**DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE**

ARE NOT a Pur-gative Medi-cine. They are a BLOOD BUILDER, TONIC and RECON-structor, as they supply in a condensed form the substances actually needed to en-rich the Blood, curing all diseases coming from POOR and WAT-tery BLOOD, or from VITIALIZED HUMORS in the Blood, and also invigorate and BUILD UP the BLOOD and SYSTEM, when broken down by overwork, mental worry, disease, excess and indis-crimination. They have a SPECIFIC ACTION on the SEXUAL SYSTEM of both men and women, restoring LOST VIGOR and correcting all IRREGULARITIES and SUFFERINGS.

Who have his mental fac-ulties dull or failing, or his physical powers flagging, should take these PILLS. They will restore his lost energies, both physical and mental.

**EVERY MAN** should take them. They cure all sup-pressions and irregularities, which inevitably lead to sickness when neglected.

**EVERY WOMAN** should take them. They will cure the re- sults of youthful bad habits, and strengthen the system.

**YOUNG MEN** should take them. These PILLS will make them strong.

**YOUNG WOMEN** should take them. These PILLS will make them strong.

For sale by all druggists, or will be sent upon receipt of price (50c. per box), addressing  
**THE DR. WILLIAMS' MED. CO.**  
Brookline, Ont.

**SHARP'S BALSAM**

OF HOREHOUND AND ANISEED FOR  
CROUP, WHOOPING COUGHS, AND COLDS.

40 YEARS IN USE.  
PRICE 25¢ PER BOTTLE.

ARMSTRONG & CO. PROPRIETORS  
St. John., N. B.

**THE S. LAURANCE Spectacles and Eye Glasses.**

THE only Optical Goods in Canada which have been recommended by the Presidents and Vice-Presidents of all the Medical and Surgical Societies in Canada and Great Britain. Far superior to any other for retaining perfect vision.

Sole Agent for Charlottetown—  
**G. G. JURY,**  
Watchmaker, Jeweler and Optician,  
North Side of Queen Street,  
Opposite Post Office.  
Charlottetown, Sept. 1, 1890—24w

**Wall Paper.**

ABOUT THREE THOUSAND ROLLS WALL PAPER, at 33¢ per cent. discount. I am closing out this branch of my business, and will sell out at the above discount in order to make a speedy clearance. Big Wall Paper would do well to look at this before buying.

J. B. MACDONALD,  
Queen Street.  
Charlottetown, Feb. 23, 1891.

**Facts are Stubborn Things**

So is Bad Blood. The difference between them is that a fact is here to stay. Bad Blood can only stay until Burdock Blood Bitters is used, then it must go. It takes facts to prove this to your satisfaction, and we give them to you every time we catch your eye. Here is one of them. Don't throw the paper down, but read this letter from Mr. Fred. Taylor, a detective of Winnipeg. We present his portrait, together with that of his little daughter, mentioned in his letter.

FATHER AND DAUGHTER.

**ONE OF THE GALLANT 90TH BATT.**

DEAR SIRS,—Having felt out of order for some time, and having no energy or appetite, blotches on legs, tumor on neck—arising from impure blood, doctors doing me no good, I was induced to buy some B.B.B. I was very much against patent medicines at the time, having tried so many, but after using two bottles I began to get better, and at the fourth bottle was completely well and around again. I believe in B.B.B. now, I tell you. I send you a photo of myself and little daughter, Lily. B. B. B. cured her of nasty blisters which came out on her lips. Yours thankfully,  
**F. TAYLOR,**  
9 St. Stephen St., Winnipeg, Man.

**TAYLOR & GILLESPIE.**

We are making Special Reduc-tions during this month on the binding of Magazines, Illustrated Papers, Periodicals, etc.

**TAYLOR & GILLESPIE,**  
Sign of the Big Book, J. D. McLeod's Corner.

**Perry Davis' PAIN-KILLER**

Is used both internally and externally. It acts quickly, affording almost instant relief from the severest pain.

DIRECTLY TO THE SPOT INSTANTANEOUS IN ITS ACTION.

For CRAMPS, CHILLS, COLIC, DIARRHGA, DYSENTERY, CHOLERA MORBUS, and all BOWEL COMPLAINTS.

NO REMEDY EQUALS THE PAIN-KILLER.

In Canadian Cholera and Bowel Complaints its effect is magical. It cures in a very short time.

THE BEST FAMILY REMEDY FOR BURNS, BRUISES, SPRAINS, RHEUMATISM, NEURALGIA and TOOTHACHE.

SOLD EVERYWHERE AT 25c. A BOTTLE.

Beware of Counterfeits and Imitations.

## WINTER, 1891.

**General Hardware & Carriage Goods**

Arrived—A Full and Complete Stock of Everything in Our Line.

**CARRIAGE BUILDERS!**—We intend clearing out our entire stock of Carriage Goods, and give up the trade for the coming season we will sell, at Specially Reduced Prices for Cash, HARDWARE and CARRIAGE GOODS. Terms Short. Prices Low for Cash.

**NORTON & FENNELL,**  
City Hardware Store.  
Charlottetown, Dec. 9, 1890—24w and wy

**All the Nutritious Constituents of Prime Beef**

are preserved in **JOHNSTON'S FLUID BEEF**

An invaluable food for all who need strong nourishment in an easily-digested form.

March 17—dy & wky

**OUR \$2.75 WATCH,** made by the Waterbury Watch Company, will not last as long as the more expensive Watch, but is just the thing for a boy attending school or for boating or fishing parties, saving the risk and yet doing the work of the better Watches.

**OUR \$4.50 WATCH,** made by the same Company, only better quality, is short wind and jeweled.

**OUR \$7, \$10, \$15 AND \$20 WATCHES** are correspondingly better goods. You will be safer in trading with us than by sending to irresponsible parties at a distance, and who, if a mainspring breaks or anything goes wrong, are too far away to send to. We are here to guarantee and stand by every Watch we sell.

**H. W. TAYLOR,**  
CAMERON BLOCK.  
Charlottetown, Feb. 23, 1891.

### Scientific Miscellany.

**MOTIVE POWER OF THE SOLAR SYSTEM.**—Mr. C. H. Zenger claims to have first suggested in 1873 that the sun acts as a huge dynamo electric machine, controlling the motions of the planets and comets by electro-dynamic energy instead of by gravitation. Since then he has made various experiments, which tend to prove that all the motions in interplanetary space on the surface and in the interior of the planets, are explained by this theory. It has been demonstrated that cyclones and tornadoes have an electrical cause, and reasons have been found for believing that not only cyclonic and magnetic storms and the northern lights, but also earthquakes and volcanic disturbances, have a periodicity corresponding to a semi-rotation of the sun. A copper sphere has been made to imitate, by the influence of electro-magnets, the motions of the planets around the sun; and a hollow glass sphere has been rotated on its axis by discharges from an electric machine. The appearance of the eclipsed sun, showing the protuberances and the corona, has been reproduced by electrical discharges against discs of copper and tinfoil on smoked glass plates; and an exact copy of the spots and other familiar characteristics of the sun's surface has been given by discharges on a hollow sphere of smoked glass or on a silvered mirror. Finally, the phenomena of comets' tails have been imitated by discharges on wrinkled surfaces.

**PNEUMONIA FROM BLOWS.**—Two cases of pneumonia as a result of concussion of the lungs have been reported by Dr. F. W. Burton. A boy of eleven, who was forcibly struck on the left side of the chest with a hatchet, began to cough about four hours later, and soon developed the symptoms of pleuro-pneumonia at the base of both lungs. A man of twenty-two, who strained his right side by trying suddenly to stop the fall of a sack of malt, developed all the signs of pneumonia in both lungs, and died.

Experiments in a German technical school have yielded an excellent building material in a mixture of sawdust and mineral refuse pressed into bricks. These are very light, impervious to wet, and absolutely fireproof.

**PHOTOGRAPHIC FEATS.**—Instantaneous photographs may be taken by means of a movable shutter, or by exposure to a flash of magnesium light or to the electric spark. From photographs of a rotating wheel, according to a recent lecture by Lord Rayleigh, the duration of the magnesium flash has been calculated to be from 1-10th to 1-50th of a second, while a simple spark from a Leyden jar lasts less than 25,000,000 of a second. Instantaneous photographs have lately been taken which show that a jet of oxygen on passing through water is at once split up into bubbles; and that a jet of water issuing into the air from a nozzle is at first cylindrical and then broken up into drops, each of which is momentarily connected with the cylinder by a ligament. The photographing of a soap bubble in the act of breaking, though this occupies less than 1-10 of a second, is made possible by dropping a weight from an electro-magnet, thus breaking the film and causing the spark simultaneously.

**THE INTRA-MERCURIAL PLANET.**—A mysterious circular object, about 1-32 of the apparent diameter of the sun, was seen by an English astronomer as it was crossing the solar disc on Feb. 5. While this could not be the long-sought vulcan of M. Lescault, Prof. Monch, of Dublin, thinks it is not less likely to have been a planet. He finds more evidence of transits of an unknown planet in February than in any other month, a remarkable fact being that four of the recorded appearances—those of the years 1820, 1821, 1857 and 1864—were on Feb. 12.

A number of magnetic foci have been found in the Alps by Signors Sella and Oddone, the rocks with distinctly magnetic properties being magnetite, serpentine, diorite and syenite. A magnetite rock on Punta Ginetetti showed traces of fusion, as if it had been struck by lightning, and it is suggested that this circumstance has given the rock its magnetic properties.

Some time ago Prof. Parisi, of Athens, was surprised at being relieved of a tapeworm after a very free use of cocoanut. Since then he has tried this as a remedy with almost invariable success, and good results are reported from its trial in America.

**OUR NEARNESS TO THE GLACIAL EPOCH.**—Did you ever reflect, proud one, upon the narrow limits of the conditions that make human life possible? A little more heat and man and his works would wither into dust, a little more cold and the snows of perpetual winter would be heaped high above the mightiest of the earth's cities. Mr. C. Harding tells the Royal Meteorological Society, London, that the frost of the past winter has been more prolonged than any previous one during the last hundred years. From Nov. 25 to Jan. 22, a period of 59 days, the mean temperature of the southeast of England was 2 deg. below freezing-point, or 10 deg. lower than the average, although in the extreme north of Scotland the cold was less than 1 deg. greater than the average. This most remarkable period of frost leads Prof. T. G. Booney to inquire what permanent fall of temperature would restore the glacial period. He concludes that a lowering of the mean by only 18 deg. would again cover the British Isles and the Northern United States with a sheet of ice, and that beyond the St. Lawrence the fall need be no more than 12 deg. or 13 deg. An exchange of the present climates of the corresponding latitudes of the northern and southern hemispheres would bring England at least within the frozen zone.

**ANOTHER FARADAY WANTED.**—The steam engine returns in power scarcely more than 10 per cent. of the theoretical energy of the coal burned, and the most important problem on which Edison and others are now working is the direct conversion of heat into electricity, by which much of the loss of energy might be avoided. But it almost seems, Prof. Elihu Thomson declares, that we must wait for another Faraday to come forward and show us principles which are not now known, some relation between electric energy and heat energy whereby we can convert even 35 to 40 per cent. of the heat energy into electric energy. "Look what it means should

such a thing come about. The steam-engine would disappear. The steam-locomotive would disappear. The apparatus to propel the steam-ship would not be a steam-engine with its reciprocating motions and racking strain, but would have that quiet rotary motion which characterizes the modern electric motor."

### Liberal-Conservative Convention.

The following delegates were in attendance at the convention in McLeod's Hall yesterday to nominate a candidate for the seat in the House of Assembly made vacant by the resignation of Hon. D. Ferguson:

- Brackley Point—Colin McLeure, John G. McDonald.
- Brackley Point Road—Frederick Horne, Alex. Scott, Thos. Berrigan.
- Covehead—David Landrigan, John Carroll, Thos. Power, Chas. Reardon, Matthew Reardon.
- York—Abraham Brown, Peter Stewart, Thos. Vessey, Donald Stewart, Daniel Scott, John H. Gill, Richard Mahar and Herbert Lewis.
- Bedford—Francis McNally, Alexander McGregor, James Dougan, Benjamin Stewart, P. C. Kelly.
- Tracadis—Allan Joseph McDonald, Jos. McDonald, Francis Jennings.
- Mount Stewart—Michael Feehan, Angus John McDonald, David Egan.
- Pisquid—Wm. J. Logan, Augustine McDonald, John McQuaid.
- Monaghan—Patrick McManus, Allan James McDonald, James Duffy, Patrick Curley, James Callaghan, Terence McDonald.
- Johnston's River—Benjamin Jenkins, Leonard Wood, Edward Ryan, Charles McCarthy, Robert Wood, Edward Trainor, Edward Wood, Jr., William A. Chandler, Robert Jenkins, James P. Trainor.
- Mount Herbert—Joseph Power, John Driscoll, John Boyce, Sampson Farquharson.
- Southport—Edward Kelly, James Morgan, Henry Mutch, Henry Boyver, Henry Bourke.

### LETTERS TO THE EDITOR.

#### The Free-For-All Race.

SIR,—I, with your correspondents, "Breeder" and P. P. Gillis, am strongly of the opinion that a stallion race is of more importance than a free-for-all; and the management will make a serious mistake if such a race is not granted. Let there be both, if necessary—but, above all the other races, a stallion race.

First, consider the gate money. What was the case in the Black Pilot-Hernando race? Which day of last season's races on our track drew the greater crowd? Anybody can answer.

How many people met at Halifax to see the stallion race? Wherever in the Provinces there is a stallion race, there will be centred the attraction. Black Pilot will want to have another chance at Elmo; Golden will again measure pace with Israel; Hernando's friends will expect him this year to make a strong pull for honors; Bronze Chief and Melbourne King are favorably known here, with several other Nova Scotia and New Brunswick stallions. Our Island has several that I have not named, that may show up for the word "go" at the October meeting. Such a race, with such a field as would be sure to meet, would far surpass any turf event ever held on this Island.

The breeders who would assemble from all parts of the Maritime Provinces, especially our own people, would then see their favorites measuring pace, one with another, but everyone struggling for supremacy, and to the victor let the honors go.

What, in the history of races in these Provinces, has been the free-for-all? Some unknown horse, very often a "ringer," slips in and takes away the money. Nobody knows the horse, the matter is a mystery, and everybody is dissatisfied.

Many of your readers will remember the advent of Factory Girl, Saco Boy, Sussex Lass and many others, and such races as have been reported to have been "fixed." One such race on this track and it is doomed. With a free-for-all, the management is powerless if a "ringer" turns up. Stallion owners will not care to prepare for such an uncertainty.

Never in our history was the problem of what kind of a horse to breed to by our farmers, deserving of so much careful study as now. "Fair Play" brings this prominently up. I am neither a stallion owner nor a shareholder in the Park Company, but am interested in the welfare of the horse breeders of this Island. My opinion is that the raising of good stylish drivers, the better the breeding and the faster they can trot, the more valuable they are; but never lose sight of their size, color, action and general carriage for profitable breeding.

**CLOSES APRIL 15TH.**—The 1, 2, 3, 4, 5.—The grand prize competition of the Canadian Fireside Weekly, in which 300 valuable prizes are offered, will close on April 15. In addition, from now until that date a special daily prize will be given for the first correct list received each day. The competition is simply a combination of numbers, and requires no searching in dictionaries or books of any kind. Among the prizes are bicycles, tricycles, \$100 cash, furniture, silverware, watches, jewelry, summer tours—prizes for men, women, boys and girls, 300 in all. Send at once 5c for sample copy, with full particulars and list of prizes, to 9 Adelaide street west, Toronto, Ont. Mention this paper. cod wy 3m

**Dyspepticure.**—Is not a palliative, but a cure; it first relieves, then controls, and finally entirely subdues the irritation and inflammation of the stomach that causes indigestion and dyspepsia.

Call and get some bargains while we are selling off so cheap to make room for the new goods to arrive in the early spring. Those goods must be sold at the Cheapest Crockery Store.—W. P. Colwill. mar16ddaw

**TEN POUNDS TWO WEEKS THINK OF IT!**

As a Flesh Producer there can be no question but that

**SCOTT'S EMULSION**

Of Pure Cod Liver Oil and Hypophosphites Of Lime and Soda is without a rival. Never have patients gained a day by the use of it. It cures

**CONSUMPTION, SCROFULA, BRONCHITIS, COUGHS AND COLDS AND ALL FORMS OF WASTING DISEASES. AS PALATABLE AS MILK.**

Genuine made by Scott & Bowne, Fishers, Salmon Wharfer, at all Druggists, 50c and \$1.00.

**DISSIPATE**

Dyspepticure aids Digestion. Dyspepticure cures Indigestion.

The most serious and long-standing cases of Chronic Dyspepsia positively cured by Dyspepticure.

Price per bottle 3/6 and 4/0 (large bottles four times size of small)

Prepared by **Charles K. Sherrin, St. John, N.B.** 2005 EVERHURST.

**Superior Draft Stallion Regulus BY AUCTION.**

**I WILL SELL BY AUCTION, SATURDAY, March 28th (Easter Market Day), at 12 o'clock, noon, on the Market Square:—**

The Stallion "REGULUS," sired by imported "Barrister," dam by imported "Clyde."

"Regulus" is a dark bay, with black points, 5 years old, weighs about 1700 lbs Superior stock getter.

Can be seen at P. P. Gillis' Livery Stables on and after Monday, 23rd inst.
