CHARLES I. MORRISON, Auctioneer, 106 Queen Street.

DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE

ARE NOT a Pur-gative Medi-cine. They are a BLOOD BUILDER, Tonic and Re-con-struction, as they supply in a condensed form the substances actually needed to en-rich the blood, curing all diseases coming from Poor and Wat-ery Blood, or from WITHERED HUMORS in the Blood, and also invigorate and BUILD UP the Blood and SYSTEM, when broken down by overwork, mental worry, disease, excesses and indis-cretions. They have a SPECIFIC ACTION ON THE SEXUAL SYSTEM of both men and women, restoring LOST VIGOR and correcting all IRREGULARITIES and SUPPRESSIONS.

EVERY MAN Who finds his mental fac-ulties dull or failing, or whose powers flagging, should take these PILLS. They will restore his lost energies, both physical and mental.

EVERY WOMAN should take them. They cure all sup-pressions and irregularities, which inevitably entail sickness when neglected.

YOUNG MEN should take these PILLS. They will cure the re-sults of youthful bad habits, and strengthen the system.

YOUNG WOMEN should take them. These PILLS will make them regular.

For sale by all druggists, or will be sent upon receipt of price (50c. per box), by addressing THE DR. WILLIAMS' MED. CO. Brockville, Ont.

Wall Paper.

ABOUT THREE THOUSAND ROLLS WALL PAPER, at 33 1/2 per cent. discount. I am closing out this branch of my business, and will sell out at the above discount in order to make a speedy clearance. Some very nice patterns, and persons requiring Wall Paper would do well to look at this lot before buying.

J. P. MACDONALD, Queen Street.

Facts are Stubborn Things

So is Bad Blood. The difference between them is that a fact is here to stay. Bad Blood can only stay until Burdock Blood Bitters is used, then it must go. It takes facts to prove this to your satisfaction, and we give them to you every time we catch your eye. Here is one of them. Don't throw the paper down, but read this letter from Mr. Fred Taylor, a detective of Winnipeg. We present his portrait, together with that of his little daughter, mentioned in his letter.

FATHER AND DAUGHTER.

ONE OF THE GALLANT 90TH BATT.
DEAR SIRS,—Having felt out of order for some time, and having no energy or appetite, blotches on legs, tumor on neck—arising from impure blood, doctors doing me no good, I was induced to buy some B.B.B. I was very much against patent medicines at the time, having tried so many, but after using two bottles I began to get better, and at the fourth bottle was completely well and around again. I believe in B.B.B. now, I tell you. I send you a photo of myself and little daughter, Lilly. B.B.B. cured her of nasty blisters which came out on her lips. Yours thankfully,

F. TAYLOR, 9 St. Stephen St., Winnipeg, Man.

BOYS' SUITS!

For Boys from Six to Nine Years Old, SELLING AT LOW PRICES.

MEN'S RUBBER COATS, A GOOD ARTICLE.

HE MADE A MISTAKE!

"I made a mistake" the old man said, "To spend money on shoes like those." And a trickling tear escaped from his eye As he looked at the holes in the toes.

He will never make such a mistake again, for hereafter we will buy GOFF BROS' Solid Leather Boots.

Written for The Examiner Spring.

Oh, spring so near at hand,
How sweet to sing of thee;
When fields are green and grand,
And flowers scent the lea.

When, from the warbling bird,
All through the livelong day,
Are joyous chorals heard
In the woodlands far away.

With joy thou dost inspire
Each sad and aching breast;
Yes! e'en the aged sire
Whom death beckons to rest.

Soon to thy calmer skies—
A balm to every woe—
Our merry shouts shall rise,
From thy vernal scenes below.

Thy mantle soon shall steal
Around the waking earth;
And nature bid reveal
Her gems of priceless worth.

Welcome shall be thy smile,
Welcome thy glorious time;
That holds the deadly winter
To the lips of winter's clime.

T. B.

THE FARM AND DAIRY.

Professor Shuttleworth at Centreville.

DAIRYMEN'S ASSOCIATION FORMED.
Fully one hundred farmers and others were present at Centreville Hall on Friday evening to listen to the lecture delivered by Professor Shuttleworth, under the auspices of the Western Agricultural Association. Among those present we noticed the Hon. Alex. Laird, Alfred Schurman, Alex. Anderson, Peter McRae, T. Robins, Nelson Inman, Rev. Mr. Cahill, Major Wright, Col. M. Wright, Mr. Montgomery, J. Crawford, and A. M. Wright, D. Ross, A. T. Wright and Major Craig.

The President, Mr. D. S. Wright, opened the meeting by a short address, and expressed the opinion that the time has arrived when it is necessary for farmers to adopt some new methods of farming to reclaim the exhausted condition of the soil and improve our changed circumstances. He welcomed Professor Shuttleworth and introduced him to the meeting.

The Professor, on coming forward, expressed the pleasure it afforded him in meeting such a large and influential gathering of farmers, and to see the interest they manifest in these lectures. He referred to the useful organization of the Guelph Club, where he had received his agricultural education and training, and spoke of the advantages that must accrue to this Province by the instruction now given at the Prince of Wales College on Agricultural Science. The pupils take a lively interest in the lectures, and show great aptitude in learning. Many of them are training for teachers, and will shortly be in a position to impart the knowledge they are now acquiring to others in the schools throughout the country.

He then proceeded to read his lecture on "Plant Food and How Plants Feed," which was listened to with great attention.

A discussion on the lecture followed, which was participated in by Alex. Laird, Joseph Schurman, Albert Schurman, Colin Wright, Alex. Anderson, D. S. Wright, Rev. M. Cahill, Messrs. Montgomery, Fowler and others.

Mr. Alex. Laird commended the lecturer on his address. He would like to get further information regarding the use of mussel-mud, and elicited discussion on the subject. He did not concur with the lecturer's regard to the adaptation of our soil and climate to carry on dairying successfully. The pasture season is, he thought, too short. Cattle require to be fed too long, nearly to months of the year. He thinks farmers are grow small seeds, roots and other products, to better advantage.

Mr. Con Wright, of Middleton, said he believed the constant application of mussel-mud to be injurious to the soil. He thought the judicious use of lime was desirable to reclaim exhausted soil. Farmers require to be practical as well as scientific in order to farm successfully. He has used fertilizers successfully in growing turnips.

The question having been asked if marsh mud was good for exhausted land back into condition, Professor Shuttleworth answered in the affirmative, and stated that is a good measure obtaining a large per centage of potash. He instanced a farm near Charlottetown where it has been largely used with excellent results.

The discussion having turned on the use of mussel mud, Professor Shuttleworth pointed out the danger of putting too much on the land. It must be used cautiously its action is to liberate food substances particularly potash. It is found, in fact, that large crops of clover can be grown for one or two years after the application of mussel mud; but in time the soil fails to grow clover, having become exhausted of potash.

Professor Shuttleworth advocated the growth of fodder corn, and the general adoption of silos as necessary to produce a cheap and bountiful supply of food for cattle, which can be used to advantage as green fodder in the summer and the early fall when the pastures are dry, and in the winter as a substitute for hay and roots. Professor Anderson, he said, recommends growing the "Thoroughbred White Flint," "Pierce's Kaffir," and "Mitchell's Early Varieties." Each of the first named varieties were grown with great success at the Dominion Experimental Farms last year.

Prof. Shuttleworth spoke strongly in favor of establishment of a Provincial Dairymen's Association work up an interest throughout the Island in this important industry. He read a letter from Professor Robertson, stating that he intended to visit the Island in a short time, to establish a "Branch Experimental Dairy Station" in P. E. Island, by the Dominion Government, and

brought the present an opportune time to undertake it.

F. T. Newbery, Esq., having been called upon to address the meeting said he was glad the discussion had turned on the growth of fodder corn and the silo. He had advocated this for several years, to the patrons of cheese factories, but so far not one of them has ventured to try the experiment. The feeding of corn ensilage has proved a great success, and is now being largely adopted in Ontario and Quebec. Our farmers will never carry on dairying successfully until they do likewise. Now that a silo can be built at a cost of \$75 to \$100, there is nothing to prevent our farmers undertaking it. It has been proved by recent experiments, at the Government Farm and elsewhere in Ontario, that corn ensilage can be produced at a cost of \$1.50 to \$2.00 per ton. Two tons are equal as food to one ton of hay, and it is safe to say that fifteen tons can be grown to the acre on land that will produce on an average one and a half to two tons of hay to the acre. He took exception to the statement made by Mr. Alex. Laird, in reference to the cheese industry not being capable of being made a success in P. E. Island. He claimed that if farmers will adopt ensilage feeding, give closer attention to selection in breeding and housing of cattle, that we can compete favorably with the other Provinces. We have proved that we can make as good cheese as is produced in Ontario, where the business has assumed enormous proportions.

Thirty years ago Canada did not export a single box of cheese. Now we export \$9,000,000 worth, and the export is still increasing, as is shown by the following returns just published:—

1888 \$9,000,000	1,316,928 boxes
1889-90	1,368,664 "
1890-91	1,625,007 "

There is great room for improvement in the manufacture of butter. A great deal of that is offered for sale and is exported from the Island is very inferior and consequently difficult to sell even at the low prices now ruling for common butter, which is a drug everywhere. He would support with pleasure the motion to establish a Provincial Dairymen's Association in P. E. Island. He was glad to learn that the Dominion Government contemplated establishing a branch experimental dairy in P. E. Island. He had called Professor Robertson's attention to this when he visited the Island last summer, and it was gratifying to know that the Government intend to move at once in the matter. A training school would do much to promote dairying and to raise the character and secure a uniform quality of butter, also to develop the cheese industry.

The following resolution was moved by Professor Shuttleworth, seconded by Thomas Robins, and carried unanimously:

Resolved, That in the opinion of this meeting it will be to the interest of the farmers of this Province to have organized a Provincial Dairymen's Association to meet at central places once or twice yearly, and that in view of establishing such, this meeting elect a President and Secretary pro tem; and further, that a committee of five, consisting of the President and Secretary and three others to be nominated and asked to draw up a constitution to be submitted at the first regular meeting to be held in Charlottetown at an early date, decided upon by the members of the said committee.

On motion F. T. Newbery was unanimously elected President, pro tem; Professor Shuttleworth, Secretary, and the following committee: D. S. Wright, Searitown; Jas. D. Dewar, Brudenell; and the President of the Cornwall Cheese Factory.

A vote of thanks was tendered to Professor Shuttleworth at the close of the meeting—moved by Hon. Alex. Laird and seconded by Mr. Nelson Inman, in a complimentary speech by the mover.

A Serious Battle.

The political battle is over, but the battle with disease must be constantly and unceasingly waged else the grim reaper will come out victorious, and loved ones will be gathered to their long home. On all sides may be seen pale and listless girls who should be enjoying the health and glow of rosy youth. Everywhere we are met with women young in years, yet prematurely old, who suffer in silence almost untold agonies, the result of those ailments peculiar to the female system. To all such, Dr. Williams' Pink Pills come as a blessing. They restore wasted vitality, build up the nervous system, enrich the blood, and transform pale and sallow complexions into glowing, rosy cheeks that alone follow perfect health. In a word they are a certain cure for all these distressing complaints to which women and girls are peculiarly liable. A trial of these pills will convince the most sceptical of their wonderful merit. For suffering men Dr. Williams' Pink Pills are equally efficacious. For overwork, mental strain, loss of sleep, nervous debility, and all those diseases that lead to broken-down manhood, they are a certain specific, stimulating the brain, reinforcing the exhausted system and restoring shattered vitality. Dr. Williams' Pink Pills are nature's restorative and should be used by every weak and debilitated person. For sale by all dealers or sent post paid on receipt of price (50 cents a box) by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

HAND CRUSHED.—The Farmer says: Miss Zulieka McArthur, daughter of Mr. Newton McArthur, Margate, met with a serious accident in Boston a short time ago. She was employed in a laundry there and accidentally got her left hand drawn in between the rollers of which was hot. Only that she caught her wrist with the other hand her arm would also have been drawn in. One side of the hand was so badly burned as well as crushed, that it had to be amputated at the wrist. At latest accounts Miss McArthur was in a dangerous condition.

ALL FOR LOVE.—In Detroit Township, Ill., on Monday night, Harvey Peoples shot Nellie Dyke and then shot himself dead. Miss Dyke may survive. The girl refused to marry Peoples', hence the shooting.

SCOTT'S EMULSION

Of Pure Cod Liver Oil and HYPOPHOSPHITES of Lime and Soda

SCOTT'S Emulsion is a perfect Emulsion. It is the best for CONSUMPTION, Asthma, Bronchitis, Wasting Disease, Chronic Coughs and Colds.

Patented in U.S.A. and U.K. It is the only Emulsion which is not only pure but also contains all the necessary ingredients for the cure of all the above diseases. Sold by all Druggists at 50c. and \$1.00. SCOTT & BOWNE, Belleville, Pa.

HERE IS WHAT THEY SAY ABOUT THE Cooker and Roaster.

ST. DUNSTON'S COLLEGE, November 28, 1890.

The "Patent Cooker" advertised by H. K. Brace has been in use at St. Dunstan's College for some time, and has proved to be a great success.

J. C. McDONALD, Titular Bishop of Irlia.

MR. P. K. BRACE,—It gives us much pleasure to recommend your "cooker." We have had one in use at St. Joseph's Convent and like it very much. It is certainly a most useful article.

THE SISTERS OF ST. JOSEPH'S CONVENT.

MR. R. K. BRACE,—I have given the "Cooker" I got from you a most careful trial. I find it most useful for roasting Beef, etc. I am sure a person once using one would not like to do without it.

Mrs. T. J. MORRIS.

Made by H. D. VADMAN. For sale at Wright Br. & Co., Summerside, or most any Country Store-keeper. Wholesale or Retail from H. K. BRACE. Also—2 Express Wagons, 25 Benches, just the thing for Schoolhouses or Hall. oct1w—mch31
