

**Teachers Named  
For Workshop**

HUNTER RIVER — A workshop meeting of the teachers of Hunter River and vicinity was held in the new school in Broadbent. The teacher, Mrs. Mary Graham conducted the teachers on a tour of the new building before the meeting.

Mrs. Graham welcomed the visiting teachers and expressed hope that the evening would be an enjoyable one.

Mrs. Cutcliffe welcomed and introduced the special guests for the evening, Miss Helen Yeo, director of teacher's training at P.W.C., and Mrs. Coffin, teacher at the Model School.

Miss Yeo spoke on her recent trip to Britain. She described her visits to various schools and colleges. Miss Yeo said the literature books were on much the same level as in Canada. She noted numerous measuring devices for teaching arithmetic. The trend is to larger administrative units. There seems to be a swing toward less homework and creative work was much in evidence she said.

Mrs. Coffin reported on various things pertaining to teaching in general. She stressed need of lots of supplementary reading in all subjects.

Mrs. Helen Taylor thanked Miss Yeo for her interesting talk and presented her with a small gift on behalf of all teachers present.

It was decided to hold the next meeting in Hunter River School on the second Thursday in January. Cecilia McQuaid and Shirley Dickieson are to have charge of programme.

A display of work from Junior Red Cross was enjoyed by the teachers who were present.

**WORLD REFUGEE YEAR**

GENEVA. (Reuters) Dr.

August Lindt, United Nations

high commissioner for refugees,

said Tuesday the world refugee

year, in which some 70 countries

and territories are taking part,

is having a far greater impact

than had been expected. He said

the number of refugees in Euro-

pean camps had decreased

from 40,000 at the beginning of

the year to 22,000 in October. But

refugees outside the camps still

stood at 90,000, and the decrease

there had been offset by the

numbers of new arrivals.

## "SPEED QUEEN" AUTOMATICS

### Famous Clothes Washers and Dryers

NOW AT NEWSMAKING LOW PRICES!

For Ease! Flexibility! Convenience!  
For Cleaner Washing, Faster Drying!

Automatic laundry equipment of excellent design and construction, handsome appearance! Gently and thoroughly, your clothes are made clean and bright... carefully the moisture is absorbed by heated air, leaving them fluffy dry. These machines wash and dry your clothes more gently than you can clean them by hand.

Look at the features of each machine and see if you could get more for your money... add to those features: "Speed Queen" attractive and convenient styling, with the gleaming, easy-care, white hi-baked enamel finish; the cabinets are hinged so that the machines may be serviced without being moved - this is an exclusive feature of "Speed Queen".

**DRYER FEATURES:**

Model 108  
Full-type door, with magnetic door catches. Extra large 15" opening. Rear perforated. Balance of drum is completely smooth to eliminate wear on clothing.  
Vacuum drying principle: motor-driven suction fan draws air into dryer, it's heated so as to quickly absorb moisture from clothes, then passes through lint trap and out through outlet duct. The air changes about 27 times every minute!  
Temperature Selection Switch allows operator to select HIGH, LOW or NO heat for WASH, IN WEAR or Sun blast drying.  
Efficiency: diffused heat and air flood the rotating clothes drum for maximum drying efficiency. 4800 watt.  
"In-A-Door" lint trap, giant capacity pull-out type, is readily accessible for easy cleaning.  
Safety features: switch stops drum and turns off heat when door is opened. Will not start when door is closed, until start button has been pushed.  
Dimensions: Approx. 30" wide, 28" deep, working surface, 36" high overall height 41 1/2".

**WASHER Features:**

Model A25  
Preselection of wash water temperature - turn switch to either HOT or WARM.  
Warm or cold water rinse.  
Preselection of tub fill height - any desired amount of wash water can be poured into tub (13 gal. metered into tub (13 gal. is normal fill)).  
Aerated waterfall inlet - water enters tub in a natural non-splashing waterfall carrying with it entrained air. Soap disperses more rapidly in water and increases laundering efficiency.  
Lint removal - an automatic proven system of detangling the wash water under every type of load condition. Lint filter is located on the agitator shaft.  
Sediment ejector - any grit or sediment which settles to the bottom of the tub is flushed out at the beginning of every spin cycle.  
Fluid drive - eliminates starting shock on mechanism and provides a smooth pick up of load, diminishing wear on clothes.  
Dimensions: Approx. 25 1/2" wide, 23" deep, 41 1/2" high (36" to work surface).
