ECONOMICAL CHRISTMAS GREETING

Stained Window' Described Easy Do-It-Yourself Effort

With Christmas nearly two months away, there is plenty of time to build colorful decorations. This easy to make "stained glass window" is a wonderful way to wish your friends, neighbors and passersby season's greetings.

It's easy to frame and paint and costs so little you might consider making additional ones for gifts. When you use the pattern offered, no special skill is needed to duplicate the window illustrated. Step-by-step directions simplify building frame to fit window selected. When mounted on frame, placed in a window and backlighted at night, it makes a captivating effect. While room light will bathe the beautifully illustrated Madonna and Child on a soft glow, a floor lamp can also be used if additional lighting is desired.

Since windows vary in width and height, the pattern tells how to fit picture and frame to any size window. Only water colors are required. Directions explain how to make picture waterproof and translucent with oil. When completed, the picture is placed in that part of the window frame ordinarily used for storm windows or screens. You'll be amazed to see how much like a stained glass window your handicraft looks.

To obtain this interesting pattern, send 75 cents in coin, check or money order for Christmas Window Pattern No. 149 Toronto Star Syndicate, 80 King St., West, Toronto. Send 55 cents additional for catalog illustrating 300 other built-it-yourself projects and home improvement books.

AID FOR AILING HOMES

QUESTION: Can a formica top table be painted? If so, what type of paint should be used?

ANSWER: No paint will adhere satisfactorily to the formica surface for any length of time because of its slick, nonporous surface. If you want to change the color of the table top, a sheet of formica in any desired finish could be applied over the present surface, carefully following installation instructions available at formica dealers.

SOOTY HOT WATER

QUESTION: At our vacation cottage, we get our water from a shallow well with an electric pump. Occasionally there seems to be soot in the hot water which settles on the sink and tub. Can you suggest a method to eliminate this soot?

ANSWER: Check the possibility of the seepage of grease into the water from some part of the pump. If new piping and tank were installed, grease and oil on the pipe threads may be carried into the hot water line; this will disappear in time.

OUTDOOR STEPS LUMBER

QUESTION: I have to replace two steps at the side door. What kind of lumber is advisable to use for this?

ANSWER: Use cypress, yellow pine, redwood or Douglas fir. Or any good wood painted on all sides and edges before installation; this is to prevent moisture penetrating into wood, which is frequent cause of subsequent warping, cracking, even rotting.

DRAIN ODOR FROM WATER

QUESTION: In our basementless house, how can we eliminate the strong odor caused by a sudden onrush of water into the floor drain of the utility room? The rinse cycle of our washer is one example. Slow drainage from the kitchen sink will not cause this.

ANSWER: This may be due to an improperly vented stack into which the washer discharges, affecting the balance of pressure on either side of the water, destroying the water seal and permitting sewer gas to escape. Irecommend having a competent plumber inspect the installation.

CLEANING COAL BIN WALL

QUESTION: What could I use to clean a block basement wall which was part of a coal bin? I have no further use for the coal bin.

ANSWER: Vacuum the wall to remove as much of the coal dust as possible. Then scrub with a stiff brush and a strong hot solution of one cup of trisodium phosphat to the gallon of water, followed by ample rinsing with clear water. Complete removal of the coal dust may be impossible because of its deep penetration into the blocks.

SHRINKING MORTAR

QUESTION: What causes the mortar between cinder blocks to shrink and crumble? What do you recommend for correction?

ANSWER: If the cinder blocks were not kept damp while the original mortar work was curing, this could cause the mortar to shrink. This happens when the dry, surrounding blocks exert a blotting action on the wet mortar.

Sometimes applying a transparent, liquid cement hardener, available at masonry supplies dealers, will halt the difficulty. It is worth trying in a test area first.

The only other correction is to scratch out the crumbling mortar and replace with fresh (keeping in mind that the surrounding blocks should be kept damp for a week or so to allow slow, proper curing of the mortar). The spray attachment of your garden hose is good for keeping the area moist.

RAIN THROUGH WINDOW

QUESTION: I have a 12 foot picture window, with two vertical bars and two horizontal bars dividing it into nine panes of unequal size. In driving rain, water invariably comes through forms puddles on the horizontal bars, trickling down the vertical bars. Outside windows have been puttied and reputttied and caulked an- recaulked by the glazer to n avail. What might be done to remedy situation short of installing storm windows?

ANSWER: You don't state whether the frame and bars are metal or wood. For metal windows there are two kinds of metal sash putty, for interior and exterior use; the interior should never be used outside windows.

The glozer may have omitted applying a coat or priming paint before puttying or caulking; on metal surfaces this provides a roughened surface for better adhesion. Add after the putty, or caulking or glazing compound dried, paint should be applied to seal and protect. For a good, tight water seal, the paint should be lapped slightly over on the glass and the same number of coats applied as are on the window frame.

BIG BUYER

West Germany is the fourth largest importer of United States goods, taking some $1,500,000,000 annually.

OFFICIAL OPENING

MORELL

REGIONAL HIGH SCHOOL

Wednesday, Nov. 7....7.30 .PM.

by the Hon. L.G. Dewar,
Minister of Education.

Address: Dr. K.A. Parker of Ch'town

CORNERSTONE LAYING CEREMONY

AT 3 P.M. BY M.A. MacKENZIE

Deputy Minister of Education

The public is cordially invited to attend both ceremonies

Plea Is Made For Honesty

HAMILTON (CP) — The "affluent society" of today is in danger of rotting unless there is an application of "more common honesty," Rt. Rev. J. R. Mutchmor, moderator of the United Church of Canada, said Monday.

Dr. Mutchmor was speaking to the 16th annual conference on evangelism.

"Canadians must take seriously the challenge of today's affluent society. We should be grateful for its proven benefits. We should do our share to undergird this affluent society with a strong moral code."

Go ahead...ask him

if he has arranged for a Canada Life Family Plan

This particular Canada Life policy is a very sensible, and very practical, form of total family protection. It covers your husband, you and each of your present and future children with just one policy—one low premium. Your Canada Life man will be most happy to give you, and your husband, all the information you need about the Family Plan. So go ahead—ask him!
