

WARNING!

Don't be a High School DROP OUT!

THERE'S NO ADVANTAGE IN NEGLECTING AN EDUCATION WHEN IT IS SO VITAL TO YOUR FUTURE SUCCESS!

Don't let the immediate attainment of money and material gains be your only goals in life! In this complex society we live in, the need for a good education is vital to every young man or woman who wants equal opportunity . . . a satisfying career . . . and a place as a

responsible informed member of society. Without education, it will be difficult to attain these goals, if you leave school too soon, you'll regret it for the rest of your life . . . just ask the man who dropped out!

In the interest of helping the young of this community to live a happier, more successful life, this message is being published by:
