

THE DAILY EXAMINER  
NOVEMBER 10, 1881.

Halifax vs. Hamilton.

HALIFAX is agitated because it has not, in a recent publication, been placed third in the list of the "Cities of Canada." It seems that in the opinion of the author of this publication, Hamilton occupies the envied position. Any prominence which Hamilton has is due to the enterprise and industry of her citizens. Were Halifaxians, with all their advantages, imbued with the spirit which has made Hamilton great, she might now be ranked among the first (not third or fourth) of Canadian cities.

Beans.

We note that in Montreal quite a lively trade has been going on in beans, buyers paying as high as \$2.50 and \$2.60 per bushel for white ones. Beans grow very well on this island. Why do not our farmers go more largely into this culture? The prices abroad are usually pretty good for them, and even should they occasionally fail, beans are, like potatoes, always good and useful at home.

English Land Reform.

THERE is an agitation abroad in England for a Land Reform; but so far it lacks definiteness and leadership. Lord Hartington has extinguished the hopes expressed in some quarters that he might put himself at the head of an English agitation based on the principles of the Irish Land Act. In a recent speech he said he considered the present distress of English farmers due to the weather rather than the landlords. He, however, repeated his former declaration that the farmer is entitled to relief by legislation from the present system, so far as it is artificial and unsound, declaring that he favored legislative security for the tenant's capital, labor, and resulting improvements, but he was opposed to the notion that the tenant was entitled, in consequence of improvements effected under a co-proprietary right in the soil. He urged that the bad times be fought through by the co-operation of all classes interested in agriculture. The reductions which English landlords are voluntarily making in the rents will doubtless allay, to a great extent, the agitated feelings of unfortunate English farmers.

The St. John Cotton Factory Company.

This Company has been organized with a capital stock of \$200,000, in 2,000 shares of \$100 each. The directors are Messrs. J. H. Parks, Thomas Furlong, Hon. Thomas R. Jones, Alex. Shives, Robert Turner, N. S. White, J. DeWolfe Spurr, Hon. Isaac Burpee, T. W. Daniel C. R. Coker, William Elder, Thomas McAvity, jr., John McGuiggan, R. P. Starr, and Dudgeon Breeze. A call of 10 per cent has been authorized. Mr. Jones in moving that the provisional directors be authorized to make such arrangements as may be necessary now for preparing the site and procuring building material, so as to facilitate building as early as possible next year, said that—

"Any gentleman in the dry goods trade, knowing the profits that had to be paid on goods to the cotton mills at present existing, would see the profit of such an investment as this. He did not know any stock in Canada which paid better than cotton mill stock. Six months ago he ordered 120 bales of grey cotton, and he is seventy-five bales short now, and has to beg and pray for his supplies; and it is the same experience of all other dealers in Canada to-day. The difficulty is that there is not half the supply which is necessary for the demand. He believed a cotton mill would pay better than any bank stock. He was glad to see present at the meeting so many working people taking an interest in this enterprise. He liked to see such persons taking hold of the matter. He believed that if all would pull well together they could make their enterprise a success. It is necessary for the manufacture of cotton to have a humid atmosphere, and this great natural advantage St. John possesses. He affirmed that in twenty years the bulk of the cotton manufactories would be found on the seaboard.

In his speech at Quebec in answer to the address presented by the Governor of Quebec, the Marquis de Lorne said: "My love for the Dominion is fully shared by the Princess, on whose behalf I beg to thank you for your kind expressions. She will, I know, also share my contempt for the awkward attempt made by some whose sex must remain doubtful, to turn her shattered health into a weapon against your invincible loyalty."

Upon this the Quebec Chronicle remarks: "There is one paragraph in the speech, however, which no one can read unmoved. It is in allusion to the health of the Princess, and the contemptible attacks of London Truth, on the first lady in the land. We have not referred to this society paper's disgusting and untruthful sneer at Her Royal Highness, because we thought that the less publicity such villainy secures, the better it is for all concerned. Since, however, His Excellency has seen fit to allude to the matter publicly, and to express his contempt for the author of 'double sex,' we willingly describe as 'doubtful,' we have no longer any hesitancy in doing so. The attack was not unmanly and all the more venomous, repulsive perhaps, because the perpetrator of it knew full well that he was safe from the process of law and the cowhide. Had the same scurrility been leveled at the wife of the humblest citizen of any community, La-bouchere would soon have been made to repent his low rhyalry, and no one knows this better than himself."

The Norwegians are world-renowned sailors. More than 1,000 Norwegian vessels entered New York harbor last year, and seven times as many traded to other ports. These employed 50,000 seamen; 12,000 more are engaged in the fisheries; and yet Norwegian sailors are to be found on the merchant ships of all nations.

Archbishop McHale.

The death of the Most Reverend John McHale, D. D., Archbishop of Tuam, is announced. This prelate (says the Halifax Herald) was one of the foremost Irishmen of his age, and his name will go down to posterity linked with those of Erin's greatest sons. Though small in stature he had a marvellous intellect, and was spoken of by the famous Daniel O'Connell as "one of the Lions of the Tribe of Judah." Dr. McHale was born at Tubbernavine, Mayo, in 1791, and educated at the celebrated Maynooth College, in which he afterwards became Lecturer and Professor of Dogmatic Theology. After filling those positions for eleven years, he became Coadjutor Bishop of Killala, and on the death of Dr. Kelly, some years later, Dr. McHale succeeded that eminent divine as Archbishop of Tuam. While a Professor at Maynooth he published a series of controversial letters on the Protestant Church in Ireland, Bible Societies, Catholic Emancipation; and a work on the Evidences and Doctrines of the Catholic Church, which was very shortly afterwards translated into the French and German languages. He afterwards published over his own signature a second series of letters on Catholic Emancipation, which attracted great attention; these were followed during the Melbourne administration by another series on the Church establishment and education. Dr. McHale was a great politician, as well as a great preacher, and has probably wielded as great an influence in the Irish politics of the last half century as any living man. Oftentimes he has been opposed to the majority of the hierarchy, but he invariably saw the triumph of the cause he espoused. He took a foremost part in the agitation for the dis-establishment of the Protestant Church in Ireland, for the abolition of University tests, and for the reform of the Land Laws. He was one of the strongest, most persistent and most brilliant advocates of the Land League, but could not support Mr. Parnell's "No Rent" programme; and one of his last public acts was to write a letter denouncing that policy. As a pulpit orator Dr. McHale was almost as well known in England, and on the Continent, as in Ireland. His sermons delivered in Rome in 1832 were immediately translated into the Italian language. He had a passionate love for the Irish language, and used it on every suitable occasion. He translated into the Irish and published over sixty of Moore's "Irish Melodies" in the same precise metre as the original. In 1861 he published a large volume comprising six books of the "Iliad," with a corresponding Irish translation in heroic metre. He also published the Pentateuch, in English and Irish translations, accompanied with notes and comments. The death of no other man in Ireland would, at the present moment, be so universally and sincerely lamented, as will be that of the venerable and good Archbishop, who has just been gathered to his fathers.

A rich find of gold has been made on the shores of Lake George, Yarmouth, N. S., and prospecting licenses, covering upwards of one hundred acres, have been taken out by Charles Annand, of Halifax, and R. Balfour Brown and David Cowan, of Yarmouth.

A RECENT traveller in Germany and Switzerland says that thousands of girls in these countries cultivate their hair as carefully as a farmer does his crops, and once a year it is cut off and sold to the hair merchants. Swiss girls have the finest hair, and the prices vary from 25 cents to \$35 an ounce.

GOLD DISCOVERIES IN NOVA SCOTIA.—A correspondent writing from Milford Corner, near River N. S., says Abram Toney, a young Indian, who lives at Kempville, Yarmouth Co., has discovered a rich gold bearing quartz, in that vicinity. He is anxious to dispose of his discovery to some good man who would treat him fairly. He has several specimens of his find.

PRIVATE LETTERS from Anticosti report the utmost poverty and destitution from the failure of the fisheries and the partial failure of the potato crop. Whole families have been living on clams for weeks. Some time ago the destitute people broke into the Government store and seized the supply of provisions there, thus staying off starvation for a time. Diphtheria and slow fever prevail, and have proved fatal in many cases. On Saturday, the Government steamer "Napoleon" brought to Quebec 132 of the sufferers who were temporarily lodged in the immigrant sheds at Point Levi.

ELEVEN schooners entered Halifax on the 8th inst., with produce from P. E. Island. Nine of them are as follows:—Mariner, Cardigan, 2000 bush potatoes, 100 do turmps; A. McRae, Cascumpec, 2100 bush and 15 bbls potatoes, 30 tubs butter; J. H. Hitz, Charlottetown, 1927 bush potatoes, 250 do oats; Minnie A. Charlottetown, 973 bush potatoes, 1269 do oats; Lion, Charlottetown, 1500 bush potatoes, 100 do turmps; Ida May, Charlottetown, 2400 bush oats, 209 do turmps, 107 do potatoes, 7 pigs; Sadie, Georgetown, 1300 bush potatoes, 245 do oats, 14 do turmps, 4 pigs; E. D. Myra, Georgetown, 1400 bush potatoes, 118 do turmps, 8 do barley; Pioneer, Murray Harbor, 1300 bush potatoes, 80 do turmps, 40 do oats.

HON. PETER MITCHELL left for the North Shore last evening, a large body of friends collecting at the "Royal" to bid him good bye, and many going to the I. C. R. station to see him off. Mr. Mitchell's stay in St. John has been rendered particularly pleasant by the warm welcome he has received on every hand. His visit has partaken largely of the character of a standing levee, his time having been chiefly occupied in receiving the greetings of friends and admirers. Mr. Mitchell was tendered a lunch at the Club on Monday, and yesterday he managed to get time enough to himself to visit a few of our manufacturing establishments, where he found business brisk. His friends were pleased to find him in such excellent health and looking so well, and were not less gratified to learn that he retained all his old and deserved popularity in St. John.—St. John Sun.

A correspondent of the London Times resident in Armenia gives a gloomy account of the manner in which the Turkish Government has observed the 61st article of the Treaty of Berlin in so far as Armenia is concerned. By that article the Porte pledged itself to take measures to protect the inhabitants of those provinces where Armenians are found, but the provision still remains a dead letter. The condition of Armenia, he says, is worse now than it was when the treaty was signed. The Armenians are anxious to procure better educational facilities, but it is impossible for them to make progress while they are liable to find even their schoolhouses plundered of their contents.

The steamer Faraday will sail from Gravesend this week on another ocean cable mission. Her first work is to repair the first cable, the interruption in which proceeds from a cause not known, but is about 1,000 miles from the British shore. After that work is over she will proceed to Nova Scotia to begin laying the shore end and intermediate section of the second cable for the American Telegraph and Cable Company, about 1,700 miles of which have been laid. It is surprising how closely the electricians can approximate to the point where a break occurs. In some instances they have divined within half a mile of the spot.

The following is a statement of the revenue and expenditure on account of Canada as by returns furnished to the Finance Department to the night of the 31st of October, 1881:—

Revenue table with columns for item and amount. Items include Customs, Excise, Post-office, Public works, Bill stamps, Miscellaneous, Total Revenue, Expenditure, and Total.

THE CATTLE SEASON OF 1881. With the past week virtually closed the "Western cattle" season of 1881. Under that head are included all shipments from beyond the Missouri, excepting through Texas. "The supply," says the Chicago Tribune, "was much larger than ever before, but the expansion of the canning business has more than kept pace with the increased receipts, and not only have the Far West shippers found a quick market for all their cattle, but at prices showing an average advance as compared with the season of 1880 of from 50c to 75c per 100 lbs. The quality was better, and in every way the season was more satisfactory than in past years."

NEWS NOTES.

ROVE is to have a universal industrial exhibition in 1885.

The revenue of the Dominion for October, 1881, was \$2,714,037.25, \$228,313.35 more than for October of last year.—Toronto Globe.

It is said that the rage for building high speed locomotive engines has spread to Montreal, and that the Grand Trunk authorities are contemplating one which will run one hundred miles an hour.

LIEUTENANT-COLONEL IRVINE, of the North West Police, holds that the grazing facilities of the fertile belt are quite superior, and he predicts that our North West is bound to be the granary of the world.

THE N. P. is building five cotton factories in the Maritime Provinces that will employ not less than 2000 hands. It has also enabled the proprietor of only ante-N. P. factory in these provinces to increase his force from 150 to 400.—Moncton Times.

A RICH find of gold has been made on the shores of Lake George, Yarmouth, N. S., and prospecting licenses, covering upwards of one hundred acres, have been taken out by Charles Annand, of Halifax, and R. Balfour Brown and David Cowan, of Yarmouth.

A RECENT traveller in Germany and Switzerland says that thousands of girls in these countries cultivate their hair as carefully as a farmer does his crops, and once a year it is cut off and sold to the hair merchants. Swiss girls have the finest hair, and the prices vary from 25 cents to \$35 an ounce.
