

What is the Miracle of Canada?

The miracle of Canada is the reward of its thrifty people; it is a standard of living wrought by men and women who believe in spending and saving wisely. The average Canadian, for example, owns his own car and his own home. He pays his bills when due. His pattern of living is excellent.

When the pattern breaks
But unexpected emergencies do break the pattern. Usually the emergency requires more money than he has available. This can happen to anyone. Then help must come from a dependable outside service.

3 out of 4 choose Household
HFC feels that no one should borrow unless a loan is the best solution to a money problem. Because HFC service is friendly, dependable, 3 out of 4 Canadian families prefer to borrow in amounts of \$50 to \$1000 from HOUSEHOLD FINANCE. Your telephone book lists the office nearest you.

PARKDALE CONCERT opens this Wednesday. Tickets at Hughes Drug Co., and Old Spain.

HUNTER RIVER Beauty Salon closing for holidays on or about November 1st. Phone 13 for appointment.

AGENTS WANTED. — Applications will be received at this office up to October 31st, for agents in areas where we have no representatives. Signed P. E. I. Potato Growers' Association.

SAD NEWS RECEIVED. — Mrs. Fannie J. Fought, 27 King Square, City, received the sad news yesterday morning of the death in Allston, Mass., of her sister, Mrs. George Stevens (nee Josephine Monahan), formerly of this city.

CITY POLICE COURT — A man charged with the theft of an automobile before the Stipendiary Magistrate yesterday morning pleaded guilty and was remanded to jail today for sentence. Failure to stop at a red traffic light signal cost a man \$5 and costs of ten days, and in cases of four men charged with being drunk and incapable, one was sentenced to 20 days in jail, the other three being fined \$10 and costs of 20 days.

PERSONALS
Mr. John Colwill accompanied by Mr. and Mrs. Stanley Colwill and Mr. and Mrs. Myron Holmes, Kingston, spent Sunday in N. S.

Mr. and Mrs. Lyman Newson and Mr. and Mrs. Everett Holmes and little Judy and Miriam Holmes were recent visitors to Free-town.

The family of the late Erwin Ramsay wish to thank those who were so kind during their recent bereavement. Also those who sent floral tributes and messages of sympathy.

COVEHEAD W. M. S.
The W. M. S. held their monthly meeting at the home of Mrs. Grove MacMillan on October 8th with seven members and five visitors present. The president, Mrs. Leith MacKinnon took charge of the program, the theme being "The Church in the Midst of the Storm" and opened with a call to worship followed by hymn "What a Friend". Mrs. Dave MacDonald read the scripture, Ephesians 4th chapter, verses 1-7. Three prayers from the monthly were read in unison and Mrs. Orr MacCann read a poem. Miss Doris Brown and Mrs. Grove MacMillan gave a reading entitled "Canadagrams", and Mrs. Leith MacKinnon read a poem, "The Country Church Speaks". The roll was answered and the minutes read and approved. Next roll call to be answered with a verse containing the word "Glorify". Mrs. Albert Reed kindly invited the members to her home for the next meeting. The collection amounted to \$27.00. The meeting closed by repeating the Lord's Prayer in unison. A dainty lunch was served by the hostess, and a social hour was enjoyed.

IN MEMORIAM
MRS. MICHAEL GILLIS
—A feeling of sadness prevailed throughout the community of Ellerslie when it became known that Mrs. Michael Gillis (the former Martha Jane Barlow, daughter of the late Mr. and Mrs. John Barlow) an esteemed resident of that place had passed away on Oct. 12th, 1951, at the advanced age of 81 years.

Although in poor health for the past few years she will be greatly missed both in the home and community. She leaves to mourn her loss five sons and three daughters, Harold, with whom she lived; Theodore, Ellerslie; Elsworth, Ellerslie; Thomas, New Hampshire, U. S. A.; Walter, Brookaby, Saskatchewan; Estella, (Mrs. A. E. Ross), Ellerslie; Edith, (Mrs. George Barlow), Stanley Bridge, and Ethel, (Mrs. J. E. Inglis), Kensington.

The funeral service at the home and grave were conducted by Rev. John T. Waldron, Wellington, assisted by L. A. Dignan, Port Hill. The hymns sung were, "Safe in The Arms of Jesus," "Forever With The Lord," "Peace, Perfect Peace," and "The Sands of Time are Sinking". A solo, "Alone" was beautifully sung by Mr. Roy Phillips.

The remains were laid to rest in the Bideford United Church Cemetery. The pall-bearers were, Messrs. E. S. Bureleigh, L. A. Bureleigh, George Barlow, Roy Williams, Ernest MacNeven and Peter MacCaul.

Floral offerings were:— Pillow: The Family Cross: The Gillis and Ross grandchildren
Wreath: The great grandchildren: Spray: Walter, Nellie and family
Crepent: Edith, Myrtle, Albert, Allison, Gerald and Ella
Wreath: Dell, Claude, Elwood, Gladys and family
Wreath: Lorne and Marion
Wreath: Mona, Frank, Rita, Howard, Kay and Harry
Wreath: Theolma, Erskine, Arnold, Ruby and Raymond
Wreath: Margaret and Edmund
Wreath: William Bureleigh
Wreath: Major, John, Jim, Dick and Arlene, Leonard and Emily, Gloria and Elmer
Spray: Lem and Pearl, Pauline and James
Spray: Mary and George
Spray: Emily Ogden
Spray: Bessie, Earl, Ruth, Mary and Andy
Spray: Ruth, Flo, Arlene and Freddie
Spray: Sadie
Spray: Claudie, Frank and family
Basket of Flowers: Lucy and Alfred
Basket of flowers: Bertha and Mrs. Williams.

Leading Figures In U. K. Election

Clement R. ATTLEE Prime Minister
(By The Canadian Press)
Clement Richard Attlee, Britain's Labor Prime Minister, hides an iron will and tough determination behind his deceptively mild, self-effacing manner.

The 68-year-old Prime Minister conducted a whirlwind campaign in the 10 days before the general election, October 25, making 53 speeches in an effort to keep his party in power.

Mr. Attlee has led a social revolution in Britain in the six years of his premiership without once raising his voice. He excels behind the scenes and has never reconciled himself to the enforced limelight of high office. But every phase of the post-war years bears the stamp of his determination.

Throughout his terms of power "Clem" has held clear ascendancy over the contending forces in the cabinet and maintained his viewpoints even when it meant a split with powerful sections such as Aneurin Bevan and his left-wing supporters.

He had stood up to the grueling post-war years better than any member of his team. He is able to shut his mind to a subject immediately after disposing of it. Labor leaders say he can go straight from foreign policy to an economic crisis, from a battle in Parliament to jigsaw puzzles with his family, without turning a hair.

Mr. Attlee was ill in March this year. But after a month's rest and diet for duodenal ulcer—he even had to give up his beloved pipe—he was back on the job and was passed "A1" physically at the beginning of the election campaign.

A Clashing Team
He took over the direction of Labor's clashing team of frontliners in 1945 after five years as Winston Churchill's first lieutenant in the wartime Coalition Government.

The shy party leader—the Socialist chose him as their chief in 1935 only because no one else was acceptable to all sections—surprised them all, and kept surprising them.

He emerged as a leader with an unbending will and decision. He became the strictest disciplinarian the party ever had.

Mr. Attlee's personal popularity in the country rose strongly at the end of last year when he flew suddenly to Washington for a dramatic man-to-man talk with President Truman after Allied armies crossed the 38th Parallel in Korea. His great strength is that while he may not command such deep sectional loyalties he is accepted by the movement as a whole.

Mr. Attlee has represented London's Limehouse division since 1922.

A lawyer, he was born in London and went to Oxford University. He was nearly 40 when he married. There are three daughters and a son.

ROULO BAY EAST SCHOOL
Following is the report for August and September.

Grade VIII — 1. Velma Burke. 2. Anna Chaisson.

Grade VII — 1. Isobel Chaisson and Everett Chaisson. 2. Flora Peters. 3. Roma MacDonald and Ronelda Burke.

Grade VI — 1. Mary Anne Chaisson.

Grade V — 1. Donald Burke. Grade IV — 1. Gerald Chaisson. 2. Elbert MacEwen. 3. Charles Peters and Clifford MacDonald.

Grade III — 1. Edith Burke. 2. James Chaisson.

Grade II A — 1. Fred Peters. Grade II B — 1. Bernice Perry. 2. Eleanor Perry.

Grade I A — 1. Alice Anne Chaisson. Grade I B — 1. Elizabeth Chaisson. 2. Margaret Burke. Grade I C — 1. Lemuel Chaisson. 2. Joseph Perry. 3. Angus Peters.

Teacher — Mary Kays.

Card Of Thanks
The family of the late Mrs. Michael Gillis wish to express their sincere thanks to Dr. Reid and the clergymen, to those who sent floral offerings, cards of sympathy and helped in any way in their recent bereavement.

IN MEMORIAM
In memory of **WILLIAM MacNAUGHTON** who departed this life October 23rd, 1945.
Lovingly Remembered by Wife and Family.

Strange But True
By F. H. MacArthur
Recent investigations reveal that the effect of penicillin against a particular germ is determined by the length of time the drug remains in the blood in concentrations effective against the germ. However, there is an interval following the disappearance of penicillin, or its reduction in the blood, during which germs do not grow. As the germs recover from the toxic effects of penicillin, their virulence slowly returns. During the period of decreased virulence, organisms are susceptible to the defense mechanism of the patient's body. "There is reason to believe," said one medical authority, "that fewer germs are destroyed during this penicillin-free period than during the penicillin's active period."

How a good title rejuvenated a book that fell dead from the press may be seen in the following case. In 1850 Dr. O. M. Mitchell, director of the Astronomical Observatory in Cincinnati, wrote a book entitled, "The Planetary and Stellar Worlds." It was a flop—that is, it didn't sell a single copy until its publishers gave it this name "The Orbs of Heaven." Under the new title 6000 copies sold in a month.

Insurance statistics indicate that obesity is the most frequent cause of physical defects in this country. About 28 percent of all adults are 10 percent or more overweight. The figures show that the greatest life expectancy occurs in people who are slightly overweight until they are 30, of average weight from 30 to 40, and distinctly underweight in the subsequent years. Between the ages of 45 to 50, a mere 10 percent of excess weight increases the normal death rate by 8 percent; 20 pounds raises the figure to 18 percent; 30 pounds to 27 percent, increase 40 pounds to 45 percent increase, etc. Moreover, obesity exerts a definite adverse influence on heart, kidneys, high blood pressure, as well as many other ailments that human flesh is heir to. Or putting it another way, many of us are slowly but surely eating ourselves to death.

Actually, in countries that suffered from shortened food supplies during the war, the health of the population increased measurably.

While we must all agree that the human body needs fuel to keep it functioning properly, we should also remember that quality of food rather than quantity should be our aim. For example, a 35 year old man of 150 lbs. requires about 1,600 calories every 24 hours while he is resting. When he becomes active, he needs approximately 2,400 calories. A farmer needs more food than a clerk, but should either of them eat more than he needs, excess fat will result and that's exactly what should not happen to us, especially after we've reached middle age.

A new peach that ripens early and is of excellent quality has recently been developed at the Experimental Station, Summerland, British Columbia. It bears the name of Solo and officials say that its firmness should reduce wastage in the orchard, in the packing house and in the canner.

Forty high school students of Northwestern Ontario recently planted 5000 young trees on a wood lot donated by a paper company for the special class in forestry. A similar program might be successfully carried out in this province as we have many acres of worn out land which could be turned into valuable timber tracts.

According to Dr. R. A. Macintosh of the Ontario Veterinary College, Canada has the healthiest cattle in the world.

The Baker family who farm 300 acres in Ontario, haven't had an accident for three generations. The fine record has not been achieved by mere chance. No siree! It is the result of leaving nothing to chance. It always pays to take time to think!

To put it another way, most accidents can be checked up to downright carelessness.

SUBMERGED PEAK
A mountain rising from 9,500 feet below the Pacific Ocean level to 132 feet below the surface is charted 280 miles off the Columbia River.

Peaks rising 20,000 feet were discovered in the Antarctic by Richard Byrd in 1946-47.

ISLAND FOLK SCHOOL
Want to learn more about public speaking, the conduct of meetings, how to discuss without arguing, how to be an efficient chairman? Interested in understanding your community and its local problems? Your farm and newer methods of production? Would you like to know more about the real history and traditions of Prince Edward Island? Interested in developing better entertainments and recreation in your community—learn some new kinds of square dances, sing some old songs, and how to put on a play?

All this and more can be yours if you enrol in the first Island Folk School, to be given in an intensive 12 day course from November 12 to 24, at Winslow Hall. Men and women from 18 years of age are eligible. Accommodation for up to thirty persons will be available at Highfield Court Cabins.

Why not take 12 days from your routine work to learn something new? Enjoy the after-harvest season with a spell of informal schooling.

The course will be jointly sponsored by the Departments of Education and Agriculture, and has the support of the Women's Institutes, Federation of Agriculture and Co-operative organizations.

Cost of the course will be only \$35.00 for the twelve days and includes registration, tuition, room and board. Local organizations interested in training community leaders should assist students financially.

Register now for the course. Registration will be closed by November 7th. Write for details to:—
ADULT EDUCATION BRANCH, Prince Edward Island Libraries, Prince of Wales College, Charlottetown.

A similar program might be successfully carried out in this province as we have many acres of worn out land which could be turned into valuable timber tracts.

According to Dr. R. A. Macintosh of the Ontario Veterinary College, Canada has the healthiest cattle in the world.

The Baker family who farm 300 acres in Ontario, haven't had an accident for three generations. The fine record has not been achieved by mere chance. No siree! It is the result of leaving nothing to chance. It always pays to take time to think!

To put it another way, most accidents can be checked up to downright carelessness.

SUBMERGED PEAK
A mountain rising from 9,500 feet below the Pacific Ocean level to 132 feet below the surface is charted 280 miles off the Columbia River.

Peaks rising 20,000 feet were discovered in the Antarctic by Richard Byrd in 1946-47.

ISLAND FOLK SCHOOL
Want to learn more about public speaking, the conduct of meetings, how to discuss without arguing, how to be an efficient chairman? Interested in understanding your community and its local problems? Your farm and newer methods of production? Would you like to know more about the real history and traditions of Prince Edward Island? Interested in developing better entertainments and recreation in your community—learn some new kinds of square dances, sing some old songs, and how to put on a play?

All this and more can be yours if you enrol in the first Island Folk School, to be given in an intensive 12 day course from November 12 to 24, at Winslow Hall. Men and women from 18 years of age are eligible. Accommodation for up to thirty persons will be available at Highfield Court Cabins.

Why not take 12 days from your routine work to learn something new? Enjoy the after-harvest season with a spell of informal schooling.

The course will be jointly sponsored by the Departments of Education and Agriculture, and has the support of the Women's Institutes, Federation of Agriculture and Co-operative organizations.

Cost of the course will be only \$35.00 for the twelve days and includes registration, tuition, room and board. Local organizations interested in training community leaders should assist students financially.

Register now for the course. Registration will be closed by November 7th. Write for details to:—
ADULT EDUCATION BRANCH, Prince Edward Island Libraries, Prince of Wales College, Charlottetown.

Strange But True
By F. H. MacArthur
Recent investigations reveal that the effect of penicillin against a particular germ is determined by the length of time the drug remains in the blood in concentrations effective against the germ. However, there is an interval following the disappearance of penicillin, or its reduction in the blood, during which germs do not grow. As the germs recover from the toxic effects of penicillin, their virulence slowly returns. During the period of decreased virulence, organisms are susceptible to the defense mechanism of the patient's body. "There is reason to believe," said one medical authority, "that fewer germs are destroyed during this penicillin-free period than during the penicillin's active period."

How a good title rejuvenated a book that fell dead from the press may be seen in the following case. In 1850 Dr. O. M. Mitchell, director of the Astronomical Observatory in Cincinnati, wrote a book entitled, "The Planetary and Stellar Worlds." It was a flop—that is, it didn't sell a single copy until its publishers gave it this name "The Orbs of Heaven." Under the new title 6000 copies sold in a month.

Insurance statistics indicate that obesity is the most frequent cause of physical defects in this country. About 28 percent of all adults are 10 percent or more overweight. The figures show that the greatest life expectancy occurs in people who are slightly overweight until they are 30, of average weight from 30 to 40, and distinctly underweight in the subsequent years. Between the ages of 45 to 50, a mere 10 percent of excess weight increases the normal death rate by 8 percent; 20 pounds raises the figure to 18 percent; 30 pounds to 27 percent, increase 40 pounds to 45 percent increase, etc. Moreover, obesity exerts a definite adverse influence on heart, kidneys, high blood pressure, as well as many other ailments that human flesh is heir to. Or putting it another way, many of us are slowly but surely eating ourselves to death.

Actually, in countries that suffered from shortened food supplies during the war, the health of the population increased measurably.

While we must all agree that the human body needs fuel to keep it functioning properly, we should also remember that quality of food rather than quantity should
