How to use your university degree to land a job in the new economy

When you combine your university degree with a post graduate program from ITI Information Technology Institute, you become a qualified information technology professional - the kind employers are looking for right now.

ITI's nine month Applied Information Technology program is completely market driven and is taught by qualified instructors. Program includes Novell, Visual Basic, Oracle, PowerBuilder, Windows NT, the Internet and much more.

ITI's professional placement team helps students plan a career and secure a job after graduation. By closely matching our graduates with specific employment opportunities, we get results - more than 85% of ITI graduates find employment in North America within six months of graduation.

Each of the companies listed here, and many more, have hired recent ITI graduates, because they have the skills they need.

To find out how you can acquire these skills, call today to receive a brochure, to arrange a convenient time for a personal appointment or to register for an information session in Charlottetown.
