

That Calf.

BY PHOENIX CAREY.

To the yard by the barn came the farmer one morn'g, And calling the cattle, he said, "Now while they trembled with fright, "Now which of you last night Shut the barn door while I was a-bed?" Each one of them all shook his head.

Now the little calf, Spot, she was down in the lot, And the way the rest talked was a shame; For no one, night before, saw her shut up the door, But they say she did all the same, For they always made her take the blame.

Said the horse (dapple gray) "I was not up that way Last night, as I now recollect;" And the bull passing by, tossed his horns very high, And said, "Let who may here object: I say 'tis that calf I suspect!"

Then out spoke the cow: "It is terrible now To accuse honest folks of such tricks." Said the cook in the tree, "I'm sure 'twasn't me;" And the sheep all cried "Bah!" (there were six), Now that calf's got herself in a fix!"

"Why of course we all know 'twas the wrong thing to do," Said the chickens. "Of course," said the cat. "I suppose," said the mule, "some folks think me a fool, But I'm not quite so simple as that; But the calf never knows what she's at."

Just that moment the calf, who was always the laugh, And the just of the yard, came in sight. "Did you shut my barn-door?" asked the farmer once more. "I did, sir; I closed it last night," Said the calf, "and I thought that was right."

Then each one shook his head, "She'll catch it," they said; "Serve her right, for her meddling way!" Said the farmer, "Come here, little Bossy, my dear!" You have done what I cannot repay, And your fortune is made from to-day.

"For a wonder last night I forgot the door quite: And if you had not shut it in so neat, All my colts had slipped in, and gone right to the hip, And got what they ought not to eat— They'd have foundered themselves on wheat!"

Then each hoof of them began loudly to bawl; The very mule smiled; the cock crew; "Little spotty, my dear, you're a favorite here," They cried, "we all said it was you, We were so glad to give you your due!" And that calf answered knowingly "Boo!"

Annexation.

There is talk of the annexation of the Sandwich Islands to the United States. It is probably premature, but when it does come to annexing to some great power, the United States will have the first chance. The United States has already annexed the commerce of the islands as it is now proposed we should annex that of Jamaica. It has done so at the expense of thousands of dollars annually from sugar duties which go into the pocket of an enterprising sugar boiler who was naturally solicitous for the reciprocity treaty. The Sandwich Islanders also owe to the Americans the priceless boon of a Court with gorgeous ceremonies and uniforms, including a vast golden crown. It is true that at the coronation His Majesty crowned himself in a somewhat absurd manner, by taking up the great diadem by the top knob of it and lowering it gently upon his royal head, but the American Grand Chamberlain-in-waiting, the Lord of His Majesty's buck-hounds—a native of Massachusetts—was not to blame for this inelegant method. The versatility, the stern sons of the Puritans displayed in arranging gorgeous State ceremonies, with the aid of a court guide, was astonishing, and quiet sufficient to win the undying gratitude of the Islanders.

New and Original Departure in Coal Cooking Stoves COMBINING DURABILITY, HEAT AND ECONOMY.

This Cut represents my Patent Fire King Cooking Stove, with the oven, and lining partially drawn out, as it appears while being cleaned, or when a new lining is being replaced.

The above Stove I invented and patented in 1876, and at the present time HUNDREDS ARE IN USE, giving perfect satisfaction. A large number have been in constant use for eight years, and the repairs have been very trifling, in many instances none have been required. This valuable experience should be sufficient evidence of their durability, which is accounted for in the following:—It has, instead of a Lined Fire Box, two heavy Curved Cylinders, which obviate the expense connected with all Square Cooking Stoves of being compelled to renew Linings and Grates, at least once or twice every year. The heat being radiated from the Cylinders to all kinds of ordinary Coal Cooking Stoves. The Cylinders are situated directly under the cover holes, and a fire may be made in one or both, thus adapting it for use either in winter or summer, with equal satisfaction, besides effecting a great saving to fuel. I have also attached the PATENT TELESCOPE OVEN to all my Elevated Oven Wood Stoves, such as the Waterloo, Niagara, Star, &c. causing the thousands using them to exclaim—My Stoves are worth TEN DOLLARS MORE than the same kind made by other founders. The trade and retail purchasers will please bear in mind the fact that although a great advantage is claimed for my own Oven above all others, they cost no more, and being the sole manufacturer and patentee, no other factory can supply. Enquire for Fawcett's Patent Telescope Oven, and if your dealer has none on hand send direct to the Sackville Stove Foundry.

I am adding several new and handsome Patterns this season, which, with my former large variety of One Hundred Different Patterns and Sizes of Cooking, Parlor, Office and Hall Stoves, also Farmers Boilers, Hollowware, Ploughs, Stove Pipes and Tinware, comprise the most complete assortment offered by any manufacturer in the Lower Provinces. Terms and prices will be found as favorable as can be obtained elsewhere.
