CHARLOTTETOWN, P. E. ISLAND; THURSDAY AUGUST 26, 1897.

NO 199

A CLOTHING SURPRISE.

The latter part of last week we were busy opening our Fall Clothing, and elegant clothing it is. The largest and best stock we have ever opened. We would like to describe it here in detail, but that would fill the paper, so for the present we will call your attention to some lines of

MEN'S DOUBLE BREASTED SUITS

25 extra heavy all wool d. b. suits at \$7 00. 50 extra heavy all wool d. b. suits, very fine trimmings, and best of work—makes a beautiful fall suit, at \$9.50. 25 Black Cheviot, silk faced, d. b., as good as custom made, we will sell this at \$12.50.

We certainly have the finest stock of clothing ever imported to Charlottetown. We guarantee to give you what you want at as low a figure as can be bought in Canada.

McKAY WOOLEN COMPANY.

Eye Dont's.

DON'T attempt to read in a reclining posture.
DON'T read with the light shining in your face. Place it so that it comes from behind.
DON'T use glasses without having your eyes properly examined.
DON'T forget that I am qualified to do this for you.

G F HUTCHESON, Jeweler & Optician

QUEEN STREET.

Results are the Strongest Convincers

Our advertisements only begin in the papers. The strongest part of them is in their fulfilment in giving values that force recognition as genuine bargains, that win appreciation and instil confidence.

Woven Wire Mattresses

are a line we always boasted of being leaders in—a full line of Wire Cots and Mattresses in stock.

High Grade Tailors.

Open For a Settlement.

An old Swede farmer who lives on the Baltimore and Ohio road, a few miles out of town, had the misfortune to lose a valuable colt the other day. The animal jumped out of a pasture, ran down upon the railway and was caught in a cut by an express train. The claim agent went out to effect an amicable settlement if possible with the old man.

"We are very sorry, of course, that this affair happened," said the railway man, "and I hope it will not be necessary for us to go into court."

The old farmer looked at him suspiciously and shifted about uneasily, but said nothing.

"You must remember," continued the claim agent, "that your colt was a trespasser on our property when the accident occurred. We don't want any litigation, however, if we can help it, and we'd like to arrange a settlement with you on a friendly basis."

"Well," slowly said the Swede, "Ay tal you. Ay bin sorry das fool colt runned on de railroad track, but Ay bin poor man. Ay skal give you two tollar!"—Chicago Times-Herald.

The Well Groomed Envelope.

What a high bred, well groomed look there is about an envelope that is properly prepared for the mails! A little thing, of course, but one of the little things which tells. The handwriting? No, the handwriting doesn't stand for much because each individual has his own special cigraphy, and it is more characteristic that she should, but the writing on a well looking envelope is begun far enough to the left to be well balanced. The last word is not squeezed and crammed. The address, with name of state and city, is written in full. The stamps are evenly placed in the upper right hand corner, with a slight margin left between the top of the envelope and the edge of the stamp. The flap, too, of the well bred envelope is muddled down in a clean, orderly manner. It is often rendered modish with sealing wax and the sender's monogram.—Exchange.

Seemed Like It.

"Come up to my house tomorrow night," said Henpeque. "I'm going to celebrate my golden wedding."

"Golden wedding! Why, maa, you've only been married three years!"

"I know it, but it seems like 50, so everything is all right!"—London Tit-Bits.

Scarlet seems the color most conspicuous in bright sunshine and scarlet flowers are commonest in dry and sunny climates, where their color gives them an advantage in their struggle with other flowers for the attentions of butterflies and other pollen bearers.

Crusts of bread are better than a soft cloth for rubbing photographs, engravings or paintings to remove soiled marks and dust. The bread should be 96 hours old.

McGill University, Montreal

Copies of the Calendar containing information, may be obtained on application to the Secretary.

BUSINESS SKYSCRAPERS.

The Brains That Go to Make a Modern Giant Building.

The brain that is engaged in this business directly is divided into more than 100 trades, each one of which has been developing its particular branch with the same strenuousness, boldness and ingenuity that have characterized the architectural engineering. The architect himself has been laboring with a thousand considerations not even hinted at in this article. He has been studying out such other general problems as ventilation, light, economy of space, convenience, proportion, besides attending to special applications of all his principles and those of all the other trades that enter the building with his and add to the ever varying problem. The engineers have been pondering such essentials as joinings and strains and foundations.

In Chicago, where there is no hard pan within reach, they devised a floating "raft" of steel and concrete to lie flat on the shifting sands below the lake level, and on that they can build with such perfectly even distribution of weight that when the whole structure of 20 or more stories settles it sinks plumb. The elevator builder has achieved such precision that the number of cars put into a building is determined by the cubical contents of the structure.

The plumber has applied to his art the principles of sanitary science. The machinist has fitted his enormous plant to the dimensions of the cellar and has plotted with the elevator man to use for the improved heating system the exhaust steam from the power engines to warm the tenant after it has lifted him to his floor and lighted his room. The heater man has arranged so that all the tenant has to do is to set a gauge opposite the degree Fahrenheit at which he would like to have the temperature of his room kept, and the machinery automatically keeps it there.—J. Lincoln Steffens in Scribner's.

Origin of Table Utensils.

A writer attempts to trace table utensils—most of them of recent introduction—to their origin. The Romans, he declares, took their meals lying upon very low couches, and it was not until about the time of Charlemagne that a stand was used around which guests were seated on cushions, while the table made its appearance in the middle ages, and with it came benches with backs. The Greeks and Romans ate from a kind of porringer, yet during a portion of the middle ages slices of bread cut round took the place of plates. The spoon is very ancient, and many fine specimens are in existence that were used by the Egyptians in the seventeenth century B. C. The knife, though very old, had not come into common use as a table utensil in the tenth century. The fork was absolutely unknown to the Greeks and Romans, appeared only a curiosity in the middle ages and was first used upon the table by Henry III. Drinking cups—in the middle ages made from metal more or less precious—naturally dated from the remotest antiquity. The use of glasses from Venice began to be general in the fifteenth century. Saltcellars appeared at a very early date and occupied the place of honor at the banquets of the Greeks and Romans, many of them being made of gold and silver and richly chased.—Jewelers' Circular.

ASK YOUR GROCER FOR Royal Oak Soap

the best laundry Soap on the market. One bar will do as much as two bars of ordinary imported Soap made from filthy material.
