

## CANDIDATES

with students in the various disciplines.

In summary, I have the desire and the capabilities to fulfill the position of Treasurer. I will do my best to maintain the efficiency and effectiveness of this position. I will look forward to serving you as Treasurer.

## SENATE

Hello, my name is Alan MacPhee. I am in my third year at U.P.E.I. and am a history major. Due to various reasons, I have decided to run for Student Office (Senate) this year and in this article, I hope to outline a few of these reasons.

I believe that we all, as students, will assert that if there were to be one word that most characterized the student life at UPEI this year, that word would be "Apathy". Above all else, this appears to be an extremely undesirable characteristic because it causes a dilemma which is so hard to deal with constructively. Actually it is the main part of the student body

saying "I don't care".

We can all remember back to our teen years when we heard broadcasts by the media of the student action in support of a particular cause, whether that was anti-war protests, the coffee house scheme, or the new trend of early rock and roll. Then again, we can dig out memories of a strong highschool spirit which would unite and incite positive student identity, the idea that our school is the best. Although we cannot return completely and try to reenact these experiences (nor would that be wholly desirable) we must begin to take action to explore the avenues which will give a change in direction to Student identity. There are various means of accomplishing this change and I believe one means is by getting the student council and student body into a closer awareness. We, as students, need people who are to promote this awareness and interaction as representatives on the council. I, for one, am vitally interested in attaining this close awareness and if elected, will continue to promote ideas on that behalf.

Understanding that times are changing, we as students must be ready to change so as to keep ourselves contemporary with our modern age of advanced technology, and yet, we shall always have to bear in mind the integral aspect of meeting social needs. Sadly to say, it has been the trend in the past that people at UPEI were followers of the ideas of Dalhousie or UNB rather than looking inside and devising their own plan

of action. The people that constitute the student body and administration of UPEI are just as talented and competent as these other university leaders to devise schemes with which to unite and give a strong sense of student purpose and perhaps open the doors to new frontiers in education. I believe we have seen a beginning attempt to open one of these doors last semester with the Symposium. This is one example of the type of progress in action which will be essential if we at UPEI are going to accommodate ourselves to our advancing society. If you decide to support me for Senate, then I will in conjunction with the Student Council and administration of the university, promote this type of ideology. Although this past year has been one which has been marked by apathy, it may have been beneficial in forcing us to dig deeper to develop new ideas with which to revitalize our university awareness and promote a broader sense of education to us, the students.

Hello, my name is Joanne Peters, and I am one of your four candidates for two Student Council positions of Senator. I am a third year Science student majoring in Biology.

A Senator's responsibil-

ities involve sitting on Student Council, as well as being a member of the Senate and reporting back to Council on Senate's proceedings. I would value the opportunity to have an input in both bodies.

To be a good Senator, I feel one needs to be able to have a strong voice in both Council and Senate. The Senate consists of representatives from administration, faculty, and students, and for a student to have constructive input he or she must not be afraid to speak out on matters of importance to students. I would try to find out how students feel about matters being discussed both in Senate and Student's Council and represent their views to these two bodies.

I feel my background of involvement in student government and activities would enable me to be an effective Senator. I have occupied various positions on campus, including Chairperson of the Personnel Board, Treasurer of the Sophomore Class, and Secretary-Treasurer of Biology Club. These positions have enabled me to become familiar with Student Council and its workings, and showed me areas where I would like to make suggestions.

In closing, I feel the best way to revitalize Student Union is to have a strong Student Council and by students having an effective input in the administrative end. I would do my best to fulfill this role and to pass on the views of students in general to these bodies. I would feel privileged to represent you in this way.
