MUNYON'S 'GOOD WORK'

The Burden Of Sickness and the Shadow of Graver Things BEING LIFTED.

From Thousands of Homes in Canada.

Mr W. de L. Young, agent of the New York Life Insurance Company, Room 411, New York Life Building, Montreal, says: "I suffered terribly with rheumatic pains, and tried nearly every known remedy without receiving any benefit. I obtained a sample bottle of Munyon's Rheumatism Cure, and the result exceeded my utmost expectations, as I am to-day a well man, and have Munyon to thank for it. I desire my name used in the cause of humanity, as all should know of this great remedy." Munyon's Rheumatism Cure seldom fails to relieve in one to three hours, and cures in a few days. Price 25c.

Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Price 25c.

Munyon's Cold Cure prevents pneumonia and breaks up a cold in a few hours. Price 25c.

Munyon's Cough Cure stops coughs, night sweats, allays soreness, and speedily heals the lungs. Price 25c.

Munyon's Kidney Cure speedily cures pain in the back, loins or groins and all forms of kidney disease. Price 25c.

Munyon's Headache Cure stops headache in three minutes. Price 25c.

Munyon's Pile Ointment positively cures all forms of piles. Price 25c.

Munyon's Blood Cure eradicates all impurities of the blood. Price 25c.

Munyon's Female Remedies are a boon to all women.

Munyon's Asthma Remedies relieves in 3 minutes and cures permanently. Price \$1.

Munyon's Catarrh Remedies never fail. The Catarrh Cure—price 25c.—eradicates the disease from the system, and the Catarrh Tablets—price 25c.—cleanse and heal the parts.

Munyon's Nerve Cure is a wonderful nerve tonic. Price 25c.

Munyon's Vitalizer restores lost vigor. Price \$1.

A separate cure for each disease. At all druggists, mostly 25c a vial.

Personal letters to Prof. Munyon, 11 and 13 Albert Street, Toronto, answered, with free medical advice for any disease.

ARGUS OUTPOINTED.

AN INSECT THAT IS CREDITED WITH THIRTY-SIX THOUSAND EYES.

Scientists Have Made Some Wonderful Discoveries In This Line, but They Give the Palm to the Common Dragon Fly—Interesting Natural History.

Thirty-six thousand eyes in one head! This may appear a little like exaggeration, but it is a fact. Science, backed by the microscope, says so, and science never stretches the truth. Should it do so it would cease to be a science. Argus was fabled to have a hundred eyes, but Argus would be a very insignificant curiosity compared with the latest discovery in the insect kingdom. There are numbers of insects with 100 and even 500 eyes, but when the number of optics allotted to a single insect reaches up into the thousands the idea is startling.

Naturalists have recently been engaged in the study of this most interesting subject. Each succeeding day brings more marvelous results until the astounding discovery has been made that the common dragon fly, or mosquito hawk, while seemingly possessed of only two visual organs, really has as many as 36,000, each of the two visible to the ordinary observer being subdivided into 18,000 separate lenses, each eyelet having a distinct nerve connecting it with the brain and acting entirely independently of its myriads of companions.

The theory most generally adopted by scientists is that, while far superior to the eye of higher animal life as regards moving objects, the power of observation of the composite eye is inferior in its application to stationary things. The reason is this: The moving object is first observed by one of the thousands of facets, which perceives it for the infinitesimal part of a second that it takes to get out of the arc of vision of that particular lens and pass into that of another, each movement being separately telegraphed to the brain by the facet on duty. But with a stationary object it is different, since for some reason the minor organ fails to focus accurately, and so render the object less distinct than when viewed by eyes of only one lens each.

A question which continues to puzzle the scientists is whether the animal or insect sees as many images of the objects as he has eyes, or facets. For instance, does the dragon fly fancy he is fitting over 36,000 ponds, or does he see only one? Probably one, for the two eyes of a human being in normal condition show but a single image. Besides, apart from the lenses and cones in front, the eye is a hollow sphere pierced by perforations running down the facets toward the center. It follows that the light impressions thus form a single picture, or mosaic, as it were, each facet presenting a slightly different picture from its neighbor and the group presenting a perfect whole.

There are many other animals possessed of an extraordinary number of eyes. James Francis Stevens, a noted entomologist, is said to have recorded 2,000 such species in his garden in one afternoon, while Francis Pascoe, another noted naturalist, counted 80 different specimens on his library window.

The common scorpion, for instance, has many eyes scattered irregularly over its body. The lobster has massed together in each orb more than a hundred distinct eyes, and, unlike human eyes, these are set forward, instead of being sunk inward. Does the poor lobster see things a hundredfold? If so, possibly it is in avoiding the 99 imaginary lobster pots that he stumbles into the real one. The common house fly has 4,000 eyes, the cabbage butterfly 17,000, the drosophila fly 8,000, the honeybee 6,300. But still at the head of the list stands the mosquito hawk, or dragon fly, with his 36,000. As his name suggests, while not despising any of the smaller insects, his speciality is the mosquito. Indeed he has so succeeded in terrorizing these little pests that his lifeless form still fills them with alarm. In localities where mosquitoes are troublesome an effectual mode of ridding the place of them consists in suspending a dead dragon fly from the ceiling by a piece of thread. Those who have tried it say that it has never been known to fail.

Up to a certain point these multitudinous eyes may be compared to windows fitted with innumerable panes of glass. The panes, however, are of different forms. Some, like those of the bee and the ant, are six-sided, reminding us of the pattern so common in Gothic architecture. Some, again, are diamond shaped and others square.

Another interesting branch of this interesting subject is the study of the near and far sighted insects. Johanna Muller long ago pointed out that the flight of insects depends upon their power of vision. This will account for the difference in the flights of the common house fly and the wasp. The one confines himself to short flights. As his food is always to be found within a small area, he flies in short curves and circles. But the wasp is remarkably sharp sighted, and the arrangement of the lenses shows that his line of vision is decidedly forward. Here, again, the dragon fly is pre-eminent. He has well been called the tyrant of the air. He alone is able to take perfectly straight lines at enormous speed for long distances, evidently seeing well what is ahead of him.—New Orleans Times-Democrat.

The daughter of the Duke of Edinburgh has separated from her husband, the Grand Duke of Hesse.

SUNLIGHT SOAP

Wrapper Competitor. March, 1897.

The following are the winners in District No. 5, Province of Nova Scotia and Prince Edward Island.

WINNERS OF STEARNS' BICYCLES.  
Miss Sadie Fraser, New Glasgow.  
Mr. W. Stanley McDonald, Box 702, New Glasgow.

WINNERS OF GOLD WATCHES.  
Mr. Hugh E. Flick, Halifax.  
Mr. F. A. Payzant, 66 Spring Garden Road, Halifax.  
Mr. Israel Porter, Box 356, Yarmouth.  
Mr. B. O. Bishop, Dartmouth.  
Mr. Sidney M. Poole, Charlottetown, P. E. I.

We have been obliged to disqualify several competitors for March, for sending coupons taken from unsold soap in grocers' stock (see rule 3).  
LEVER BROS., Ltd., Toronto.

Your cough, like a dog's bark, is a sign that there is something foreign around which shouldn't be there. You can quiet the noise, but the danger may be there just the same. Scott's Emulsion of Cod-liver Oil is not a cough specific; it does not merely allay the symptoms but it does give such strength to the body that it is able to throw off the disease. You know the old proverb of "the ounce of prevention?" Don't neglect your cough.  
Your druggist keeps Scott's Emulsion of Cod-liver Oil. Put up in 50c. and \$1.00 sizes.

PYNY-PECTORAL

Positively Cures COUGHS and COLDS in a surprisingly short time. It's a scientific certainty, tried and true, soothing and healing in its effects.  
W. C. McCOMBER & SON, Bouchette, Que., report in a letter that Pyny-pectoral cured Mrs. C. G. Goureaux of chronic and intractable bronchial tubes, and also cured W. G. McComber of a long-standing cold.  
Mr. J. H. HUTTY, Chemist, 238 Yonge St., Toronto, writes: "As a general cough and lung syrup Pyny-pectoral is a most invaluable preparation. It has given the utmost satisfaction to all who have tried it, many having spoken to me of the benefits derived from its use in their families. It is suitable for old or young, being pleasant to the taste. Its sale with me has been wonderful, and I can always recommend it as a safe and reliable cough medicine."  
Large Bottle, 25 Cts.  
DAVIS & LAWRENCE CO., Ltd. Sole Proprietors, MONTREAL.

Victoria's Diamond Jubilee

Will be held this year, and those who visit Ch'town this year will not do themselves justice if they fail to get their Lunches at Victoria Cafe, and drink the health of Her Majesty the Queen in a glass of Joy's famous Buttermilk.
