Discuss New Tax Possibility At Meeting

At the regular monthly meeting of the Summerside Board of Trade held last night in the Town Hall, Mr. Alan Holman referred to the agitation being made at the present time by some of the Provinces to have the British North American Act amended so that the Dominion Government may give to these Provinces the power to impose a tax on the yearly turnover of retail business houses. Mr. Holman, who recently attended a meeting of the Canadian Retail Federation said that the Federation is greatly concerned over the possibility that such a power may be given to the Provinces and he pointed out that this hidden tax would certainly increase the cost of living to the extent of the levy. He said that this tax might go as high as three percent and contended that such a tax would put many business firms out of business. The matter was given considerable discussion by the members at last night's meeting and the consensus of opinion was that although no action could be taken by the local Board that a campaign of publicity to acquaint the public regarding the insidious nature of the proposed tax was the most effective means of combating the move. The matter of the proposed repairs to the Marine Wharf and the construction of a new frost-proof shed on the wharf came up for discussion and as no late information was available, it was decided to write to Mr. J. W. MacNaught, M.P. for any recent information available. The meeting decided to ask the Income Tax Department to again send two men to Summerside this year to assist the public in the preparation of their tax forms. It was reported that nothing had as yet been heard on the result of the recent survey made in Town regarding the street mail delivery. Mr. Fred Bell, the president, reported that when the inspector was in Summerside he had been informed by him that the conditions were very favorable. - S
