THE DAILY EXAMINER.

JANUARY 5, 1892.

## Foreign Trade of Canada.

THE Trade and Navigation returns have not yet been issued. But some of the papers have been favored with advance sheets showing the set of the foreign trade of the country during the fiscal year ending 30th June last. The exports of Canada in 1890 and 1891 were as follows :

| | 1890. | 1891. |
|---|---|---|
| Great Britain | $48 353 694 | $49 280,853 |
| United States | 40,532,810 | 41,138,785 |
| West Indies | 2 719 141 | 3,122 770 |
| Newfoundland | 1,185,739 | 1,467,908 |
| South America | 1,551,887 | 1,063,172 |
| Australia | 471,028 | 589,100 |
| Germany | 507,143 | 532,142 |
| Other countries | 695 925 | 524.903 |
| France | 278,552 | 253,734 |
| Portugal | 207,777 | 120,611 |
| Italy | 81,059 | 90,939 |
| China and Japan | 61,751 | 78,791 |
| Belgium | 41,811 | 72,682 |
| Spain | 69,788 | 67 110 |
| Holland | 1,942 | 14,741 |
| | $96,749,149 | $98,417,296 |

So that, before the last fine harvest was reaped there was an increase of Canadian exports amounting in value to $1,667,047. On the other hand, the imports were, notwithstanding the expansion of home manufactures, larger than in any year since 1883, with the single exception of last year. The aggregate trade of the country was heavier than in any year since 1883, with the single exception of 1891. By countries, the aggregate trade was as follows :

| | |
|---|---|
| Great Britain | $91.328,384 |
| United States | 94,824,442 |
| France | 2,565 877 |
| Germany | 4,336,232 |
| Spain | 555,917 |
| Portugal | 191,148 |
| Italy | 332,808 |
| Holland | 4 4 532 |
| Belgium | 728 120 |
| Newfoundland | 2,218 911 |
| West Indies | 6,360,926 |
| South America | 1,782,950 |
| China-Japan | 2,202,102 |
| Switzerland | 244,319 |
| Other countries | 3,685,752 |

It will be seen that while Canada exported most largely to Great Britain, she imported most largely from the United States.

## The Affair With Chili.

THE following explanation of the affair on account of which the "Jingoes" of the United States have been threatening war and destruction, has been made by the Chilians :

SANTIAGO, December 31, 1891.

*Minister of Chili, Washington, D. C.:*

From the summary of proceedings it appears that the struggle commenced between two sailors in a tavern at the ward Arrayan, that it was continued on the street with the accession of numbers of inhabitants and transient parties from the streets called "Del Clave," "San Francisco," and "Alamos." The disorder continued and extended to the streets Del Arsenal and San Martin, where the police force succeeded in restoring order. All the North Americans except two state that they did their duty and from the voluminous proceeding it appears that the court has done and is doing its duty. Whenever the prosecuting attorney renders his opinion and the time for producing evidence shall have expired sentence will be given, establishing who and how many are the guilty parties, who may only be presumed at present. Whoever they may be they will be punished. The legal proceedings are being actively carried forward to their proper termination.

[Signed]. MATTA.

This explanation opens the way to a renewal of *entente cordial* between the governments of the two republics. The idea of war about the matter seems to be very ridiculous.

—Although the Halifax election was voided on account of the unauthorized act of an unauthorized agent, the Grit petitioners had to pay the largest proportion of the costs. We presume that the money came out of the Pacaud fund.

—In the recent election contest the Conservatives of North Lanark increased their majority by 127 votes. The electors of Ontario don't like the Laurier-Mercier alliance.

—This is the political record of North Lanark :

1874, Grit, by acclamation.
1878, Grit, by 43 majority.
1880, Grit, by 98 majority.
1882, Lib.-Con. by 69 majority.
1888, Lib.-Con., by 145 majority.
1891, Lib.-Con., by 301 majority.
1891 (Dec.) Lib.-Con., by 428 majority.

—We look in vain for a correction by the Guardian of its statement that a number of accounts against the city were withheld by the Finance Committee and carried into the accounts of next year. The fact is that cheques were issued on or before the 31st of December to cover every such account—except one which His Worship the Mayor declined to sign until after it had been passed upon by the Board. The Guardian will lose its religious character if it fail to correct its untrue and misleading statements.

—The Dundee Courier hits the nail on the head. It says :

"As an integral portion of the British Empire, Canada is under obligations that cannot honestly be ignored. It is satisfactory, therefore, to learn that on Wednesday night the audience enthusiastically cheered the Minister of Marine when he asked the young men of Canada to support the party 'whose aim was to preserve the integrity of the Empire and to build up a great Canadian nationality in close union with Great Britain and the other Colonies.'

THE originator of Estey's Emulsion spent several years of his life in perfecting this preparation. Not a bottle of it was put on the market until he was satisfied that it was the best ever introduced for the cure of coughs, colds, bronchitis and all wasting diseases. Thousands of bottles have been sold, and he has never heard a complaint regarding it. jan2 1m d&w

## Notes and Comments.

—Referring to the treaties of reciprocity lately concluded, the Press, of New York, says : "We have been buying from the British West Indies and British Guiana articles of trade valued at over $19 000,000 in 1890 and over $21,000,000 in 1891, and our exports to these countries have not amounted to over $10,000,000 to $12,000,000 a year. The balance against us for the fiscal year ending June 30th, 1891, was $9,630,000. Under the treaties now made we will probably increase our supply of sugar from those countries and establish a very good market for a large quantity of our products, especially agricultural, on very favorable terms.

—The Boston Transcript has taken the weight of Mr. Mercier, Mr. Laurier's political partner. It says : "Nobody expects a professional politician to be honest, and M. Mercier, the newly decapitated Cæsar of Quebec, is a politician first and last. He knows nothing of principles. He is far too practical to be bothered with scruples which agitate amateur debating societies. He is quite capable of threatening to plunge the whole of Canada into the horrors of a civil war, if he could serve his ambitions in no other way, but in using such threats his only real intention is to inflame the imagination of his countrymen so that he can pose as the redeemer of his race."

—The Monetary Times, which can scarcely be regarded as a strong party paper, although, sometimes showing Liberal tendencies, puts the question of discrimination against Great Britain, which Sir Richard Cartwright, Mr. Laurier and the Globe admit must accompany Unrestricted Reciprocity with the United States, very clearly as follows: "If we discriminated against British manufactures, we should forfeit the right to claim British protection. So long as we have a right to claim British protection, we owe to Great Britain the corelative duty not to put her trade on a worse footing than that of a foreign state. If we were to discriminate against her and in favor of some foreign country, how long would she consent to continue the connection on the present footing? Discrimination against British goods would inflict a serious injury to Canada.

## Professor Schurman's Opinion.

THE EVOLUTION OF RELIGIOUS BELIEF.

[New York Examiner.]

Professor J. G. Schurman, of Cornell University, delivered an unwritten but most finished and clear address before the New York Ministers' Conference, on "The Evolution of Religious Belief." He spoke first of the prevalence of the idea of evolution in modern thought. We are coming to study everything from the point of view of growth. We are learning that everything is evolved. It would be strange, then, if religion were not; and as a matter of history we can trace its evolution through distinct stages. The first of these is that of cult; the primitive religions were rituals, not systems of doctrine. The only creed they had was a belief in God. "There is no rational mind," said Dr. Schurman, with deliberate emphasis—"there never has been, and there never will be, a rational mind that doubts ultimately the existence of God." The second stage in the evolution of religious belief is that of creed or dogma, a higher stage than that of cult. The chief trouble with the religion of dogma was that it knew too much. It was omniscient. Its avenger is the agnostic. The creed makers knew everything. The agnostic doesn't know anything.

The third stage of religious development is that in which people within the church and without it discover that neither cult nor creed is the essential thing. We have reached an age when there is once more dawning on the world, as there dawned on it eighteen hundred years ago, the religion of spirit. For this supreme and enduring truth Baptists can stand as no other denomination can in the present age. To hold it forth and exalt it is their high mission. The address was marked throughout, not only by great intellectual force and insight, but by intense religious earnestness. The conference received it with profound interest and the heartiest expressions of appreciation. The speaker next Monday will be Dr. Edward Judson.

## News Notes.

The Canadian Pacific has declared a semi-annual dividend of $2\frac{1}{2}$ per cent.

Tremendous hurricanes, accompanied by heavy rain in some sections and snow in others, are reported on the Pacific Coast.

A cave containing a wealth of silver, and famous in local story, is alleged to have been discovered in the township of Barrie, Frontenac county, Ont.

A Calcutta despatch states that the victory of the British troops over the Hunza and Nagur tribesmen is complete. The town of Hunza has been occupied by the British.

Despatches from Chili state that that country is anxious for a peaceable settlement of the difficulty with the United States.

Numerous Russian Nihilists residing in France have been arrested, and it is said a plot to destroy the Russian embassy and the building in which the Chamber of Deputies meets has been discovered.

A German engineer says Chicago will sink forty feet during the year 1893. The weight of the new buildings and not the weight of wickedness is given as the cause. When the weight of Chicago's wickedness begins to tell the sinking will not be measured by feet.

In Ottawa when a child is born to a citizen the name of the attending physician is published with the notice of the interesting event, in the local papers. Whether the doctor or the happy father is responsible for this social and professional innovation is a matter of curiosity to outside watchers of societp development at the seat of society's power.

FOR OVER FIFTY YEARS Mrs. Winsloe's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once ; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winsloe's Soothing yrup," and take no other kind. 1yr

THAT hacking cough can be so quickly cured by Shiloh's cure.—Reddin Bros. nov1dwly

## Building Improvements.

THE past year was a fairly prosperous one for carpenters and builders. A number of new houses have been put up, the erection of others, began the previous year, was completed, and several houses already up have been enlarged and improved. The Messrs Lowe Bros. alone put up buildings and did other work in their line of business amounting in value to about $28,000.

The residence of Chief Justice Sullivan, Brighton, has been remodelled and enlarged by the addition of bay windows, library, etc. The library has a large, square bay window and open fireplace, with polished oak mantel. All the fittings of the library are of quarter sawn oak, highly polished. The floors of all the principal rooms on the lower flats, including the library, are laid with quarter sawn oak, filled and polished. A broad veranda extends across the front and the east end of the house, making a very pleasant feature. The house has all the modern conveniences such as hot water heater, electric bells, electric lights and a complete set of plumbing fixtures. The work was performed by the firm of H. & S. Lowe, and the plans were made by the senior partner, Mr. Henry Lowe.

The new library for the Master of the Rolls, just completed, is a handsome brick structure, with trimmings of native stone and white and black brick. The ceiling is finished in wood panelling, with a handsomely carved cornice. The woodwork of the ceiling is slightly stained and polished. The book cases, which are of walnut, extend to the carved work of the ceiling. The floor is of oak-filled wood, polished. There is an alcove at the east end, with a very handsome tracery arch supported by columns having splendidly carved capitals and bases. In this alcove the Master of the Rolls has his desk. There is also a fire and burglar-proof vault in connection with the library. The library is heated with hot water, put in by A. White & Son. The plans were made by Mr. W. C Harris. Messrs. H. & C. Lowe were the contractors.

Sidmount, the property of Hon. Fredk. Peters, has been remodelled and repaired by Lowe Bros., from plans made by H. C. Lowe. It is now a very complete, handsome and comfortable residence. It is heated throughout by hot water, and is fitted with electric bells. It has also a very complete set of plumbing fixtures. Messrs. A. White & Son had the contract for the hot water heating apparatus. John Garrick did the plumbing work.

Messrs. Lowe Bros. have also just completed a double house for Mr. P. P. Gillis, the plans for which were made by Chappell & Phillips. The house is two storys with basement and attic, steep roof. Each half contains a breakfast room and kitchen in the basement, and a dining room, sitting room and drawing room on the ground floor. There are, besides, three bedrooms, with bath room, dressing room and closets on the first floor: and three bedrooms and store room on the attic. The foundations above ground are of Nova Scotia grey-stone. The building is to be heated throughout by hot water, and is to have a good set of plumbing fixtures. Hermans & Son are now putting in the heating apparatus.

The store of Hon. Thos. W. Dood, on Queen Street, has also received attention at the hands of Messrs. H. & C. Lowe, from plans prepared by the senior member of the firm. The front has been taken down and modernized, and all the floors have been raised three feet. The front is built of red brick, having panels and diaper work of white brick, with window sills, lintles, coping, etc., of Nova Scotia grey-stone, giving the whole a very bright and pleasing appearance. The store windows are of very heavy polished plate glass. The building will be heated throughout by hot water put in by McKinnon & McLean.

The store on Queen Street, lately occupied by Mr. Charles E. Robertson, has also been thoroughly overhauled and repaired by Messrs H. & C. Lowe.

Mr. Lowe also made the plans for Mr. Henry Hine's new house on Rochfort Street, near St. Peter's Church. This house contains nine rooms, besides pantries, closets, attics, etc. In style it is two storys with hip and gable roof.

Messrs. Lowe Bros., have about completed work on the Charlottetown Hospital (a description of which has already appeared in THE EXAMINER); and are now at work putting down a sewer leading from Government House to the shore, and putting in sinks, etc., at Government House.

Mr. J. M Campbell, of the Post Office Department, has erected a handsome two-story, double dwelling-house on Upper Prince Street. Each half contains seven rooms. Michael Welsh was the builder.

Mr. C. B. Chappell has about completed a very pretty cottage on part of the old Mackieson property, Euston Street. The cottage which is 25x56 feet sets on a lot 95x162 feet, and there is consequently any amount of room for a lawn in front. The cottage is two storys high, and contains ten rooms in all. It is heated throughout by hot water and is fitted with bathroom. The exterior of the cottage is colored with creosote shingle stain instead of paint. The plans were made by the owner. The hot water heater was put in by McKinnon & McLean. Parkman & Crabbe were the contractors for the erection of the building.

During the past summer Mr. J. W. Cox completed a very attractive-looking house for Mr. Nelson Rattenbury, from plans made by Chappell & Phillips. The house is located on the corner of Great George and Fitzroy Street, and is now occupied by the owner. It is two storys high, and contains about ten rooms. It is fitted up with bath room and has all the modern conveniences. It is heated by hot water put in by A. White & Son.

Thomas Campbell has built two beautiful houses at the foot of Richmond Street. The larger one is a double tenement; the smaller one is occupied by the owner himself. Both command a splendid view of the harbor, and are furnished with all modern conveniencies.

Mr. W. C Harris, architect, has erected two double-tenement houses on the Brighton Road. The location is pleasant, and the houses were very conveniently planned by the owner. Mr. Martin was the contractor.

W. H Stewart has erected on the adjoining corner lot a well-planned and well-built cottage, by W. C. Harris architect, and Mr. Robt. Griffin contractor.

The gem of all the buildings of the past year is, without doubt, the stone house of Mr. Richard Young. It is well situated near Government Bridge and is tastefully designed. The grounds around it are exceptionally well laid out. It is a permanent improvement to the town, reflecting credit alike upon the owner, Mr. Young, the architect, Mr. W. C. Harris, jr., and the builder, Mr.————

Charles A Hyndman is building a handsome dwelling house at Brighton from plans made by Mr W. C. Harris. Mr. Charles McGregor is the consractor for the erection of the building. The house is two stories high, with pitch roof, and will contain in all about twenty rooms. It will be heated by steam and fitted with all the modern conveniences.

H. A. Tanton has just completed a new music store and dwelling house on Great George Street. The work was done by John Harper.

Mrs. Nathaniel A. Mitchell's new house on Upper Pownal Street, contains about twelve rooms in all. It was built by Charles McGregor.

Mr. McGregor has also remodelled and repaired his own residence on St. Peter's Road; also the house on Sydney Street, owned by Thomas Morris, and now occupied by Mrs. Coady.

Duchemin Bros. have about completed the work of erecting a new factory on the old Revere House property, Lower Great George Street. The factory is a three story structure, with basement.

GRAND

# Masonic Concert

—TO BE HELD IN—

THE LYCEUM,

In Aid of the New Temple,

—ON—

Tuesday Evening, Jan. 12.
