Canada's most northerly seismographic station is at Resolute Bay in the Northwest Territories.

eline apparent? And what of machinery? Should we invest in some needed replacement or make do with the old. How many questions the farmer is posed with to weigh and to settle! So many indeed, we chuckled the other evening over the conclusions a visitor-a non-farmer arrived at, with we fancied a little surprise.

"You know," he commented "we can no longer entertain the old notion that it was the 'safest' of the family, who remained on the farm. What a man of parts - a dozen men rolled into one-the farmer must be!"

Voices approach. There is a party at the door. "Oh well," James calls after the younger farmer "we'll not say what we'll go at in the morning. We'll have to wait and see what the new day will bring!"

Until tomorrow - Diary-Good-night.
