THEY TALK TO ME OF OTHERS.

They talk to me of others,
As fair they say as thou;
With eyes as darkly glorious,
With such a god-like brow;
They speak of wealth and station—
'Tis all in vain to me;
For while they talk of others,
I think alone of thee.

They tell me time is fleeting,
And youth will soon be o'er;
They bid me seize the present,
And nurse the past no more;
They point to me the future—
"So lone as it must be"—
They know not that my spirit
Is linked for aye to thee.

They cannot, cannot move me;
My purpose is my own;
To outward eye it may be
I walk the world alone;
My inward world is peopled
With thought and feeling free;
And life can ne'er be lonely
While I may think of thee.

VARIETIES.

Ship Canal.—The important Ship Canal which is to unite Lake Superior with Lake Michigan, will soon be commenced. The surveys for its location have been completed, and the ground has been found quite as favourable for the easy and speedy construction of the work as was expected. Several routes have been surveyed, which will enable the legislature of Michigan and contractors to obtain a perfect understanding of the whole subject. The canal will be a fraction less than a mile in length. The law of Congress provides that the locks shall be at least 250 feet long, and 60 feet wide, and the Michigan legislature has power to enlarge the dimensions. When completed, this canal will enable steamers of the largest class to run from Buffalo to the head waters of the lake without any transhipments—an improvement that will quadruple the trade of this immense lake in less than two years.

United States Expedition to the Pacific.—The expedition fitting out by our Government for the Pacific will sail from Norfolk, Virginia, about the 1st of January next. This expedition will consist of, 1st. The sloop-of-war Vincennes, Commander Cadwalader Ringgold, with one hundred and seventy-five men. 2d. The steam propeller John Hancock, Lieutanant John Rodgers commanding, with sixty men. 4th. A tender, to be called "The Pilot," with about twenty men. Its objects, as we learn from a long article in the *National Intelligencer*, will be to survey portions of the China and Japan seas, the route between China and California, and the North Pacific Ocean in the region of Behring's Straits. It may probably also ascend the Sea of Tartary, to make some examinations needed for the advantageous prosecution of commercial enterprises in those comparatively unknown waters. Congress has appropriated $125,000 for the Expedition. Its preparation and equipment is most complete. In every particular, it will be thoroughly prepared for the work before it. The vessels will all be peculiarly adapted for it in their construction and equipment. All the late and well-established improvements in the machinery of steamers have been introduced into one of the vessels; and the boats have been constructed in the best manner, with special reference to the contemplated surveys. The most eminent medical skill in the service will be detailed and scientific men, in every department, will be selected, with reference to their high reputation and eminent suitableness for the duties in view. The crews also will consist alone of young, healthy vigorous, and efficient seamen, and their clothing and food have been particularly attended to. It will probably be the most complete expedition for scientific purposes which has ever been sent out by any government; and its progress will be watched with much interest. The command of the expedition has been given to Commander Cadwalader Ringgold, whose qualifications and character afford an ample guarantee that success will attend his efforts, and that his labours will prove worthy the admiration and gratitude of his countrymen. The Sandwich Islands will, for a time, be the principal rendezvous of the vessels of this Expedition; but it is not unlikely that its arrival at Japan will be so timed as to make it available in facilitating the efforts of Commodore Perry, whose fleet will tarry a considerable time in the vicinity of those Islands.

Maine Law in Washington.—A memorial is in circulation for signatures in Washington, to be presented to Congress, asking such an amendment of the city charter, as will empower the corporate authorities "to prohibit the manufacture and sale of intoxicating liquors, except for mechanical and medicinal purposes, within the limits of the corporation."

Oriental Visitors.—The Sultan has decided to be represented in the New York Crystal Palace, so that we shall be visited with a Turkish steamship, with government officers on board, who are desirous of visiting our institutions and establishments, and the cotton districts of the United States.

A Profitable Meadow.—A farmer in Canton, Massachusetts, has a cranberry meadow of twelve acres in extent, lying near Punkapong Pond, from which he has raked, the present season, upwards of one thousand bushels of fine cranberries, for which he has realized $3000 cash.

Royal Spectacles.—The *Rochester Union* has on its table the spectacles owned and worn by George III.

Astronomical Discovery.—The new monster telescope of the Rev. Mr. Craig, in England, has revealed the fact, that what was supposed to be Saturn's rings, *are not rings at all*, but, in reality, raches of the most perfect geometrical formation.

Patent Artificial Slate, and unchangeable Metallic Paints.

PROOF against FIRE and WATER. *Manufactured by the Patentee, in Colchester, Nova Scotia.* The ARTIFICIAL SLATE is the product of a mixture of mineral substances known to be the best non-conductors of heat as well as the most indestructible; the Chemical affinity of which converts the surface of materials covered, into a *Coating of Actual Slate—Proof* against FIRE and WATER. Thus the laws of nature are made to accomplish results as surprising as they are useful, by rendering Wooden fabrics as durable as brick or Stone, and less pervious to moisture, and consequently preventing decay and destruction from corroding influences hitherto supposed unattainable.

The principal ingredients are Alumina, Silica and the Oxides of Iron. The adhesive quality of the latter not only binds and attracts the particles together but the substance covered also. The longer exposed to the weather the more powerful the attraction, and consequently the harder the *Slate*. As various shades of colour are obtained, Brick buildings may be made impervious to moisture, and the fashionable colours of either *Free Stone* or *Granite*. The oil must be evaporated by the action of the weather before it is *Fire* proof, which will take from nine to twelve months.

The METALLIC PAINTS, *Purple* and *Red*, are offered as *Weather and Water Proof solely*. Their base being Iron, secures them from Galvanic action so fatal to lead and other Paints on *Iron* work—and their chemical combination makes it impossible, that any change should take place from atmospheric influence or the action of Salt Water and Sulphureted hydrogen so prevalent in Sea Ports and Tidal Harbours. They surpass all Paints yet discovered in *Cheapness and Durability*, which render them pre-eminently adapted to the covering of all kinds of Iron work, such as *Shipping, Mills, Bridges Steam Machinery, Railway Cars, and Iron Railing*. The METALLIC PAINTS have been analysed by Professor Hays of Boston. The following is an extract from his Certificate:—"As a permanent pigment, this mineral must rank with the most *indestructible and unchangeable* bases. For covering Metallic Ware, its composition shows that it is eminently fitted.

(Signed) AUGT. A. HAYS, *State Assayer.*"

Directions.—Artificial Slate. Mix the powder with pure Boiled Linseed Oil and a little Spirits Turpentine to the consistency of very thick Paint, and apply with a common Brush, being careful to keep the mixture well stirred while putting it on. One pound will cover ten square feet with two Coats.

If Shingleshave been on for years, it will be necessary to sweep off the moss and lint with a stiff broom; two or three coats of this material will make a perfect Slate Roof, proof against Fire and Water.

Fredericton, N. B., Nov. 13, 1850.

Mr. J. W. Irish. Dear Sir,—Please send us two more barrels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the Roofs covered with it did not catch at all, and when the walls were burnt some of the roofs came down in one piece, and others were the means of saving the building, especially one roof alongside of the Bank B. N. A., which also was one means of saving the Bank. Please see that it is on board of the first boat, as it might be neglected and stored.

Your obedient Servants,

STEWART & NEILL.

St. John, N. B., July 20, 1850:

John Ross, Esq., *Patentee of the Purple Metallic Iron Paint.*

Sir,—I have just painted a new Ship with your Metallic Iron Paint, and I have much pleasure in stating that I never painted a Ship with so small a quantity of Paint and Oil, and look so well. From its adhesive qualities and the manner it covers the wood, I have no doubt but it will be more durable and much cheaper than any other paint used for such purposes, and would recommend it to the public generally. Yours, &c.

ROBERT G. MORAN.

Ross' Metallic Paints.—We have already called public attention to the highest imation in which the Metallic Paints, manufactured by John Ross, Esq., Truro, are held by those who have had occasion to use them. Certificates of a highly satisfactory character in praise of these articles of Provincial manufacture appear elsewhere, in this issue, and from information afforded by parties who have similarly applied them, we can safely endorse the opinions therein contained.—*Halifax Sun.*

☞ The METALLIC PAINTS are mixed andput on like an ordinary paint.

JOHN ROSS, Patentee.

Wm. R. WATSON.

Reddin's New Building, Queen Street, }
June 7, 1852. }

TWELVETREES BROTHERS' SOAP POWDER

An entirely New Ivention—a packet of which is equal to ten pennyworth of Soap.

THE saving of Time and Labour is so astonishingly great, that a WEEK'S WASH can be accomplished BEFORE BREAKFAST,—no rubbing being required.

This wonderful article is MORE SERVICEABLE THAN SOAP, as it produces a better and much quicker lather, and is adapted for purposes, for which Soap cannot be safely or effectually used.

It will not injure the hands, or the most delicate material: but whilst it is incomparable for permanently whitening Linens, &c., after they have become discolored by age, or injured by bad Washing, it is also unsurpassable for improving the colors of FLANNELS, BLANKETS, WOOLLENS, COLORED PRINTS, MUSLINS, AND LACE.

This useful article has been tried on this Island, and can be confidently recommended.

Sold wholesale and retail by

TO LET, for a Term of years, as may be agreed upon, with immediate possession, if required that well known DWELLING HOUSE, late in the occupation of ANDREW DUNCAN, Esq. Application to be made at the Store of

October 1, 1852. A. & J. DUNCAN, & CO.

FOR CHARLOTTETOWN.

THE Superior first-class A 1, fast-sailing Barque *SIR ALEXANDER*, 309 tons, Captain John Walsh, will sail from Liverpool, G. B., on the 2d of April, 1853. This Barque has comfortable accommodations for *CABIN and STEERAGE PASSENGERS*; and as the Owner has had this vessel built and fitted up expressly for the carrying trade between this Port and Liverpool, hopes to merit a share of public patronage.

Rate of Freight and Passage, moderate.

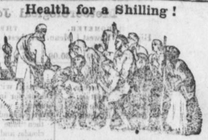
Health for a Shilling!



HOLLOWAY'S PILLS.

EXTRAORDINARY CURE OF LOSS OF HEALTH, DISORDERED STOMACH, INDIGESTION AND DETERMINATION OF BLOOD TO THE HEAD.

Copy of a Letter from Mr. John Lloyd, of Erw-wen, near Harlech Merionethshire.

To Professor Holloway;

Sir,—I avail myself of the first opportunity of informing you, that, for a very long period, I was afflicted with a dangerous giddiness and frequent swimmings in the head, attended by loss of appetite, disordered stomach, and generally impaired health. Every means had failed to give me any permanent relief, and at length it became so alarming that I was really affraid of going about without an attendant. In this melancholy condition, I waited personally upon Mr. Hughes, Chemist, Harlech, for the purpose of consulting him as to what I had better do; he kindly recommended your Pills, I tried them without delay, and after taking them for a short time I am happy to bear testimony to their wonderful efficacy. I am now restored to perfect health, and enabled to resume my usual duties. You are at liberty to publish this letter in any way you may think proper.

I am, Sir, your obedient Servant,
(Signed) JOHN LLOYD.

June 6th, 1852.

MIRACULOUS CURE OF DROPSY.

Extract of a Letter from Edward Rowley, Esq., of India Walk, Tobago, dated April 8th, 1852.

To Professor Holloway,

Dear Sir—I deem it a duty I owe to you and the public at large to inform you of a most miraculous recovery from that dreadful disease, Dropsy, and which, under God, was affected by your invaluable Pills. I was tapped five times within eight months, and skilfully treated by two medical practitioners, but could not get cured, until I had recourse to your remedy, and notwithstanding all I had undergone, this miraculous medicine cured me in the course of six weeks.

(Signed) EDWARD ROWLEY.

INFALLIBLE CURE OF A STOMACH COMPLAINT, WITH INDIGESTION AND VIOLENT HEAD-ACHES.

Extract of a Letter from S. Gowen, Chemist, o Clifton, near Bristol, dated July 14th, 1852.

To Professor Holloway,

Dear Sir—I am requested by a Lady named Thomas, just arrived from the West Indies, to acquaint you that for a period of eight years herself and family suffered from continual bad health, arising from disorders of the Liver and Stomach, Indigestion, loss of Appetite, violent Head-aches, pains in the side-weakness and general debility, for which she consulted the most eminent men in the colony, but without any beneficial result; at last, she had recourse to your invaluable Pills, which in a very short time effected so great a change for the better, that she continued them, and the whole family were restored to health and strength. Further she desires me to say, that she has witnessed their extraordinary virtues in those complaints incidental to children, particularly in cases of Measles and Scarlatina, having effected positive cures of these diseases with no other remedy.

(signed) S. GOWEN.

A DANGEROUS LIVER COMPLAINT AND SPASMS IN THE STOMACH EFFECTUALLY CURED.

Copy of a Letter from Mr. Bostock, Druggist, of Ashton under Lyne, dated July 31, 1852.

To Professor Holloway,

Dear Sir—I have much pleasure in handing to you a testimonial of the efficacy of your Medicines. A person in this neighbourhood with whom I am well acquainted was affected for a long time with violent spasmodic pains in the stomach and liver, arising from frequent colds, smells of paint, and the effects of a stooping position which he was obliged to assume in his business. The spasms were of an alarming character, and frequently left him in a weak and debilitated coudition. At length he heard of the salutary effect of your invaluable Pills, and was induced to give them a trial. The first dose gave him considerable relief, and by following them up in accordance with your directions, they have acted so wonderfully in cleansing the liver and stomach, and strengthening the digestive organs, that he has been restored to the enjoyment of good health.

I remain, dear Sir, yours faithfully,
(Signed) WILLIAM BOSTOCK.

These celebrated Pills are wonderfully efficacious in the following complaints.

Ague	Dropsy	Inflammation
Asthma	Dysentery	Jaundice
