

**BRITISH WAR DEAD HONORED**

West Berlin Mayor Willy Brandt, left foreground, leaves British military cemetery in West Berlin Tuesday on the

25th anniversary of the start of World War II. With Brandt are Otto Bach, president of the West Berlin parliament,

and Maj. Gen. Peel Yates, right, British city commander. Brandt laid a wreath com-

memorating the war dead. (AP Wirephoto via cable from Berlin)

**Backgrounds Probed Of Arms Raid Bandits**

MONTREAL (CP) — Insp. Roland Perron said here police are not ready "at this stage" of their investigations to link Saturday's gang raid of a small firearms shop to any specific organized terrorist group.

Insp. Perron, of the police's terrorist squad, said the four bandits captured after a gun battle in which two persons were killed have revolutionary tendencies.

"That's all I can say. I can never tie them up with any organized terrorist group. Not at this stage."

Leslie McWilliams, 58, a vice president, and Alfred Pich, 57, a gunsmith, died in the gun-battle that broke out when police intercepted the bandits at the retail store of the International Firearms Company on Bleury Street in the city's financial district.

One of the bandits was shot to the thigh, and is under heavy police guard at St. Luke Hospital. Montreal Island's combined police forces, numbering some 4,000 men, are spreading

a dragnet for a fifth bandit still at large.

**SHOT BY POLICE** — Police said Pich may have been killed by a police bullet in the confusion.

At the height of the shooting, Pich managed to slip unnoticed into the cellar from where he emerged a minute later armed with a semi-automatic rifle.

Insp. Perron said a police officer may have mistaken Pich for one of the bandits when the gunsmith appeared as a dark figure at the top of the stairs. The policeman called out a warning in French for the man to throw down his gun. When he didn't, the policeman fired. Pich's body was found later in a rooming house.

Insp. Perron said the identities of the persons firing the bullets that killed the victims would be definitely known until results of autopsies are available.

He refused to identify the captured bandits. "That will come out later," he said.

**Harnessing Of Atom Called Only Solution To Power**

By JOHN TALBOT  
GENEVA (Reuters)—United Nations Secretary-General U Thant told the third atoms for peace conference here that harnessing the atom offers the only way of meeting the world's growing power demands.

He said the quest for a controlled thermo-nuclear reaction had become virtually the common endeavor of the scientific community of many nations.

The conference, attended by 4,000 scientists and other experts, has accepted 750 papers from 37 countries, including Canada. Most of them deal with the experience of various nations with nuclear power plants.

In a message to the conference, Soviet Premier Khrushchev expressed hope delegates would make a new major contribution to scientific collaboration.

The Kremlin leader asserted the military atom was an obstacle to full development of the peaceful uses of the atom, and urged a rapid solution to the problem of disarmament and renunciation of any steps which might lead to the dissemination of nuclear weapons.

Khrushchev's appeal appeared to be aimed at a proposed multilateral nuclear force

for NATO, which the Russians claim would lead to the spread of atomic weapons.

U Thant said international cooperation is imperative if the smaller and less developed countries are to share in the advance of more industrialized nations. He predicted the peaceful uses of the atom would eventually be regarded as the work of all mankind rather than the exclusive preserve of individual nations.

Professor Vasily Emel'yanov of the Soviet Academy of Sciences, who presided over the conference, said the power of the atom must not be buried "under the fragments of a vanishing civilization."

Canadian scientists said Canada is likely to step up construction of nuclear power plants about 1980, but until then little more than a prototype plant would be in operation.

The Canadian paper, drawn up by Dr. W. S. Lewis and T. G. Church, both of the Chalk River, Ont., nuclear laboratories, said forecasts indicated increasing demands for electricity and by 1980 harnessing of minor vicious water power resources would be essentially complete.

**Centennial Project Selected By Ontario**

TORONTO (CP) — Ontario's centennial project will be a centre of science and technology costing at least \$5,000,000 and located in the Don Valley in the Metropolitan Toronto area.

But even the men behind it know little more than that.

Premier John Robarts, announcing the project at a press conference Monday, said: "We are right at the beginning. Many plans have yet to be made."

John Gale (Crest of Toronto), appointed first chairman of the board of directors, could not say how many buildings would comprise the first stage, scheduled for opening July 1, 1967, the centennial of Confederation.

"We just don't know which in-

best yet. It is too early to crystallize plans."

And the center's first permanent director, Dr. George MacBeath, could give no more than a general outline of what the centre would contain.

Research was proceeding into appropriate spheres of interest for display, based on a story line on the developments of inventions in Ontario in the past and present and their extension into the future.

The centre was guaranteed at least \$3,000,000 for the initial cost. The federal government has agreed to match dollar for dollar the province's contribution, up to a maximum of \$2,500,000. Other donations were expected from business sources.

Dr. MacBeath, 40, takes up

**Output Of Household Goods Shows Increase This Year**

By JOHN BELANGER  
Canadian Press Staff Writer

Production and shipments of household durable goods rose in the first five months of 1964.

Recent figures show that more refrigerators, freezers, stoves, television sets and radios were produced and shipped in the January - to - May 1964 period than in the corresponding 1963 period.

Of all household durables, radio sets remain the top seller. In the period, 336,100 radios were made compared with 256,300 in the 1963 span, while 317,700 were shipped compared with 272,000.

Much of the increase can be tied to car radio sales, which is at its peak today. He was formerly director of the New Brunswick museum at Saint John.

More administrative appointments will be made soon.

rose 33 per cent compared with the 1963 period.

Production of television sets also increased, rising to 198,900 compared with 188,500 in 1963, while shipments totalled 162,000 sets compared with 147,000.

The rate of increase of refrigerators dropped in the 1964 period, but nevertheless posted an 11.5-per-cent gain. Production was 128,100 units compared with 130,900 while shipments were 134,900 compared with 121,200. More than 82 per cent of Canadian households own a refrigerator.

**MAKE MORE FREEZERS**

More home and farm freezers were made in the five-month period. Production rose by 10 per cent to 65,500 units compared with 59,400 in the previous year. Shipments of 51,900 units totalled 53,000 units compared with 52,400.

Much of the rise in production can be related to the high level of house construction evident in early 1964. Strengthening of this demand during the later months of the period also contributed to the gain.

Despite a healthy economy and buoyant business prospects, business failures in Canada during the year's second quarter rose sharply. Dun and Bradstreet of Canada Ltd. said failures totalled 693 for the three months ended June 30 compared with 576 for the corresponding 1963 period.

The firms left liabilities of \$12,944,000 compared with \$11,792,000 last year.

Most of the failures came in the retail trade category. A total of 268 firms failed in the three-month period compared with 272 in the comparable 1963 span. They left liabilities of \$11,077,000 compared with \$8,232,000.

Quebec was the most failure-prone province with 319 failures compared with 213. Liabilities totalled \$17,138,000 compared with \$12,623,000.

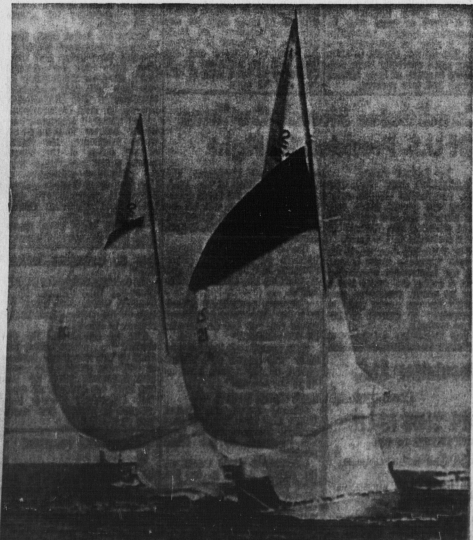

For the six months ended June 30, business failures in Canada totalled 1,200 compared with 1,116 during the corresponding period.

The firms left liabilities totalling \$81,284,000 compared with \$62,994,000.

Ford Motor Co. of Canada Ltd. unveiled its 1965 models at Winnipeg last week — but didn't reveal specifications. The showing was to a group of Ford dealers. Reports say Ford lines are straighter, more angular in 1965.

A new brewery in Quebec will be in operation by spring, 1965.

Quebec City businessman William P. O'Malley last week announced plans for a \$1,500,000 brewery — to be called O'Malley's Brewery Quebec. The 2.5 million capacity plant will cost \$1,500,000, he

**EAGLE WINS AFTER FIVE LOSSES**

American Eagle 210 leads rival Constellation by a few seconds in spinster run of race Tuesday at Newport.

R.I. The Eagle went on to win by 1:37 for her first victory after five defeats by Constellation in Amers-

Cup trials to pick a defender. Race was held in light variable winds. (AP Wirephoto)

**BACK-TO-SCHOOL SAVINGS**

SALE ENDS SATURDAY SEPT. 5

**Girls' Matching CARDIGANS and PULLOVERS**

- Classic long sleeve long sleeve pullover
- Sizes 8, 10, 12 and 14
- Matching white, red, dark brown and navy

Reg. 2.98  
2.57 each

**2 FOR 4.97**

**BOYS' WINDBREAKERS**

- Blue, loden, red and brown
- Lightweight warmth
- Laminated with rayon lining
- Heavy duty zipper
- Sizes 4, 5, 6, 8x

Reg. 3.98  
**2.97**

**Boy's and Girls Cotton CORDANA JACKETS**

- Assorted styles and colours
- Sizes 4, 6 and 8x

REG. 2.98  
**1.97**

**Girls' TAILORED SKIRTS**

- White, pink and blue
- Sanforized cotton in short and long sleeve
- Tailored classic style
- Sizes 7, 8, 10, 12 and 14

Reg. \$1.79 - \$1.98  
**1.47**

**GIRLS SKIRTS**

- Assorted plaids
- Italian wool and is knife pleated
- Sizes 7, 8, 10, 12 and 14

Reg. \$3.98 - \$4.98  
**2.47**

**BULKY CARDIGANS**

Classic styling in 100% wool and assorted colours. Sizes 8, 10, 12 and 14. Reg. \$3.98 ..... **3.17**

**GIRLS JACKETS**

Pea jacket styling with patch pockets. Cotton Cordana in red, blue, brown and green. Sizes 7, 8, 10, 12 and 14. Reg. 3.98 ..... **2.97**
