

LAWN MOWERS sharpened. J. O. Stewart, Malpeque Road, Kensington.

PANTY SALE. Keir Clark's Store, Saturday, 8:00 p. m. Springfield and Kensington A. Y. P. A.

ATTENTION FARMERS! Don't miss the auction sale of tractors being held on our premises Saturday, May 29th, at 4 p. m. J. R. Rayner Equipment Ltd., Water Street East, Summerside.

FUNDAMENTAL BAPTIST CHURCH, Central Bedouque, services Sunday, May 30th at 10:45. A young people's service, 7:30 p. m. Allan Weber, special speaker. Rev. Earl Smith, pastor.

INJURED IN FALL. J. S. Perry many friends of Mrs. J. B. The Summerside, will regret to learn she is a patient in the Prince County Hospital as the result of a fall at her home in which she sustained a broken arm and other injuries.

Summerside Tennis Club Annual Meeting

The annual meeting of the Summerside Tennis Club was held last evening at 7:30 in the Town Hall with Mrs. Charles Linkletter presiding. The first matter on the agenda was the election of officers for the 1954 season, resulting in the following: Art Robinson, president; Maynard Schurman, vice president; and Bill Warwick, secretary treasurer.

The retiring officers are Mrs. Charles Linkletter, president; Ken Walker, vice president; and Mrs. Ralph Emery, secretary.

A financial report was given by Mrs. Emery. Membership, rules of the court, instruction and other matters were discussed. A gratifying number of tennis enthusiasts were in attendance and an increased membership for the season is assured. Sheila Clark was appointed to handle the printing of membership cards to be distributed to the membership committee. Adult memberships were set at \$3.00, \$5.00 for a married couple; ages 12-16 \$1.00; under 12 years .50 cents.

Wednesday and Saturday afternoons and evenings after five o'clock were scheduled for priority for adults with special consideration to be given to nurses at all times. Spectators are to be worn by all members.

Plans were made for instruction, especially of school children, and the possibility of competitions of various age groups with suitable awards was discussed.

The group was interested to hear that Mr. Donald Bauld, well known Maritime tennis player, has signified his willingness to instruct in Summerside, once a month, and to put on an exhibition match sometime during the summer; also that he will show a film of last year's finals in Australia at an early date.

Vocational School

dents taking the commerce course conducted by Prince of Wales College in the School and this along with 48 short course students taking courses of from two to six weeks duration brought the peak day enrollment to 221, an increase of 60 over last year.

With the 349 night course students this brought the combined total to 631, an overall increase of 61.

Academic Classes. Mr. McMurtry spoke of the compulsory academic classes held this year and thought that while this may possibly have lowered the average of some students it meant that nonetheless they had a better understanding of the theoretical side of their work when the instructors came to that phase of instruction.

He paid tribute to the work of the Home Economics Department and said that many girls and women from both urban and rural areas took particular interest in the sewing short courses. He said that future plans include the institution of a full year course for women corresponding to the present trade courses for young men. He said it will employ the study of practical methods in home-making including food and nutrition, sewing and textiles, laundry, child care, home nursing, knitting and other subjects.

The certificates were presented by Dr. L. W. Shaw, Deputy Minister and Director of Education, and the prizes distributed by Mr. McMurtry.

A word of warning was given the graduates by Hon. Eugene Cullen, Minister of Industry and Natural Resources, when he told them that it has always been true that a school or college course did not educate a man, "It simply laid a strong foundation on which an education of study and experience."

He said the man who relaxes just because he has finished a course will someday wake up to find his trade is away ahead of him. He urged the graduates to constantly manage their knowledge and improve their skill. He said the Province was frequently being asked to establish a minimum wage scale, but before it can do these things it must also be minimum standards of workmanship in all trades.

In congratulating those who were being sent to the future success of the school would depend to a large extent on the work they did later.

"In some degree each one of you will contribute to the success or failure of future classes, I know that those of you who work hard will be successful, and that you will contribute to making Canada an even better place in which to live."

ANNUAL SCHOOL MEETINGS

Tuesday, June 1st, at 7:00 p. m. Note particularly the time.

YOUR SATURDAY NIGHT JAMBOREE, Charlottetown Forum, beginning June 12th.

DON'T MISS "The Calamity Kids" three-act comedy by Bedouque Players, Summerside High School, Thursday, June 3rd, 8:15. 50 cents and 35 cents.

Death Yesterday

was with the Federal Department he served as a member of the Potato Promotional Committee as one of two Federal men working with the Provincially named committee.

Stressed Grade Selling. Probably to a greater degree than anyone else the late Mr. Shaw was responsible for persuading growers and shippers of the advantages of selling by grade. People soon learned that inspected cars were better and safer to buy.

It was only two years after he began his work that growers and shippers were unanimous on making compulsory the inspection of all potatoes leaving the Province. When he started in 1926 the Island had the services of only one inspector, and then only for three months of the year. Before long he had eight inspectors and now there are 36 as well as office personnel.

Mr. Shaw was a native of Des-Sable, a son of the late Mr. and Mrs. Neil Shaw, and was born there in 1883. He received his early education at the local school and on leaving worked for a time as a machinery salesman before selling insurance. He first started in the inspection service in 1926 and remained until 1931. Just five years later he returned and remained until his retirement in 1952.

Wartime Order

He once remarked that one of the biggest problems he had to handle was the large wartime order for potatoes for Great Britain. He was in charge of the grading by the inspection service and later had the pleasure of knowing that the British Ministry of Food had expressed its pleasure at the quality of the product shipped.

At the time of his death, Mr. Shaw was Grand Master of the

Prince County Fish And Game Ass'n Meeting

The monthly meeting of the Prince County Fish and Game Association was held last evening at Alberton with the vice-president, Mr. S. L. Rayner presiding. Minutes were read by the secretary, Norman MacLeod, and approved.

The secretary also presented the results of the voting on the dates for the opening of the various seasons as follows: Ducks and Hungarian partridge, Oct. 1st; pheasants, Oct. 10th; these dates had been recommended by the association with the Dept. of Industry and Natural Resources.

It was moved by Hilton Barbour, seconded by Erskine Campbell and approved by the meeting, that the hunting and fishing license for resident gunners of Prince Edward Island be increased from \$1.00 to \$2.00.

On motion by Edward Millman, seconded by Norman MacLeod, the following streams were recommended for improvement: Green's Brook, Pond, Miminozash, Marshbank's Pond, Montrose, Cane's Brook and Gard's Brook, Bloomfield.

It was decided that the annual crowd competition sponsored by the association, be continued this year. The appointment of a game officer in each county was discussed at some length and it was stated by the chairman that this matter has been taken up with the Government.

In reply to a question it was announced that the restoration of the mill dam at Gordon's Pond near Alberton was expected to be started right away. Following the adjournment of the meeting two very interesting films, "Speckles" Trout Across Canada" and "Re-spinning for Silvers and Steeldheads" were shown.

Loyal Orange Lodge for Prince Edward Island. He was also a Past Master of True Brother's Lodge, A. F. & A. M. in Craupaud.

The late Mr. Shaw was a strong supporter of the Liberal Party and took a keen interest in organizational work for it. He is survived by his wife the former Miss Edith Beer, Des-Sable, and two children, a son, Victor, and a daughter, Mrs. Stewart MacFarlane, Winsloe.

The funeral will be held tomorrow afternoon from the McLean Funeral Home to Trinity United Church with the service starting at two o'clock. Interment will be in Craupaud Cemetery.

Copter From S'ide Aids In Spraying

OTTAWA (CP)—The navy is getting into the act on the New Brunswick spruce budworm spraying program this year.

A navy headquarters announced Friday that an RCN helicopter from the naval air facility at Summerside, P. E. I., is based at Seville airfield, near Newcastle, N.B. for search and rescue duties in spraying operations. It will remain there until June 4.

The navy was asked to help during a period in which no civilian helicopter could be made available. That "hard work is welcome at any time" was the admonition given by Premier A. W. Matheson in briefly addressing the students when he presided over the 94th annual convocation of Prince of Wales College yesterday.

In congratulating those who had successfully completed all their work of the term he said it might be because they had given that extra amount of time to their studies. He suggested that those who had not quite passed all subjects not be discouraged but go on to complete their task.

The Auditorium was filled with friends and relatives of the graduates and students to see them receive their diplomas. As is customary several of the front rows were reserved for the first, second and third year students while the graduates sat on the stage in a semi-circle behind the dignitaries present.

Among the latter were His Honour, T. W. L. Frowse, Lieutenant Governor who presented the prizes and the diplomas; Premier Matheson; Mayor J. D. Stewart, D.S.O.; Hon. Keir Clark, Minister of Education; Hon. Eugene Cullen, Minister of Industry and Natural Resources; Rev. J. A. Sullivan, Assistant Rector at St. Dunstan's; Hon. Frank MacKinnon, principal of the college; Dr. G. D. Steel, former principal; Dr. L. W. Shaw, Deputy Minister and Director of Education; Sqdn. Ldr. A. Macmillan, aide to the Lieutenant Governor; and Mr. W. R. Shaw, O.B.E., who delivered the address to the graduates. Mr. Shaw's talk appears in full elsewhere in today's paper.

On the platform the graduates were garbed in the customary black gowns but down in front all the girls wore white with red roses pinned to their dresses. The heavy drapes in back of the stage bore the phrase in gold letters "Convocation 1954" while the Auditorium walls were decorated with the red and blue of the College colors.

The annual report of the Principal was delivered by Dr. Frank MacKinnon who wished the graduates "God Speed" as they left the halls of the College. His report appears in full also in today's paper. He recalled that the College was first opened in 1836 as the Central Academy.

Valictory In his Valictory address Mr. Clair MacLeod told his fellow graduates that there are many oppor-

Summerside Players Present 3-Act Comedy At Provincial Drama Festival

A small but well pleased audience witnessed the presentation of the three-act comedy "A Pleasant Surprise" by the Sum-Hi Dramatic Players of Summerside in the Empire Theatre at Charlottetown last evening.

Professor A. J. Shaw of the University of New Brunswick, who has been adjudicating plays nightly during the week for the Island Drama Festival Association, said he was pleased to see a play written by a Canadian for Canadians and about Canada. "We cannot develop acting, directing and writing without a hand-in-hand attempt in the development of the Canadian Theatre", Prof. Shaw said. Mr. Norman MacDonald, D.A., the Island author of the play, deserves credit for his courage.

"The basic idea was good but I feel an improvement would have been effected had it been simplified some. There were flashes of brilliant dialogue but not dealt with quickly enough," he said. "Stage furniture and placing were rated as very good but objection was taken to flowers placed on tables interfering with the view of the players. 'I like to see their eyes,'" he said. "All props should be used with a view to creating an impression of reality."

Prof. Shaw had no criticism regarding costumes but he was not satisfied with the makeup. "I wouldn't like to have seen some lines in the mature characterizations," he said. Veronica Day (Mary Shaw) took acting honours and stole the show whenever she appeared and livened the show up. "She is a very good comedienne," Prof. Shaw said in his review of the characters.

Elsie Halliday (Elizabeth Nicholson) and Jane West (Marion Hardy) unfortunately have a sameness in voice which was confusing. Prof. Shaw believed these parts should be re-written. Dale Chester (Alban Gallant) was difficult to hear at times while Joe Hill, (Don Cameron) was heard at all times and showed good timing. Blake (J. R. Murphy) was overdrawn and almost burlesque. "It should like to see this reduced a little," Prof. Shaw said. Peter Cranston, (Lawrence Gallant) was a role with not much to work with while Dawn Regan (Diane McQuarrie) did a small role reasonably well in which a little more mystery might have been interjected.

Prof. Shaw rated the performance of Elsie Halliday (Margaret Shaw) as a good piece of acting and second in the production. Honey, played by Tony Spenceley "could have improved his interpretation by interjecting more vigor, and more punch into the third act after he had undergone a service in which he proved himself a hero," he said.

Mrs. Halliday (Elizabeth Strong) played a stock characterization with a tendency to monotony. "All in all the production was a very good attempt but needs punch, vitality get-up-and-go. The cast obviously worked hard and I am sure meets with our commendation," Professor Shaw said in summing-up.

Following the performance, a reception for Professor Shaw was held in the home of Mr. and Mrs. Harry Morris, graciously placed at their disposal for the purpose. In the get-together of the various directors, a small gift in appreciation was made to Prof. Shaw, followed by a buffet lunch which was greatly enjoyed.

S'ide Aces Hockey Team Annual Banquet

The Summerside Aces hockey team held their annual banquet last evening at Howard's Restaurant with coach, Layton Schurman, acting as master of ceremonies. All team members were on hand except Edgar Taylor. Grace was said by Mr. Ken MacDougall after which the Maritime intermediates, "B" champions sat down to a delicious lobster supper. The toast to the Queen was proposed by the master of ceremonies, coach Layton Schurman.

At the conclusion of the supper Mr. Schurman called the meeting to order and outlined the purpose of the gathering. He called on Mr. Ira Crozier to present the trophies, one for the all-star selection in the South Shore League and known as the ladies' trophy and won by and presented to Paul Schurman, and the Horace Wright trophy, emblematic of first place in the South Shore League won by the Aces. This was presented to captain Garth Gay.

Dr. A. R. Grant was then called on by the chairman and he presented his personal trophy to captain Garth Gay as the most valuable player on the Aces' lineup. Dr. Grant's trophy has been used for competition for a number of years. He congratulated Garth Gay on having won it and said he was very happy to be present on this occasion.

James Hogan, of the Physical Fitness Department, presented the Physical Fitness trophy to captain Garth Gay. This trophy is emblematic of the intermediate "B" championship of Prince Edward Island.

Dr. Gilbert Gallant, club physician, was presented with a gift for his medical attention and service to the teams during the season. Thane Baglole, team manager, was also presented with a suitable gift in recognition of his services to the club.

The chairman then called on Bob Schurman to present to each member of the team a jacket. These were white trimmed with gold, and in making the presentation Mr. Schurman said that this was the most successful team within his memory. They not only won hockey honors, he said, but each man was a credit to the team and to the great game of hockey. The jackets were presented by the firm of R. T. Holman Co., Ltd., Summerside.

The following members of the team received jackets: Dee Lefurtey, Claude Gaudet, Garth Gay, Vance Harris, Maynard Schurman, Thane Baglole, Allison Farmer, Stan Gay (stick boy), Maurice Cannon, Al Romaine, Peter Pope, Stanley Gallant, Carl Woodsie, Paul Schurman, Leo Shields, Dave McInnis, Clayton Mill, Layton Schurman, and Edgar Taylor who was not present to receive his jacket.

Ken MacDougall was then called on by the chairman. Mr. MacDougall spoke of the fine team spirit, keen competition, and cooperation between team members, manager and coach and of the splendid results for those going out from college into every walk of life whereby they may do their part to help bring about better conditions in which to live. He noted that while the students had been concerned with studies and developing their minds there had been many wonderful scientific discoveries and experiments.

Speaking briefly on the social side of campus life he said one of the most important aims of education is to develop the personality. The ability to converse with, and to understand them, to cultivate balance and poise, is an asset which a student should acquire in a college course.

He expressed the deep appreciation of the graduates to their parents, and to the teachers for everything that had been done for them. To the students of the other three years he told them the torch was now theirs and asked they hold it high so the standard of Prince of Wales may not fall.

Principal Reviews

keep at their tasks until they have overcome their difficulties. There is some consolation in realizing that practically every successful person has had his failures along the way of life. It is remarkable how many of the eminent brag about their failures and point out how they overcame them. Indeed there is considerable truth in the fact that persons who have never overcome a failure don't know life. So to those who still have something to clear off we say, keep at the job until it is finished and rely on all of us here for any assistance and encouragement we can give you.

The cultural and athletic activities of the College also have been successful. They are an important part of any institution, for they give the student the opportunity of supplementing what he learns in books with what he learns from mixing with his contemporaries, and this last is a part of education which should never be neglected.

Use of Facilities Convocation, for those of you who are leaving us, should be an occasion for serious thought of the future. One thing you should realize right now is that the value of the educational equipment you have received thus far depends completely on how you use it. Diplomas are useful only if you fulfill the obligations they represent. Some make the mistake of emphasizing the mere possessing of matriculation or of college graduation. They are labels; the possessor must still justify the label.

Those who are going to higher studies are well advised to seek the best possible courses available. Educational facilities are like everything else, there are different qualities. The best is that which gives sound training as well as information, and at your age you can do nothing better than place yourselves in the hands of the ablest teachers you can find. In this connection I often think the old system of apprenticeship is too frequently forgotten. That system enabled the young learner to study under a master craftsman, who taught him to work, criticized his efforts, and gave him the benefit of great knowledge and experience. Despite all the theories of education, this is still the best system of teaching whether in the arts and sciences, the professions, or the skilled trades, and it should be an important consideration in your proceeding to higher studies.

Purpose of Education "The purpose of education has been debated often, and, since educational authorities can't agree on it, it should not be surprising if students are sometimes confused. Whatever else it may involve, education is primarily concerned with developing the most remarkable machine in the world, the human brain, and providing that brain with knowledge, the ability to accumulate more knowledge itself, and the skill of putting that knowledge to work. Like any other

Another Danger

"Another danger to democracy is irresponsible power. In the history of nations, groups, institutions, and individuals there is no greater menace than, what Lord Acton called, the corruption which so easily results from power. Men who wield power without the character, knowledge and common sense to wield it well can cause much mischief in any walk of life. You who will be the citizens of tomorrow should resolve at the outset of your career that you will take yourselves seriously but not commit the fatal error of taking yourselves too seriously and getting an inflated notion of your own importance. Be humble and careful in the exercise of whatever power is entrusted to you. Titles, position and recognition are not things to be striven for by themselves; the performance of useful work well and the use of power intelligently and responsibly will be the only real measure of your success. Society needs leaders today as it never did before and you will have many opportunities to contribute your share of abilities to the common cause.

"Above all else, democracy today requires justice, integrity, fearlessness and love. Simple virtues, yes, but qualities which are too often forgotten in the quest for that illusive thing, 'success'. And they are qualities without which democracy has no hope of withstanding rival dogmas in the competition for world power. You might as at the threshold of your careers determine that whatever else you do, you will retain those fundamental features of character without which ambition will turn to frustration and 'success' to failure. Wordsworth's 'Happy Warrior' illustrates the point: 'He fixes good on good alone, and owes To virtue every triumph that he knows; Who, if he rise to station of command, Rises by open means; and there will stand On honourable terms, or else retire, And in himself possess his own desire; Who comprehends his trust, and might be the same Keeps faithful with a singleness of aim; And therefore, does not stoop, nor lie in wait For worldly state.' "These, graduates, are the last words from us who have enjoyed your company in this great institution. You may depend upon us to remain your friends, to watch your careers with interest, and to give you any help or encouragement that is within our power. Good luck to you all and God speed."

The New Age

"The graduates of today are going out into, what has been called by contemporary scholars, — the mass state, and these graduates should give some thought to the era of democracy today is the age of the organization, the group, the party, the society, the crowd, and the numerous methods of influencing people through propaganda, advertising, programs, campaigns. Never before have there been so many instruments for directing public opinion, — radio newspapers, books, magazines, movies, television. Today, there seems to be no end to the ways in which citizens can be classified influenced, and led.

"The year has had its address for the College last two old friends, Mrs. S. N. Robertson passed away last fall and left behind many who remember her, not only as the late Principal's wife, but as a classical scholar and a great teacher. She visited the college from time to time, and I always valued her friendship and her many stories of the past at Prince of Wales.

Senator J. Walter Jones died this spring in Ottawa after a distinguished career in the agricultural and political life of this Province. Those who knew and understood him appreciate the loss of a rare and great figure, and it is said in Ottawa that his short stay in the Senate revealed him as one of the most effective of federal parliamentarians.

"Illness deprived us since January of the services of our respected Registrar, Miss L. H. Seaman, to the regret of the host of friends she made during her years on the staff of the College. It is pleasing to note that her recovery has been steady and it is hoped that it will soon be complete. Miss Ella M. McGrath, who retired from our Commerce Department four years ago, has also been seriously ill and I am sure her former colleagues and students join in sending her sympathy and good wishes.

Despite all the theories of education, this is still the best system of teaching whether in the arts and sciences, the professions, or the skilled trades, and it should be an important consideration in your proceeding to higher studies.

Purpose of Education "The purpose of education has been debated often, and, since educational authorities can't agree on it, it should not be surprising if students are sometimes confused. Whatever else it may involve, education is primarily concerned with developing the most remarkable machine in the world, the human brain, and providing that brain with knowledge, the ability to accumulate more knowledge itself, and the skill of putting that knowledge to work. Like any other

delicate apparatus, the brain needs to be broken in. You should look upon your school and college days as a golden opportunity for developing your brain to its highest capacities, for it will be directing you for the rest of your lives. Secondly, the world is full of ideas and facts. Youth is the time to score up a logical and regulated supply of them, for what's the point of starting through life without providing yourselves with some means of living it well. Develop the ability to think so that you can devise conclusions and decisions from your supply of knowledge and put them into practical use.

"One of the most alarming features of many educational facilities is that the accumulation of facts and skills is often attempted without training the brain. This accumulation can be carried on to a very limited extent unless the brain is prepared. Medical scientists tell us that the brain is not being used to anything like its capacity and man's antics in this twentieth century warn us that it is time something was done about it. You who are young can do something about it — use to the fullest possible extent the abilities which God has given you, seek knowledge and experience while you have the time, and learn to work so that later you can put it all to good use. If you do this you'll have an education.

"You might remember, too, that no one owes you an education and no one can give you one. Despite some enthusiastic theories who mistake education for a commodity or entertainment, it is a social service which can be given and every effort can be made to give you access to it; but you must get it for yourselves. If you make the effort the rewards are magnificent, if you don't make the effort the result is nothing.

"And isn't this true of life? No one can live it for you; you'll get out of it precisely what you put into it, in any profession, in any employment.

Cultural Activities

"On the cultural side, this year saw an ever-increasing interest in the field of music. Because of the activities in some schools, students are coming to us with a background in music which enables them to keep up their interest in it. This is a most encouraging situation, for music is not just a form of relaxation but also an educational medium which is hard to beat as a means of appreciating beauty and quality. The student body was remarkable this session in the number of pianists, church organists, instrument players, soloists and ordinary music lovers.

"The girls' chorus continued under the capable direction of Miss E. Lillian MacKenzie and maintained the high standard of previous years. Last fall the boys organized and in a few months had a splendid male chorus. These choruses helped to create excellent public appearances and they and their director have received the enthusiastic congratulations of the whole college.

"Music and dramatics combined in one of the most enjoyable stage shows to be seen in this city in recent years. Entitled "Fables of '64", this production was a credit to its organizers and the many who performed in it.

"The Samuel Robertson Memorial Lecture was delivered by Dr. Thomas H. Raddall, one of Canada's most distinguished authors. The address was a worthy addition to a series which has proved a popular memorial to Dr. Robertson.

"The year has had its address for the College last two old friends, Mrs. S. N. Robertson passed away last fall and left behind many who remember her, not only as the late Principal's wife, but as a classical scholar and a great teacher. She visited the college from time to time, and I always valued her friendship and her many stories of the past at Prince of Wales.

Senator J. Walter Jones died this spring in Ottawa after a distinguished career in the agricultural and political life of this Province. Those who knew and understood him appreciate the loss of a rare and great figure, and it is said in Ottawa that his short stay in the Senate revealed him as one of the most effective of federal parliamentarians.

"Illness deprived us since January of the services of our respected Registrar, Miss L. H. Seaman, to the regret of the host of friends she made during her years on the staff of the College. It is pleasing to note that her recovery has been steady and it is hoped that it will soon be complete. Miss Ella M. McGrath, who retired from our Commerce Department four years ago, has also been seriously ill and I am sure her former colleagues and students join in sending her sympathy and good wishes.
