Contract Bridge

By B. J. Y BECKER

QUIZ

Two hearts. A single raise in partner's suit shows adequate trump support and 6 to 9 points, which is just what we have. A response of one spade is improper because bidding problems may subsequently arise which cannot be readily solved. Thus, if partner's rebid is two hearts, a raise to three hearts would be an unnecessary overbid, while a pass of the two heart bid leaves our story untold.

2. Two clubs. The hand warrants two constructive bids. The plan is to bid clubs first, and over the expected heart rebid, to bid two spades. In this way, the greater club length is identified, and the additional values beyond a two club bid are shown by continuing the bidding after the presumed to heart rebid. If the opener's rebid takes another form, in most cases the spades will be shown to complete the picture of the hand. Game seems very likely, but the final contract is so uncertain that the distribution and high card content must be presented as accurately as is possible.

3. Three clubs. It should be assumed immediately that the final contract will be a slam. An opening bid facing 19 high card points presents a good play for twelve tricks, unless it turns out the opponents have two aces. The jump shift will be understood by partner to signify at least 17 points. The distribution is not attractive, but there is flexibility enough to play in a suit contract if that is partner's wish, otherwise in notrump.

It would be incorrect to respond to the heart bid with three notrump. The range for this response is 16 to 18 points. The opener is not required to rebid over a three notrump response, and in many cases, he gives up the ghost at this point. No early opportunity should be granted the opening bidder to stop under six. The high card values shriek for a slam.

4. One spade. There is a popular misconception in many circles that the response of one in a suit promises a better hand than a one notrump response. The responder may have a good hand, but no more than six points are guaranteed. A one notrump response would be improper. The spades must be named. There are too many hands where partner has three spades, and if responder does not mention the suit, the proper trump contract may never be found.

Few Salmon

HALIFAX (CP) — The federal department of fisheries said Friday 112 Atlantic salmon were taken last week in Nova Scotia rivers. The drop was caused by low waters and high temperatures, they said. The St. Mary's River in Guysborough County was the leader with 29 salmon.

LONGER STAY

DERBY, Conn (AP)—Ed Sullivan will be kept in the hospital for five to seven more days, a CBS official said Friday The complications of a bronchial condition have caused the longer stay for the television master of ceremonies and syndicated columnist He was one of four persons injured in an automobile accident Monday, and suffered a fractured rib and abrasions of the nose and body

What To Do

By Thornton W. Burgess

**When doubtful just what you should do,
Let common sense decide for you.
—Old Mother Nature.**

Johnny and Polly Chuck had spent many hours up in a tree in the midst of a flood that covered the Green Meadows. They were lucky, but they didn't know it. They really thought they were the most unlucky Chucks in all the Great World. They were lucky to have reached that tree and been able to climb up in it.

At first they had been too frightened to be hungry. But after sitting up in that tree for a long, long time, they began to think of food and to wonder how they were going to get any. The more they thought of it the hungrier they grew.

"We can't get anything to eat up here," whimpered Polly Chuck.

"And we can't get anything to eat down there," retorted Johnny Chuck, looking down at the water.

"How long do you suppose we'll have to stay here' Polly asked.

"How should I know?" replied Johnny rather crossly. He was as worried as was Polly, but he did not want her to know it.

Happy Jack Squirrel had come drifting along on an old log. They had watched him finally drift toward the shore. They saw him leave the old log and swim for the shore. "He's luckier than we are," said Polly Chuck. She couldn't know that Happy Jack was so tired by his long swim that he doubted if he could ever reach the shore and really was more frightened than they were.

At long last Johnny Chuck made a discovery. He had been looking down at the water around the trunk of the tree. He had looked so long and steadily that finally Polly asked him what he was looking at.

"I think," said Johnny, "the water is going down."

Now Polly leaned over to stare down at the water. After a long time she spoke. "I believe you are right," said she.

"I know I am," declared Johnny. "I hope it will go down fast. Just as soon as it gets low enough for us not to have to swim, we will get out of here."

Polly Chuck nodded. "Of course, we will," said she. "But where will we go?" "Don't be silly. Of course, we'll go home. And the sooner we get there the better I'll feel," replied Johnny.

Polly looked over toward where their home had been. There was nothing but water there. You know their home had been an underground house. Just at the entrance they had made a high doorstep with the sand they had dug out in making the house. Now they couldn't see any sign of that doorstep. Polly looked down at the water again. "It is awfully slow in going down," said she. "Perhaps we'd better stay up here all night."

Just then a voice came floating to them from far in the distance over toward the Green Forest. Both Johnny and Polly shivered. They were not cold. It wasn't that that made them shiver. That voice was the voice of Hooty, biggest of all the Owl family. If they should stay in that tree all night he might find them. What to do? How they wished they knew.

Treatment Of Shock Is Really Simple

WASHINGTON AP) — The United States public health service said Friday tests have shown that a salt and soda solution given orally in large amounts is an effective emergency treatment for shock due to burns.

The treatment would be an emergency substitute for the traditional treatment for burn shock—injection into the veins of whole blood, plasma or certain plasma substitutes.

The service said shock is responsible for a high proportion of early deaths among victims of burns covering 10 per cent or more of the body.

It noted that the new treatment, because of its simplicity in comparison with giving injections "is regarded as being of particular importance in event of a major disaster," and added:

Saturday's Answer

DAILY CRYPTOQUOTE — Here's how to work it:
A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A NMB IUG KTHES AN ETDGEB, MCS IUMI ETDGEACGNN AN GCTOPU —WOYUMCMC.

Saturday's Cryptoquote: HAPPINESS IS ADDED LIFE, AND THE GIVER OF LIFE—SPENSER.

By International Nickle Co. Scholarships To Be Financed

TORONTO (CP) — Education grants of $2,500,000 were announced Wednesday by the International Nickel Company of Canada Ltd. They will be paid over a five-year period to 140 universities and colleges throughout Canada.

The program has two phases. One authorizes $2,000,000 in grants for colleges to use in strengthening and expanding their educational program. The second allots $500,000 for scholarships, fellowships and special projects, including assistance to teachers of science, mathematics and guidance counsellors in high schools.

The program will establish one fellowship in each of Canada's 13 major universities and establish 40 scholarships, half of which will be restricted to studies in geology, geophysics, mining metallurgy and engineering.
