifths of all the leaf imported into the province is for "Myrtle Navy" stock, this fact is official proof of the claim that this "Myrtle Navy" is made of the finest Virginia leaf.

AVOID Ammonia Baking Powder, AND USE ONLY WOODILL'S GERMAN BAKING POWDER.

of which W. F. Bess, Dominion Analyst, St. John, N. B., in his report, Aug. 11th, 1884, says:— Fresh and Pure; same composition as usual.

BUT F. L. BARTLETT, State Chemist of Maine, says of a Baking Powder (sold only in tins) new being pushed into this city:— It contains one ingredient that should not enter into the composition of any Baking Powder, namely, Carbonate of Ammonia, (A POISONOUS CHEMICAL.) This is a strong Alkali, unfit for human consumption, and I am surprised that this chemical should be used when it is so well known to be injurious to health, in anything used for food. Ask your grocer for WOODILL'S GERMAN BAKING POWDER, in paper or in tins 8 cents; quarter and half pounds. June 26th, 1885.—1yr dly wklly
