TORONTO

TORONTO (CP)—The stock market had its most speculative session of the year Wednesday and it resulted in a moderate rally amid one of the heaviest volumes in eight months.

New Hosco featured trading with a 90-cent jump to \$1.35 following an encouraging drilling report from its copper property near the Mattagami area of Quebec. The stock thus climbed from its 17-cent close of Friday, touching a high of \$1.46 in mid-afternoon today before settling back.

The turnover on New Hosco totalled 909,568 shares, the heaviest volume on one stock this year. Besides this issue, another seven speculative mines had volumes of at least 100,000 shares.

Goldfields Uranium, with property near that of New Hosco, jumped 36 cents to 50 cents with a turnover of 136,650 shares. Other active issues included Atlin-Ruffner International Rankin, Donald, D'Aragon, Norvalle and Marajo.

The final volume was 4,407,000 shares, almost double Monday's sales.

Index changes: Golds of 27 to 82.73; base metals up 2.20 to 156.53; western oils up 1.20 to 135.42.
