Nash missed the fish and asked Brooks for a ride. Brooks drove along until he reached a Parkdale policeman, when Nash halted him and had him arrested. Today Brooks was sent to jail for five days by Magistrate Denison.—Toronto Star.

A WAIL FROM PICTOU.—The Pictou Standard says: The editor will have to ask the indulgence of his readers this week, with reference to the matter and make up of the paper. The thumb of our right hand being broken we are unable to write a line. To help us in this difficulty we hope all our correspondents will endeavor to send us items, regularly, during the next three or four weeks.

AN OLD AND WELL TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for Diarrhoea. It is pleasant to the taste. Sold by druggists in every part of the world. COLLISION ON COLLEGE HILL.—Mr. A. N. Large and Mr. John S. Morris received a rather bad shaking up while returning on Monday evening from fishing at Moore's mills. As they were coming up the College hill, on the Malpeque road two countrymen with a truck-wagon were going down at a rather lively rate, and the wheel of their ruck-wagon caught the wheel of their carriage. Mr. Large's horse horse jumped and threw them both out of the wagon dragging Mr. Large who held the reins a considerable distance. The latter was severely stunned, receiving a nasty cut in the forehead and the horse tramping on his hand. The countryman did not wait to see what damage they had done but putting whip to their horse dashed up the opposite hill.

AN INVENTION.—Capt. Frank Gallant Postmaster at Tignish, is an inventive genius. Some years ago he patented an invention for filling cans in lobster factories, and lately he has been visiting the United States patenting another invention, a hand shade for cyclists. The shade, which is for the purpose of protecting the hand from sunburn, is made of oilcloth, neatly designed and ornamented, and attached to a spiral spring on each side of the handle bar. It may be moved to any position, or detached easily from the spring and carried in the pocket when not required on the wheel. Captain Gallant is having his invention patented in both the United States and Canada. He has also invented a new spring lock, which is said to be greatly in advance of those now used.—Agriculturist.
