Guests are welcome.

The explosive growth in business technology has created a need for skilled professionals who can create solutions in today's competitive market. At ITI, we teach you the skills to succeed in this expanding field, from the fundamentals of business technology and software applications to hands-on collaborative problem solving, project management, and communication techniques.

ITI has been educating technology professionals for more than 15 years, and our graduates are employed at leading corporations throughout North America. In addition, the 2000-2001 *Occupational Outlook Handbook* projects this field to be among the fastest growing through 2008.

So if you have a bachelor's degree in any discipline and you want to learn how to become an asset to business, step outside of the box and into ITI.

We educate the people who make business and technology work.

Be sure to ask about our new evening and weekend schedule.
