ford Munroe and daughter Heather of Rothesay, N. B. Mr. Munroe is employed for the summer at Borden by the C. N. R.

HISTORIC SEAT

The oldest parts of Lambeth Palace, seat of the Archbishop of Canterbury, date from the 13th century.

QUICK KNOCKDOWN

The new boxing ring recently installed in Madison Square Garden can be knocked down almost as fast as some fighters we could name. This is important to the Garden, with its quick-change schedule of sports events, from boxing to basketball to hockey and back to boxing again. Made of lightweight aluminum, this ring promises to be more than a match for the toughest heavyweight.

Aluminum is constantly making news in our own sports world. Anglers, yachtsmen and other strenuous types go for the light, strong, non-rusting equipment made by Canadian manufacturers from Canadian aluminum. Aluminum Company of Canada, Ltd. (Alcan).

Now Goodyear makes a great tire even greater!

New 1954 All-Nylon Cord Super-Cushion Super-Cushion!

Over 750,000 smashing, pounding blows were taken by these All-Nylon Cord Super-Cushions driven day after day over railroad ties. Amazing result: no tire body damage of any kind! Not one broken cord!

1954 IMPROVEMENT NUMBER 1

Goodyear's exclusive 3-T cord process, plus a new tread design, result in greater mileage than ever before. The new 1954 All-Nylon Cord Super-Cushion gives almost 1/3 more safe mileage than most motorists have ever known.

The new 3-T cord process... requiring Tension, Temperature and Time... triple-temperers or "sets" tire cords at the exact point where their strength and resiliency are greatest. 3-T cords result in longer tread wear and greater resistance to blowout dangers. It's another Goodyear first!

In 1953, Goodyear introduced the tire sensation of the decade—the All-Nylon Cord Super-Cushion... the first All-Nylon cord tire at a popular price.

And now Goodyear makes this great tire even greater with 3 sensational improvements for 1954. No tire at or near its price can match it!

Test after punishing test—like the one illustrated (left)—prove All-Nylon cords make this tire so strong that impact blowouts are almost impossible! Think of the longer tire life—the safety—this means to you!

1954 IMPROVEMENT NUMBER 2

Safety Silencers—for the first time in Canada! You know that annoying "squeal" when you turn a corner! It's caused by the outer ribs of your tires rubbing together. Now Goodyear puts a stop to this annoyance. Those "buttons" (see above) moulded between the outer ribs of this new tread—keep the ribs apart—practically eliminate "corner squeal". The 1954 All-Nylon Cord Super-Cushion gives you the quietest ride you've ever known.

NYLON'S AMAZING STRENGTH PLUS 3 GREAT IMPROVEMENTS. 3-T CORD FOR EVEN MORE MILEAGE. SAFETY SILENCERS FOR QUIETER RIDE. NEW TREAD DESIGN FOR GREATER SKID RESISTANCE. NO TIRE AT OR NEAR ITS PRICE CAN MATCH IT!

1954 IMPROVEMENT NUMBER 3

New, flatter tread design that results in 15% greater skid resistance! This new tread design puts more rubber on the road. And there are 880 deep-cut safety slots—1806 inches of non-skid edges. This tread grabs the road—gives you safer, surer stops—more protection against sideways skids than ever before—far better traction than ordinary tires.
