**You're Ahead on Every Count WITH A JOHN DEERE AUTOMATIC BALER**

Measured by every yardstick of good baling performance, the John Deere Automatic Baler is your best buy.  
Consider field dependability, a mighty important factor during hit-or-miss haying weather. First fully-automatic, wire-tying baler on the market, the John Deere today offers you a record of field dependability proved in every crop . . . in every operating condition. Its ability to stay on the job enables you to bale extra tons every day that can mean the difference between saving a hay crop or losing it.  
Fully-automatic operation further assures you of faster baling that cuts time and costs. You bale your crop in a steady, non-stop trip through the field . . . bale more hay every day, and hold baling costs to rock-bottom.  
Equally important, you get better bales with a John Deere for feeding or selling. Bales are wire-tied to stay tied through handling, hauling, and in high stacks . . . sliced for easy feeding . . . square-cornered for easier stacking and compact storing.

**Grow top-grade potatoes . . . PROTECT YOUR CROP with C-I-L POTATO PESTICIDES**

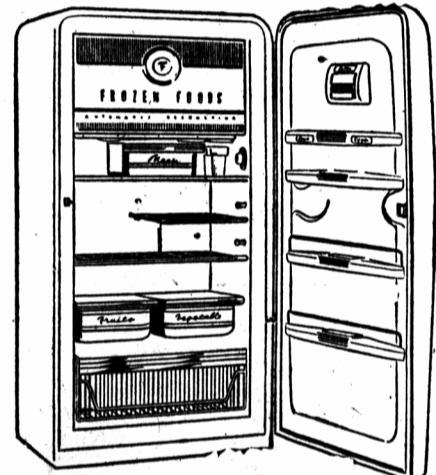

Potato growers know they can rely upon C-I-L Potato Pesticides for effective, low-cost control of insects and blights. You'll harvest more marketable potatoes per acre, make a bigger profit per bushel, when you protect your crop with C-I-L field-tested Dusts and Sprays.  
**FOR BLIGHT, LEAFHOPPERS AND BEETLES**  
**DEECOP DUST.** A combined insecticide-fungicide containing 3% DDT and 7% Copper with a special carrier-sticker. Gives outstanding control of early and late blight, Colorado potato beetles, flea beetles and leafhoppers. For best results, use DEECOP Dust at the first sign of leafhoppers. May be used at any time except when raining or windy.  
For seed-potato crops or where aphid infestation is heavy, use DEECOP Dust 5-7 (5% DDT and 7% Copper).  
**DEECOP SPRAY.** Contains 15% DDT and 30% Copper. Like DEECOP Dust, it gives exceptional control of both insects and blights. Although developed especially for potato growers, it is also an excellent insecticide-fungicide for many other crops.  
**Other C-I-L Potato Pesticides**  
**C-I-L 50% DDT Wettable Powder.** Especially effective against leafhoppers, as well as beetles and many other insects. Because of its fine particle size, C-I-L 50% DDT Wettable Powder gives exceptionally uniform coverage and has superior suspension and adhesive properties. Mix with "Tri-Cop" for combined insecticide-fungicide spray.  
**TRI-COP.** Water-dispersible powder containing 52% Copper for control of early and late blight. Compatible with DDT, Lead or Calcium Arsenate.  
**TROX.** A 7% Fixed Copper dust with a special carrier-sticker. Gives dependable, low-cost blight control. Apply at any time except during wind or rain.

Your crop deserves the best protection. Ask your dealer for C-I-L Potato Dusts and Sprays, made by Canada's established leader in modern pest control.
