CITY COUNCIL MEETING.

Important Statement Regarding Sewerage Work.

The regular monthly meeting of the City Council was held last night, Mayor Warburton presiding.

After routine the matter of the application of the Sewer and Water Commissioners for an issue of debentures amounting to $50,000 was brought up for further consideration.

In connection with the application an interesting report from the Commissioners as to the system to be adopted and the work to be performed was read by the clerk. Regarding the system to be adopted the Commissioners said:—

"The system decided upon is the common separate water carriage system with intermittent discharge into the sea by means of a reservoir, cast iron pipe and channel of the Hillsborough as designed by the Council's engineer, Mr Freeman C Coffin. There will be a pumping station at a low point both on the east and west sides of the central high gravity area, which location of pumps will altogether obviate the use of siphons and at the same time effectually carry away the sewerage from the very lowest levels to the eastern and western portions of the city. There will be no steam pump, large well or wooden building near the reservoir at Pownal wharf. From each of the pumping stations already mentioned and the tank connected therewith the sewerage will be pumped through a cast iron pipe to an elevation of about 20 feet on the high gravity area, where it will enter an earthenware pipe of a large size to enable it to flow freely with the other sewage passing at the same level into the outlet reservoir."

After giving the engineers' approximate estimates of the amount of pipe laying, excavation, stone work, etc., to be done this year, it is pointed out that "it is proposed to erect an outlet reservoir at or near the head of Pownal wharf, 40 feet by 90 feet inside measurement. This reservoir will be covered with an arch roof of concrete, to effectually guard against the escape of any foul odors. From this reservoir, running between Pownal and Connolly's wharves, there will be a 20-inch cast iron outlet pipe of the approximate length of 700 feet, or until it reaches well out into the channel of the Hillsboro."

It is further pointed out that about five and one-half miles of pipe will be laid during the year as follows:

The Commissioners do not anticipate that they will require any more debentures for sewer purposes this year than the $50,000 asked for. In connection with the report plans and specifications were also submitted.

After the report had been read Councillor Hooper moved that the $50,000 debentures asked for by the Commissioners be granted. Councillor Crabbe seconded the motion.

Councillor Nicholson took ground against granting the request, claiming that the Legislature had over-ridden the wishes of the people and the Council. He moved an amendment along this line, which was seconded by Councillor Taylor,

The amendment was declared lost on the following division:

Yeas—Nicholson and Taylor.

Nays—Crabbe, Hooper, Horne, Wheatley and Lyons.

The original motion was then put and carried.

A letter from the Secretary of the School Board, asking for the payment of $2,000, was ordered to lie on the table.

A petition to open Prince Street to the line of the city limits was referred to a committee consisting of Councillors Crabbe Horne and Nicholson.

A communication with reference to lighting the City Building was referred to the Finance Committee.

A letter was read from Mr J Lawlor Woods, manager of the Dominion Publishing Company, with reference to a work which is being issued by that company entitled "Canada from Ocean to Ocean." Mr Woods addressed the Board in support of his publication pointing out the great value of the work he was issuing, and strongly urging the advisability of the City of Charlottetown being represented therein.

Coucillors Crabbe, Horne and Nicholson were appointed a committee to meet the underwriters with reference to the appointment of an electrical engineer.

After the transaction of some other business the meeting adjourned.

THE LOBSTER MEETING.

Conflicting Opinions Regarding the Season for Fishing.

The meeting of lobster packers and others interested in that industry held in the Board of Trade Room yesterday was very well attended. Sir Louis Davies, at whose instance the meeting was called, occupied the chair.

After the meeting had been called to order it was addressed by the following gentlemen: A. J. McDonald, Georgetown; Jas. Clow, Murray Harbor; John McLean, Souris; D C Morson, Cardigan; Daniel Davies, Charlottetown; John Agnew, Alberton; Peter McNutt, Malpeque; C. A. Woodman, Alberton; Ed. Hackett, Tignish; R. A Clark, Alberton; H. W. Longworth, Charlottetown; Samuel Johnson, Murray Harbor North; S. E Gallant, Richmond; W. A. Leard, Bedeque; G. D. Longworth, Charlottetown; W. F. Tidmarsh, Charlottetown; Wm. Taylor, St. Peter's Island; Alfred Higginbotham, Murray Harbor North; Jas. E. Grant, Charlottetown; David Pigot, Mt. Stewart; Horace Hazzard, Charlottetown; J. H. Bell, Summerside.

Most of the speakers were favorable to the present arrangements providing that no fishing be allowed after May 1st, while some favored fall fishing as an experiment. Mr J H Bell's remarks are believed to express the views of those in whose territory the most dissatisfaction exists. He thought that the best way to protect the industry is to begin fishing after May and June and the first of July, after the most of the lobsters have deposited their spawn and there are no soft lobsters; after that the fish in most localities are plentiful and of good quality. But this is not feasible because the packers at the north side will not consent to such a change. All that can be done is to fix a season that will be satisfactory to all. The present season appears satisfactory except from West Point to Carleton Head. Except as to this short the general opinion of the meeting points to the 1st July as the time to close. But to the section from West Point to Carleton Head the present season is entirely unsatisfactory. This is so because the harvest in that section begins when it ends on the north side. There is no profitable fishing there until about the 5th of July. He had the books of fishermen to prove this. To fix the end of the season arbitrarily at the 15th July gave only one week, good fishing to the Egmont Bay section. To further curtail the season to the 1st July would effectually destroy the industry along this shore. He thought it would be most satisfactory to have two seasons, one for all the Island except Egmont Bay section extending from 1st May to 1st July, and for this section from 1st June to 1st August.

After all had been heard Sir Louis thanked those present for responding to his call. Reviewing the remarks of the various speakers he said he had either to make up his mind to take a rough and ready system such as the one now in vogue, and which, he believed, would fairly well cover all existing circumstances, or divide the coast up into districts of twenty-three, twenty-five or one hundred miles and make a different close season for each. The latter idea, however, he thought would do more harm than good to the fishing industry. But he would weigh all the opinions well and give them his best consideration. Sir Louis also made reference to the grant made by the Government for the establishment of an observatory for the scientific study of lobsters and other fish
