SCIENCE IN FARMING.

That small pieces of seed potatoes are unable to overcome unfavorable conditions, is the conclusion reached by P. M. Harwood and P. G. Holden, from experiments at the Michigan and twelve other stations. The potato growers of Michigan (B. 93) do not seem to plant enough seed. For the usual distance, the *half* potato gives better results than any smaller amount, and for weak growing, or small-tubered varieties, even a larger amount of seed will be found more profitable. The increase in seed within ordinary limits produces a marked increase, both in total yield and in marketable crop. An increase in seed from one eye up to the half potato produces an increase in the net value of the crop. The increased yield from the whole potato over the *half* potato is *not* sufficient to cover the cost of the greater quantity of seed. For total yield of large and small potatoes, 76 out of 95 experiments were in favor of the half potato, and 19 in favor of two-eye pieces. For net marketable yield, 23 out of 30 trials were in favor of the half potato, and eight in favor of two eyes. But for net value of crops, 22 out of 30 experiments were in favor of the half potato, and eight in favor of two eyes. A comparison of the whole potato with the half potato shows that, for the total yield, 46 out of 54 trials favored the whole potato, and eight the half tuber. For the marketable yield, 36 of the 42 trials favored the whole tuber, and six the half. For net marketable yield above seed, seven of the 13 experiments were in favor of the whole potato, and six of the half. But, for the net value of the crop, seven of the twelve experiments were in favor of the *whole tuber*, and five were in favor of the half potato for seed.

Cost of Farm Crops.

At the Nebraska station, an endeavor has been made by C. L. Ingersoll and S. W. Perin, to ascertain the actual cost of farm crops. The crops were given (B. 29) ordinary farm treatment. Labor was charged against the fields at the uniform rate of 15 cents per hour. The profit on a crop depends upon its cost and its market price. The cost is more largely under the farmer's control, the market price being affected by demand and supply. Hickman wheat, yielding 40 3-4 bushels per acre, cost 16 2-3 cents per bushel in the granary; Tuscan Island Red yielded 33 bushels, at a cost of 19 2-5 cents; Ironclad 26 2-3 bushels, at 23 2-5 cents; Extra Early Red 39 bushels, at 26 2-5 cents; Landreth White 36 1-6 bushels, at 27 2-3 cents. White Winter rye yielded 21 1-3 bushels, at 39 4-5 cents; Prize Cluster oats 35 4-5 bushels, at 17 3-4 cents; Centennial White corn 43 2-5 bushels, at 23 2-5 cents; Leaming corn 40 3-4 and [illegible] 1-2 bushels, at 15 cents; timothy and red clover hay, nearly three tons per acre, at a cost of $1.27 per ton. The cost of a crop depends upon the weather, the price of labor, the fertility and previous treatment of the soil and the skill of the farmer. A single crop may sometimes be raised cheaply, by allowing weeds to grow and returning nothing to the soil, but this would cause a loss in a few years. Any excess of yield above the normal is nearly always clear profit. One man may, by his superior judgment in the planning of his labor, and in the timely treatment of the soil, accomplish much more than his neighbor, who joins farms with him. By the more thorough way in which a farmer does his work, his crops are better able to withstand drouth and escape frosts. The prosperity of a farmer depends upon the profit on the crops and animals raised, and as the cost of raising animals depends upon the cost of food consumed, the profits really depend upon the cost of crops.

Common Salt as a Fertilizer.

The question of the value of common salt (chloride of sodium) as a manure is often discussed by practical farmers, and it is claimed that plants are frequently benefitted by its application. The beneficial action of the common salt in seaweed manure is attributed by H. J. Wheeler and B. Hartwell, of the Rhode Island station (B 21), to the fact that sodium is a natural constitutent of all farm plants; and some soils, so far inland that they get but little of it in the rain water, or in which it is naturally deficient, may contain such small quantities that its appliation supplies the crop with a direct fertilizer which is lacking. Farms upon which large quantities of commercial fertilizers are used will generally receive therewith sufficient soda. Salt may be serviceable in killing fungi, and in free land from larvæ of insects. It acts as a solvent upon other elements in the soil, setting them free for the use of the crop. It absorbs moisture, and may, therefore, be of some use in a dry season.

Lathyrus Silvestris.

The flat pea is a valuable forage plant, and, as in all the vetches, there is more digestible protein and fat than in the case of oat hay. E. J. Wickson, at the California stations, finds (B 100) that the nutritive ratio is much closer, there being one part of digestible protein for nearly 24 parts of non-nitrogenous matters, while in oat hay there is only one part protein for nearly 10 parts. There are 15¼ pounds of digestible albuinoids in 100 pounds of flat pea fodder.

Deep or Shallow Setting of Milk.

In private dairies in the Mississippi valley, a large part of the milk is set in shallow pans, or in deep cans, and skimmed in the ordinary way. In exposure of the milk before creaming, these methods differ much. The deep pan is considered superior to the shallow pan, as it may be more nearly submerged in cold water and the milk kept sweeter for a longer time in summer, than the milk in shallow pans. Sudden changes in temperature does not readily affect milk thus set in deep cans. But in winter experiments at the Indiana station, by C. S. Plumb and H. C. Beckman, there was a slight gain of cream from setting milk in shallow pans over that set in deep cans (B. 54). There was a considerable loss of fat in the skim milk from deep setting, over that from shallow setting, amounting to nearly twice as much. The buttermilk from shallow setting contained much more fat than that from deep setting. A slightly smaller amount of milk set in shallow pans made one pound of butter. If the milk is to be set in the open air, and other conditions are equal, it seems most economical to use shallow pans in creaming milk.

Not a Good Plan.

One rich father—I think it is the best plan for your son to marry my daughter and in that way we can keep the money in the family.

The other R. F.—My dear friend, you don't know my son.

The Elliott Case.

BRANTFORD, Sept. 4.—Many citizens of this city are willing to vouch for the truth of Frank Elliott's statement that he was cured of kidney disease of six years' standing by the use of Dodd's kidney pills. Everyone is astonished at the rapidity of thoroughness with which these pills do their work. As one who had tried them says: "A man feels, after using them, as though he had never enjoyed life before." The Rymal case, in which a paralytic was cured by Dodd's kidney pills, opened the eyes of the people in this vicinity to the virtues of this remedy.

The Test of Time.

William Holder, sailmaker, St. John, writes: "This is to certify that for nearly a year I suffered with dyspepsia, indigestion and severe bilious headaches. I lost flesh and became very weak. I was recommended to use Hawker's Tonic and Pills, and am pleased to say that they completely cured me. I gained flesh very fast, and became hearty and stronger than I had ever been, and have never suffered since, now over one year."

"An ounce of prevention, &c. Do not neglect that cough! One bottle of Putter's Emulsion (the cough medicine par excellence) taken now, may save you weeks of illness, and a long doctor's bill. Large bottle, only 50 cents.

Simply Monstrous.

"Jimminy Cricket h'aint that a big 'un," was the exclamation heard from some youngsters on Boylston street a few afternoons since, as the writer stood conversing with a gentleman near the Albany railroad bridge not far from the junction of West Chester Park and Boylston street. The cause of the boys' surprise was found to be an announcement upon the long bill-board lately erected for a famous theatrical company, opposite from where we were standing. A few minutes' observation convinced us that the boys were not the only persons attracted to this enormous spread of matter. The board is the very largest in the world and the amount of paper used to cover it would make the fortune of every Italian Count rag-picker upon the street of Boston. Laborers stopped work, horses stopped, pedestrians halted in wonderment, as Mr. J. W. Black, Boston's old well known photographer focused his famous thousand dollar, wide angled lens upon the great bill-board, to obtain by the sun's mysterious chemical touch an enduring photograph of the statements and legends thereon. Among the chief of which was the following: "It holds the fort while Old Jed Prouty is away!" "Every mother should have it in the house for autumn colds, soreness, lameness in body or limb." Think of it, Johnson's Anodyne Liniment, unlike any other, was originated by an old family physician in 1810;" "without real merit could it have survived for eighty years?" These in bold letters, some of which nearly six feet tall, proved to be what astonished the boys. This big sign demonstrates one point clearly; the courage and persistence requisite to be successful advertisers, like I. S. Johnson & Co., the proprietors of Johnson's Anodyne Liniment; nothing daunts them. But after all, it is their forcible, persistent, courageous style of advertising which has made them successful, until they are now classed among the foremost advertisers of the day.

A Big Mistake.

The moulting season, or the season when the hens shed their feathers will soon be at an end. The process is one that in certain respects debilitates and prevents hens from laying. The reason of this is that the growing of new feathers requires all the nitrogen and phosphates contained in the food and there is none left to form the egg. A curious fact about the hen, and one that illustrates the foregoing statement, is this, if a hen's leg be broken during the laying season, she will lay her eggs without shells until the break is mended. The reason for this must be that all the lime contained in the food is required to unite the broken bone, there is therefore none for the formation of egg shells. The formation of new feathers does not require any carbonaceous or fat producing food, consequently well fed hens get very fat during the moulting. Many farmers and poultry raisers not understanding all about these things kill off their old hens because they think they have stopped laying and are fat. This is a great mistake, because if the proper material be furnished them with their food to supply the increased demand for nitrogen and phosphates before mentioned the old hens will be through shedding feathers much sooner and will begin laying on the approach of cold weather and will continue to lay vigorously all winter, while the young pullets, reserved to take the place of the old hens, may not begin to lay until much later in the season. Very many people have learned from experience that Sheridan's Condition Powder mixed once daily with their food will supply the extra material needed to strengthen and invigorate their hens, enabling them to grow new plumage quickly and commence laying early. Those who commence now to use Sheridan's Powder, will find that their young pullets will commence to lay at from four to six months old, and will lay continuously through the winter. The Farmers' Poultry Raising Guide, published by I. S. Johnson & Co., at 22 Custom House Street, Boston, at 25 cents, contains a vast amount of information on this subject. Johnson & Co. will send, post paid, two 25 cent packs of powder and one Guide for 60 cents, or a 2½ lb. can of the powder, postage or express prepaid, for $1.20 and a guide free.

Avoid all Injurious Habits.

Tea drinking is an injurious habit, and nervous people should be careful in the use of it. It is not a food, it is not a tonic, and if drunk strong it may be as baneful in its effects as brandy would be. Anyone who feels as if they were a bundle of nerves should give up both tea and tobacco, and use Membray's Kidney and Liver Cure, which will help them to exist in comfort without them

For Over Fifty Years

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.

From the recent report of Mr. Fitzgerald, the Dominion Superintendent of Insurance, it appears that the amount of life insurance in force in Canada, in 1892 was £279,110,265. This is the greatest amount in force in the history of the country and is over $17,000,000 more than last year. Every year since the depressing times previous to 1878 Life insurance in Canada has made steady advances, and the increase of 1892 is one of the largest ever recorded. The record shows, too, that the total increase has been very substantial. In 1875 the amount of insurance in force was $85,000,000. From that on to 1879 it either remained stationary or actually declined. Then the increases began: In 1880, $91,000,000; in 1885, $149,000,000; in 1890, $248,000,000; in 1891, $261,000,000, and lastly, in 1892, $279,000,000. To get an idea of the yearly bulk of this branch of this business we may note that the total amount of policies taken in 1892 in Canada was $44,620,013, an increase over last year of $6,743,726.

W. H. ROGERS.

AMHERST, N. S., May 27, 1893.

THE GRODER DYSPEPSIA CURE CO.

GENTLEMEN:—I am 71 years of age. Have been afflicted with sick headache most all my life, which developed into Dyspepsia of a mild type about twenty years ago, and has continued to grow worse until during the past seven or eight years I have not been able to take a drink of cold water or milk, as they would produce severe pains and sometimes vomiting. I have been subject to severe pains in the chest, with dizziness, which have been more frequent during the past three or four years. My mouth was furred up in the mornings, accompanied with bad breath. My case was yearly growing worse.

During all this long period I have tried many popular medicines, as well as prescriptions from the regular medical practitioners, but without producing any improvment.

In the fall of '92 I concluded to try a bottle or two of your medicine and such were its effects that I continued it and now I can drink cold water or milk without any inconvenience. Those dizzy pains are all gone and my mouth is as sweet as a baby's. In short, your medicine has cured me and I am sure that all Dyspeptics can be cured by its use.

(Signed) W. H. ROGERS,
Late inspector of Fisheries for Nova Scotia.

What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhœa and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Many have repeatedly told me of its good effect upon their children."

DR. G. C. OSGOOD,
Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

DR. J. F. KINCHELOE,
Conway, Ar

Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. ARCHER, M. D.,
111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."

to everyone subscribing for THE DAILY EXAMINER for 12 months at 35 cents a month. By special arrangement with the publishers, we are enabled to make a most exceptional offer to send McCLURE'S MAGAZINE FREE FOR ONE YEAR to everyone who fills out the following blank form, subscribing for THE DAILY EXAMINER for 12 months at 35 cents a month.

CUT THIS OUT AND SEND IT TO US.

THE EXAMINER Publishing Co.,

Charlottetown, P. E. Island.

You will please send to my address the DAILY EXAMINER for 12 months from date, for which I agree to pay 35 cents a month, it being understood that you are to have sent to my address for one year, without extra charge, McCLURE'S MAGAZINE, commencing with the current number.

Name.....

Date..... Address.....

CALL AT OUR OFFICE and see the entertaining and finely illustrated McCLURE'S MAGAZINE, which has among its contributors the most famous authors in America and England, including R. L. Stevenson, Rudyard Kipling, A. Conan Doyle, Octave Thanet, William Dean Howells, Bret Harte, Clark Russell, Joel Chandler Harris, Thomas Hardy, J. T. Trowbridge, Jerome K. Jerome, Frances Hodgson Burnett, Theodore Roosevelt, Joaquin Miller, Gilbert Parker, John Burroughs, Hamlin Garland, Prof. E. S. Holden, Prof. C. A. Young, H. H. Boyesen, Robert Barr, Henry M. Stanley, Archibald Forbes, Andrew Lang, and many others.

Each number of McCLURE'S MAGAZINE contains two illustrated interviews with famous people. Jules Verne, Frances Hodgson Burnett, Tissandier, the famous French Balloonist, Archdeacon Farrar, Thomas A. Edison, F. Hopkinson Smith, H. H. Boyesen, Alphonse Daudet, Camille Flammarion, Edward Everett Hale, Professor Graham Bell and many others, have furnished material for especially prepared interviews, which will appear fully illustrated in this magazine.

HENRY M. STANLEY will contribute, especially for young readers, a story of AFRICAN ADVENTURE.

NATURAL HISTORY AND ADVENTURE.—There will be several articles written by Raymond Blathwayt, who has been called by Mr. W. T. Stead the best interviewer in England, from material furnished him by Carl Hagenback, of Hamburg, the great animal importer and trainer. These articles deal with the Capture of Wild Beasts, the Training of Wild Beasts, the Transportation of Wild Beasts, the Adventures and Escapes of Carl Hagenbeck. The series will be illustrated by an English artist of great skill in drawing animals.

JOHN BURROUGHS, C. F. HOLDER, DR. C. C. ABBOTT, and other writers famous for their work in this field, will contribute to the Magazine.

Of interest to both Young and Old will be PROF. R. L. GARNER'S AFRICAN EXPEDITION TO THE GORILLAS. Arrangements have been made, in connection with a leading English review, to publish Professor Garner's letters descriptive of his present expedition to Africa. Professor Garner is noted the world over for the curious and interesting investigations he is making in the speech of monkeys. He sailed for Africa last September for the purpose of further pursuing his studies in the native haunts of the gorilla. The illustrations of these articles will be from photographs taken by Prof. Garner in Africa.

McCLURE'S MAGAZINE also contains most interesting articles under the heads: The Edge of the Future," "Newest Knowledge," "Knowledge of Immediate Value," The Present Hour," "Stranger than Fiction," etc.

We are offering this splendid Magazine with THE DAILY EXAMINER for only $4.00 a year, payable in advance or in monthly instalments of 35c. as desired.

We make this exceptional offer in order that we may secure a large number of new subscribers, but all who are already subscribers may avail themselves of this opportunity to secure practically free this great popular Magazine. Address:

AWFUL HEADACHES.

2 YEARS OF SUFFERING.

LIFE A TORTURE.

Fendrick Outhouse, of Tiverton, N.S., says: For several years I suffered from severe attacks of biliousness, which came on periodically, about every two weeks. I had *awful headaches* and the smell of anything cooking turned me sick. I became *weak and nervous*, and had no ambition or strength to work. I passed *many sleepless nights*, and for days could not retain food on my stomach. I suffered intensely with piles and hives, and my life was a *constant torture* to me. I became so weak that my friends *gave up all hopes* of my recovery. My brother brought me a bottle of

HAWKER'S NERVE AND STOMACH TONIC, and a box of HAWKER'S LIVER PILLS.

I had not taken them long before I commenced to improve and in a short time I was *completely cured*. I grew *strong* and *vigorous*, my appetite returned, I *slept well*, and in a few months had *gained 30 pounds* in weight. I have not suffered from piles or biliousness since, now 2 years, and am as *strong* and *hearty* as any man could wish to be. I firmly believe that

HAWKER'S NERVE AND STOMACH TONIC AND LIVER PILLS

Saved My Life.

I hereby certify the above statement is correct in every particular.
