

**ACES Conference
U.N.B. Fredericton**

This past weekend we had Four delegates go to the ACES (Atlantic Conference of Engineering Societies). Conference in Fredericton. This trip was a huge success and a wild rip for all who attended.

Topics discussed were the environment, a Constitution to be used as a guideline, and we received the chance to find out what other associate and accredited universities were doing within their societies.

Aside from that, there were many "extracurricular" events that were in store for us. A very good time was had by all and a very rough trip home was had by some (we won't mention any names!)

ONE DAY LAST WEEK IN NEW YORK

CORNBOIL 90

It is time once again for the annual Engineers Cornboil. As you read this, there are many on our Frosh learning the affects of foreign chemicals on the human body. Details and plenty revealing photos in the weeks to come! Keep an eye out for it.

Party On
Engineers!

Five Questions to Ask the Front Desk at a hotel during an Engineering Conference.

1. What power grid is this hotel on and can we hook up to your main line?
2. What is the volumetric size of your rooms and are they water tight?
3. How much heat is required before the sprinklers kick in and how do you turn the damn things off?
4. If we were to call the fire dept. right now, how long would it take for them to get here? Hypothetically Speaking!
5. How much are your TV's worth and are they covered under your insurance policy.

Employment Opportunity

If any of you noticed in last weeks issue, the Bio's have thereselves a "cartoonist" who claims to give them a few laughs. We are setting up a fundraiser so they can afford a real cartoonist who will make us all laugh for a change. Your comments would be greatly appreciated.

Engineering Society.
