VARIETIES.

ABERNETHY.—Of John Abernethy, one of the most eminent surgeons and medical writers of the last century, several anecdotes are recorded. He was extremely eccentric, or rather extremely manly. He acted and spoke always as nature dictated, and not as custom ordained. To a rich valetudinarian gentleman he once said, "Live on a six-pence a day, and earn it;" and to a lady of the of same species who offered him a fee, he said—"Madam, keep your money and buy a skipping rope." When he loved he still continued to despise the forms with which society ever seeks to encumber the sayings and doings of men. He did not waste his time in courting, nor did he prostrate himself, as is usually the case, before the relatives of his Eve. He met her in the street, revealed his affection for her, and offered her his hand. She accepted it, and he immediately gave her a purse, with orders to furnish a house.—*Gilfillan's Gallery of Literary Portraits.*

Smoking has a decided influence on the constitution. The two active principles above referred to are present in tobacco smoke, and of course are drawn into the mouth and throat, and, when the saliva is swallowed, find their way into the sto mach. If chemical experiment had not detected these principles in smoke, their effect on unaccustomed smokers—sickness, giddiness, and faintness—would indicate their presence. Faintness, almost to death, has happened from an incautious first essay with a pipe; and even old smokers have succumbed to an excessive amount of smoking. Two deaths are on record, one from smoking seventeen, and another from eighteen pipes.

"I experience a pleasure," said the accomplished daughter of Baron Cuvier, "in reading the Bible, which I never felt before; it attracts and fixes me to an inconceivable degree, and I seek sincerely there, and only there, the truth. When I compare the calm and the peace which the smallest and most imperceptible grain of faith gives to the soul, with all that the world alone can give of joy or happiness, I feel that the least in the kingdom of heaven is a hundred times more blessed than the greatest and most elevated of the men of the world."

HINT TO THE HOOKED.—If you desire to be released from a rash promise of marriage, breathe vows of love continually after eating onions.

THE ONLY ONE.—Every man believes the "only honest lawyer" to be his own—until the "honest lawyer" has sent him in his bill of costs.

A witty lawyer once asked a boarding-house-keeper the following question:—"Mr.——, if a man gives you 500 dollars to keep for him, and dies, what do you do for him? Do you pray for him?" "No, sir," he replied, "I pray for another like him."

OF COURSE.—A vocalist says, he could sing "Way down on the Old Tar River" if he could only get the *pitch.—American paper.*

An Irishman, on buying an alarm clock, observed that, as he loved to rise early, he had now only to pull the string and wake himself.

"Ah!" said Seraphina Angelica, speaking on some subject in which her feelings were warmly enlisted, "how gladly I would embrace an opportunity?" "would I were an opportunity!" interrupted her bashful lover, who had been "coming to see her" for three months, and yet had never summoned up courage to speak to the point before.

EATING.

We most firmly believe, that if animals could speak, as Æsop and other fabulists make them seem to do, they would declare man the most voracious animal in existence. There is scarcely any living thing that flies in the air, swims in the sea, or moves on the land, that is not made to minister to his appetite. The Esquimaux devour raw fish; the Tartars eat horse flesh; the South Sea Islanders are fond of dogs; the Africans relish ants and monkeys; the Chinese think rats, mice and cats, exquisite delicacies; the polished Parisian is partial to frogs; the Italians regale themselves with a jelly made of vipers; the entrails of snipes are eaten with avidity among us at game suppers by all true epicures; while the New Zealander's favourite dish is a missionary.

Perhaps, if the aforsaid animals were capable of discrimination as well as speech, they would declare the human the most voracious family. And who that is familiar with hotel and steamboat life, would deny the truth of the assertion? What valorous trencher men we are, when, after having been with difficulty kept back by bolts and bars and an army of black waiters while the supper table is being set, we dash upon the viands at the first summons of the welcome gong or bell! How the oysters, and ham, and jellies, and hot rolls, and biscuits disappear! What remorseful agonies and inexporable nightmares ensue!

GLEASON'S PICTORIAL.

ON the first of January next, *Gleason's Pictorial* will commence its 6th Volume, and will appear vastly improved in all respects, with a superb new heading, new type and dress throughout, and will be printed upon the finest paper. As the proprietor of the *Pictorial* has purchased the entire good will of Barnum's New York *Illustrated News*, and has merged that journal in the *Pictorial*, the public will reap the advantage of the concentration of the strength of the two papers upon one, both in the artistic and the literary departments. The same brilliant list of contributors and artists will be engaged on *Gleason's Pictorial* as heretofore, and a large addition is also made to the corps, both in talent and number. The most liberal arrangements have been completed, and no pains will be spared by the Proprietor to produce by far the finest illustrated journal yet published, and much superior to the present issue of the *Illustrated News*. The *Pictorial* will constantly be beautified by all that can please and instruct in art and nature, and its literary department will fully sustain the high reputation it has so long enjoyed.

The pages of *Gleason's Pictorial* will contain views of every populous city in the known world, of all buildings of note in the eastern or western hemisphere, of all the principal ships and steamers of the navy and merchant service; with fine and accurate portraits of every noted character in the world, both male and female. Sketches of beautiful scenery, taken from life, will also be given, with numerous specimens from the animal kingdom, the birds of the air, and the fish of the sea, all well present in its mechanical execution an elegant specimen of art. It will contain fifteen hundred and sixty-four square inches, giving a great amount of reading matter and illustrations, constituting a mammoth weekly paper of sixteen octavo pages.

DR. CHALMERS' WORKS.

[" *To commend these works is superfluous; they have met with universal approbation from the British press and public. That the periodical press, representing the land in a variety of religious and political opinion, should have so generally noticed them, and that too with high commendation, is a circumstance exceedingly rare, if not altogether unparalelled. They have charms for the merely literary man, and they will obtain a hearing for evangelical truth in quarters from which it would otherwise be excluded.*"—*Kitto's Journal.*

LIVER COMPLAINT,

DYSPEPSIA, JAUNDICE, CHRONIC OR NERVOUS DEBILITY, DISEASE OF THE KIDNEYS, AND ALL DISEASES ARISING FROM A DISORDERED LIVER OR STOMACH;

Such as Constipation, inward Piles, Fulness of Blood to the Head, Acidity of the Stomach, Nausea, Heartburn, Disgust for food, Fulness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and Difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots or Webs before the sight, Fever and Dull Pain in the Head, Deficiency of Perspiration, Yellowness of the Skin & Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of evil, and Great Depression of Spirits, can be effectually cured by

DR. HOOFLAND'S CELEBRATED GERMAN BITTERS.

Prepared by Dr. C. M. JACKSON, *No.* 120 *Arch street, Philadelphia.*

Their power over the above diseases is not excelled, if equalled, by any other preparation in the United States, as the cures attest, in many cases after skilful physicians had failed.

These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of diseases of the Liver and lesser glands, exercising the most searching powers in weakness and affection of the digestive organs, they are, withal, safe, certain and pleasant.

Read and be Convinced.

The "Philadelphia Saturday Gazette," says of Dr. Hoofland's German Bitters.

"It is with pleasure we recommend what are termed Patent Medicines, to the confidence and patronage of our readers; and therefore when we recommend Dr. Hoofland's German Bitters, we wish it to be distinctly understood that we are not speaking of the nostrums of the day, that are noised about for a brief period and then forgotten after they have done their guilty work. Hoofland's German Bitters is a well established, universally prized, and which has met the hearty approval of the faculty itself."

"Scott's Weekly," said, Aug. 25—

"Dr. Hoofland's German Bitters, manufactured by Dr. Jackson, are now recommended by some of the most prominent members of the faculty as an article of much efficiency in cases of female weakness. Invalids generally will undoubtedly find these of the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any physician. The reason is perfectly obvious. While by the old mode of composition, every medicine was rendered utterly worthless of scientific and injurious qualities; by this, each individual virtue only that is desired for the curative effect is procured, and the inert and obnoxious qualities of each substance employed are left behind, the operation of which tends to disease than any other medicine known to the world.

As it is frequently required that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formula by which both my Pectoral and Pills are made to the whole body of Practitioners of the United States and British American Provinces. If however there should be any one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how few only are worthy of the confidence reposed in them! Their life consists in their mystery. I have no mystery.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject, freely acknowledge to their excellencies of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before the Pills were known. Many eminent Physicians have declared the same thing of my Pills, and consequently the public are willing to certify that their anticipations were more than realized by their effects upon trial.

The Pectoral exerts a powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting wherever they exist, those derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

AYER'S PILLS,

A NEW and singularly successful remedy for the A cure of all Bilious diseases — Costiveness, Indigestion, Dyspepsia, Biliousness, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Loins, Female complaints, &c., &c. Indeed, very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person should be without a bottle of these pills, as a single dose often expels incipient disease, and checks its progress, if a number of bottles are taken, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They call to be honored or produce the deep seated and formidable distempers which load the bearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing anything before known, even of any name or medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth.

Among the eminent gentlemen to whom we are allowed to refer for these facts, are

PROF. VALENTINE MOTT, the distinguished Surgeon of New York City.

PROF. A. A. HAYES, Practical Chemist of the Port of Boston, and Geologist for the State of Massachusetts.

ISAL. MOORE, M. D., an eminent Surgeon and Physician, of the City of Lowell, who has long used them in his extensive practice.

H. C. SOUTHWICK, Esq., one of the first merchants in New York City.

C. A. DAVIS, M. D., Supt and Surgeon of the United States Marine Hospital, at Chelsea, Mass.

Did space permit, we could print a very hundred such names, from all parts where the Pills have been used, but evidence even more convincing than the certificates of the most eminent public men is shown in their effects upon trial.

These Pills, the result of many investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are composed of the best of the drugs themselves, but of the medicinal virtues only of Vegetable substances, extracted by chemical process, in a state of purity and combined together in such a manner as to insure the best results. This system of combination we have found has been found in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any physician. The reason is perfectly obvious. While by the old mode of composition, every medicine was rendered utterly worthless of scientific and injurious qualities; by this, each individual virtue only that is desired for the curative effect is procured, and the inert and obnoxious qualities of each substance employed are left behind, the operation of which tends to disease than any other medicine known to the world.

As it is frequently required that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formula by which both my Pectoral and Pills are made to the whole body of Practitioners of the United States and British American Provinces.
