Died.

At Charlottetown, on Friday morning last, very suddenly, PATRICK STEPHENS, Esquire, of Orwell, Merchant, aged 55 years. The remains were carried to Orwell on Friday afternoon, and were followed yesterday to the grave at Vernon River Chapel by the largest concourse of people ever witnessed on this Island on a similar melancholy occasion. The Very Rev. Dr. McDonald, of Charlottetown, officiated at the interment, and delivered an eloquent and affecting discourse on the occasion.

At Orwell, on Friday evening last, at the residence of the late P. Stephens, Esqr., after a lingering illness, GEORGIANA, the beloved wife of Richard Clarke, Esqr., and sister to Mrs. P. Stephens. Mrs. Clarke died only a few minutes before the remains of her brother in law arrived at the family residence, and her remains were carried to the grave in the same hearse, and at the same time as those of her brother-in-law. She was born in Ireland, where she moved in highly respectable circles, and had many connections in Halifax, who will deeply deplore her early death.

Suddenly, at Charlottetown, on the morning of the 12th inst., of Apoplexy, GEORGE F. C. LOWDEN, Esq., Merchant of this City, aged 44 years, leaving a wife and two small children to mourn the loss of a kind husband and affectionate parent. Mr. Lowden came to this Island some twelve or fifteen years since and commenced business at Crapaud; he afterwards left for California and on his return to this Island, about eighteen months afterwards, established himself in business in Charlottetown, which he successfully prosecuted to the day of his death, having acquired a handsome competency. His remains were conveyed to their last resting place, at the hour of ten o'clock, on Thursday morning last, followed by a large number of the inhabitants of this City.

On Sunday last, after an illness of a few days, in the 64th year of his age, Mr. Joseph Wise, New Glasgow Road. The deceased was a quiet inoffensive man, and much respected by all his neighbors and acquaintances.

On the 26th of June, after one week's illness, Rebecca, wife of Mr. Francis James, and daughter of the late John Croker, Charlottetown Royalty, aged 30 years, leaving a disconsolate husband and six small children.

Launched,

From the Shipyard of Hugh Findley, Orwell, on the 7th instant, a handsome Brigantine, about 200 tons register, named 'Lucetta,' built under Lloyd's inspection. She is said, by good judges, to be a fine vessel.

CIVIC ELECTIONS.

BY THE MAYOR.

IN pursuance of an Act of the General Assembly of this Island, made and passed in the eighteenth year of the reign of Her present Majesty, intituled "An Act to Incorporate the Town of Charlottetown," I do hereby give public notice, that an Election of

Mayor and Five Councillors,

for the City of Charlottetown, will be held on TUESDAY, 2d August next, at the several places following, that is to say:

In Ward No. 1, at the Store of A. H. Yates, Esq., corner of Queen and Water Streets.

In Ward No. 2, at the Fire Engine House, fronting on Great George Street.

In Ward No. 3, at the City Hall.

In Ward No. 4, at the Fire Engine House, fronting on King's Square.

In Ward No. 5, at the house of Mr. E. Needham, fronting on Great George Street.

And at the said Elections the Poll will be opened at 9 o'clock in the forenoon, and continue open till 5 in the afternoon of the same day.

DESCRIPTION OF WARDS.

"Number One shall comprise all that part of Charlottetown which lies south of Dochester Street. Number Two shall comprise all that part of Charlottetown which lies south of Richmond Street and north of Dorchester Street. Number Three shall comprise all that part of Charlottetown which lies south of Grafton and north of Richmond Streets. Number Four shall comprise all that part of Charlottetown which lies south of Fitzroy and north of Grafton Streets. Number Five shall comprise all that part of Charlottetown which lies north of Fitzroy Street, including the Common of the said Town."—See 18 Vic. cap. 34, intituled "An Act to Incorporate the Town of Charlottetown."

DR. BRIDGE'S PATENT FOOD,

For Invalids and Persons of Impaired Digestion.

Recommended by the Faculty.

THE PATENT FOOD is so carefully and scientifically prepared that it is immensely superior to Arrowroot, Sago, Tapioca, Bread, Biscuit, Corn Flour, or any other kind of farinaceous food for Infants, not alone from its purity, strength, and nourishing properties, but also from its having been peculiarly and thoroughly cooked in its manufacture, which renders it more easily digestible. It cannot cause Acidity or Wind. It is very agreeable, and, from the nature of its composition, is exactly adapted for all conditions of the stomach. It can be made ready for use, without trouble, in two or three minutes.

Mixed in Beef Tea, Milk, or any other fluid, the Patent Food is pre-eminently suited to Invalids, from its wholesome and strengthening qualities. It is a real blessing, and from its remarkable cheapness accessable to all.

One trial will prove its efficacy—it will recommend itself. Sold by

NEW ADVERTISEMENTS.

☞ THE following Instructions for the restoration of persons apparently drowned, have been ordered by the Right Honorable Edward Cardwell, Her Majesty's Principal Secretary of State for the Colonies, to be printed and extensively circulated throughout Prince Edward Island:

Treatment of the APPARENTLY DROWNED.

Royal National Life-Boat Institution.

Incorporated by Royal Charter.—Supported by voluntary contributions.

Patroness—Her Most Gracious Majesty the Queen.

DIRECTIONS FOR RESTORING THE APPARENTLY DROWNED.

THE leading principles of the following Directions for the Restoration of the apparently dead from Drowning are founded on those of the late Dr. MARSHALL HALL, combined with those of Dr. H. R. SILVESTER, and are the result of extensive inquiries which were made by the Institution in 1863-4 amongst Medical Men, Medical Bodies, and Coroners throughout the United Kingdom. These directions have been extensively circulated by the Institution throughout the United Kingdom and in the Colonies. They are also in use in Her Majesty's Fleet, and in the Coast-guard Service.

I.

Send immediately for medical assistance, blankets, and dry clothing, but proceed to treat the Patient *instantly* on the spot, in the open air, with the face downwards, whether on shore or afloat; exposing the face, neck, and chest to the wind, except in severe weather, and removing all tight clothing from the neck and chest, especially the braces.

The points to be aimed at are—first and *immediately*, the *Restoration of Breathing*; and secondly, after breathing is restored, the *Promotion of Warmth and Circulation*.

The efforts to restore Breathing must be commenced immediately and energetically, and persevered in for one or two hours, or until a medical man has pronounced that life is extinct. Efforts to promote Warmth and Circulation beyond removing the wet clothes and drying the skin must not be made until the first appearance of natural breathing. For if circulation of the blood be induced before breathing has recommenced, the restoration to life will be endangered.

II.—TO RESTORE BREATHING.

TO CLEAR THE THROAT.—Place the patient on the floor or ground with the face downwards, and one of the arms under the forehead, in which position all fluids will more readily escape by the mouth, and the tongue itself will fall forward, leaving the entrance into the windpipe free. Assist this operation by wiping and cleansing the mouth.

If satisfactory breathing commences, use the treatment described below to promote Warmth. If there be only slight breathing—or no breathing—or if the breathing fail, then—

TO EXCITE BREATHING — Turn the Patient well and *instantly on the side, supporting the* head, and—

Excite the nostrils with snuff, hartshorn, and smelling salts, or tickle the throat with a feather, &c., if they are at hand. Rub the chest and face warm, and dash cold water, or cold and hot water alternately, on them.

If there be no success, lose not a moment but instantly

TO IMITATE BREATHING—Replace the patient on the face, raising and supporting the chest well on a folded coat or other article of dress.

Turn the body very gently on the side and a little beyond, and then briskly on the face, back again; repeating these measures cautiously, efficiently; and perseveringly about fifteen times in the minute, or once every four or five seconds, occasionally varying the side.

[*By placing the Patient on the chest, the weight of the body forces the air out; when turned on the side, this pressure is removed, and air enters the chest.*]

On each occasion that the body is replaced on the face, make uniform but efficient pressure with brisk movement, on the back between and below the shoulder-blades or bones on each side, removing the pressure immediately before turning the body on the side. During the whole of the operations let one person attend solely to the movements of the head, and of the arm placed under it.

[*The first measure increases the Expiration, the second commences Inspiration.*]

⁂ The result is *Respiration* or *Natural Breathing*; and if not too late, *Life*.

Whilst the above operations are being proceeded with, dry the hands and feet; and as soon as dry clothing or blankets can be procured, strip the body and cover, or gradually reclothe it, but taking care not to interfere with the efforts to restore breathing.

III.

Should these efforts not prove successful in the course of from two to five minutes, proceed to imitate breathing by DR. SILVESTER'S method as follows:—

Place the Patient on the back on a flat surface, inclined a little upwards from the feet; raise and support the head and shoulders on a small firm cushion or folded article of dress placed under the shoulder-blades.

Draw forward the patient's tongue, and keep it projecting beyond the lips: an elastic band over the tongue and under the chin will answer this purpose, or a piece of string or tape may be tied round them, or by raising the lower jaw, the teeth may be made to retain the tongue in that position. Remove all tight clothing from about the neck and chest, especially the braces.

TO IMITATE THE MOVEMENTS OF BREATHING.—Standing at the Patient's head, grasp the arms just above the elbows, and draw the arms gently and steadily upwards above the head, and *keep them stretched* upwards for two seconds. (*By this means air is drawn into the lungs.*) Then turn down the Patient's arms, and press them gently and firmly for two seconds against the sides of the chest. (*By this means air is pressed out of the lungs.*)

Repeat these measures alternately, deliberately, and perseveringly, about fifteen times in a minute, until a spontaneous effort to respire is perceived, immediately upon which cease to imitate the movements of breathing, and proceed to INDUCE CIRCULATION AND WARMTH.

IV.—TREATMENT AFTER NATURAL BREATHING HAS BEEN RESTORED.

TO PROMOTE WARMTH AND CIRCULATION.—Commence rubbing the limbs upwards, with firm grasping pressure and energy, using handkerchiefs flannels, &c.: [*by this measure the blood is propelled along the veins towards the heart.*]

The friction must be continued under the blanket, or over the dry clothing.

Promote the warmth of the body by the application of hot flannels, bottles, or bladders of hot water, heated bricks, &c., to the pit of the stomach, the arm-pits, between the thighs, and to the soles of the feet.

If the Patient has been carried to a house after respiration has been restored, be careful to let the air play freely about the room.

On the restoration of life, a teaspoonful of warm water should be given; and then, if the power of swallowing has returned, small quantities of wine, warm brandy and water, or coffee, should be administered. The Patient should be kept in bed, and a disposition to sleep encouraged.

GENERAL OBSERVATIONS.—The above treatment should be persevered in for some hours, as it is an erroneous opinion that persons are irrecoverable because life does not make its appearance, persons having been restored after persevering for many hours.

APPEARANCES WHICH GENERALLY ACCOMPANY DEATH.

Breathing and the heart's action cease entirely; the eye-lids are generally half-closed; the pupils dilated; the jaws clenched; the fingers semi-contracted; the tongue approaches to the under edges of the lips, and these, as well as the nostrils, are covered with a frothy mucus. Coldness and palor of surface increase.

CAUTIONS.

Prevent unnecessary crowding of persons round the body, especially if in an apartment.

Avoid rough usage, and do not allow the body to remain on the back unless the tongue is secured.

Under no circumstances hold the body up by the feet.

On no account place the body in a warm bath, unless under medical direction, and even then it should only be employed as a momentary excitant.

By order of the Committee,

RICHARD LEWIS, Secretary.

DECAYED Teeth filled and restored to their natural shape and usefulness with GOLD and PLATINA.

Teeth inserted on Gold, Silver and Vulcanite, the Vulcanite, although a new thing here, has been used long enough elsewhere to prove it to be one of the most valuable improvements ever made in MECHANICAL DENTISTRY.

Many persons who cannot wear Gold and Silver in the mouth can wear the Vulcanite with ease and comfort.

The acids of the mouth have no galvanic action upon it whatever.

It is free from all taste or smell.

It being one continuous piece, there is no possible chance for the lodgement of food or the secretions of the mouth.

It is kept clean with much less trouble than Gold or Silver.

It possesses more strength than a base of Gold or Silver and is at the same time much lighter.

In case of great absorption of the gums, the cheeks being thereby caused to look hollow and unnatural, this base can be built out so as to give the cheeks their former fulness in appearance.

The expense of the Vulcanite being much less than Gold is placed within the reach of those of more limited means.

☞ Chloroform used in extracting.

NOTICE TO FARMERS.

MANNY'S CELEBRATED MOWING and REAPING MACHINES, which save immense labour and money, have just arrived in the Steamer "Commerce." The subscriber expects that all agents and others wanting them will send their orders forthwith, as the supply is limited. Farmers who desire to preserve the life and health of their young hands, especially their females, who are so severely worked by the old mode of cutting grain crops, and who also desire to economise their money, will do well to secure one of the above named MACHINES as speedily as possible.
