

**IN MEMORIAM**

**HENRY HENDERSON**

On the morning of December 7, 1955, the people of Margate and surrounding districts were saddened to hear of the passing of Henry Henderson in his sleep at the early age of 57.

Although he had been suffering from heart trouble for some time, he was able to be among his animals each day a work he loved.

The late Mr. Henderson leaves to mourn his passing his wife, nine children: Ian of Clifton, Mrs. Harvey Lewis, Kathleen of Louisbourg, N.S.; Mrs. Harry Casley (Vera) of Spring Valley, Mrs. Dawson Hooper (Ruby) Shiley of Charlottetown; Arthur of Toronto, Ont.; Phillip Frances and Paul at home. Ten grandchildren and two sisters — Mrs. John Howard and Mrs. W. B. Warren both of Kensington, also survive.

The funeral which was held from the house was privately attended.

Harry Morris and Staff.

**CARD OF THANKS**  
We wish to express our sincere thanks to all who sent cards and messages of sympathy or who in any way assisted during our recent bereavement.  
Mrs. Henry Henderson and family.

**ANCIENT POTTERY**  
Pottery painted with geometrical designs has been found in a 4,000-year-old site excavated in West Pakistan.

**Keep your family healthy, happy this easy, economical way with**

Your doctor will tell you that health and energy like this require an adequate daily supply of essential vitamins and minerals. New VI-CAL-FER 12 vitamin mineral capsules provide the answer. Here—in one small capsule easily taken by children—are 5 vitamins and 7 minerals essential for sturdy growth and health. One capsule a day at breakfast meets normal requirements when combined with ordinary diet.

**VI** Vitamins A, B, C, D, E—aid appetite, growth, nervous conditions, resistance to colds and infections.

**CAL** Calcium and phosphorus—with vitamins D and C for healthy bones, teeth, gums and skin.

**FER** Iron, plus 4 other minerals—for rich red blood and the normal functioning of the body.

**12** Essentials for health, including the red Vitamin B<sub>12</sub>.

For your family's vitamin mineral needs, buy scientifically balanced VI-CAL-FER 12 Capsules!

**DISCUSS OTTAWA AND THE MARITIME FARMER**

Two cabinet ministers participated in Mount Allison University forum in Tweedie Hall, Sackville, N. B., in the 1956 series of discussions opened before an audience of students, faculty and the general public.

They were Hon. Milton Gregg, Minister of Labour, Ottawa, extreme right in above photograph, and Hon. Cyril Sherwood, New Brunswick, Minister of Agriculture, second from the left.

Other participants were Dr. C.A. Baxter, head of the Mount Allison philosophy department, extreme left, Stanton Sanford, Lawrenceville, N. S., immediate Past Pre-

sident Nova Scotia Federation of Agriculture, third from left and Allison Profit, Freetown, P. E. I., a member of the Prince Edward Island Federation of Agriculture.

The topic was "Ottawa and the Maritime Farmer." The next six sessions are being arranged in cooperation with the Atlantic Provinces Economic Council.

**N. B. Drive To Lower Dairy Industry Costs**

FREDERICTON, N.B. — Establishment of producer-owned milk powder plants and an aggressive campaign to lower production costs and promote the dairy industry were recommended Tuesday to the New Brunswick Federation of Agriculture.

A joint dairy committee submitted the recommendations at the opening session of the federation's three-day annual meeting. The report represented nine months of research into New Brunswick dairy problems.

The committee concluded that recognition for improving dairy production provincially is far from being sufficiently widespread, and urged the increased use of artificial insemination units.

**MAJOR FACTOR**

According to the committee, powdered milk is fast becoming a major factor in the dairy industry. It urged serious consideration to the possibility of instant whole milk powder entering the

consumer markets in the province.

"When further advance take place along this line New Brunswick farmers should be in a position to take full advantage of scientific advances and it is imperative that immediate steps be taken to fully explore this field," the committee said.

The group expressed regret that the "excellent herd improvement policy is not used to the extent it should be" and claimed that producer-controlled creameries could be developed to a greater extent with "proper membership support."

"The small herd with a few hens and still fewer hogs will not support a family... and quite a few farmers could support larger economical herds if a fully developed management program was adopted," the committee maintained.

In view of the heavier cost of equipment for condensing milk and considering the already established market, attention should

**Potato Growers Dispute Tariff Board Statement**

KENTVILLE, N.S. — Representing Nova Scotia's largest table and certified seed potato production area, officers of the Kings County Potato Growers Association have taken issue with the recent report of the tariff board that growers received an average price of 85 cents per bushel for their 1953 crop.

President E. Russell Jess, Scotia Bay, and secretary, H.F. Parker, of Canning, speaking for the Association, have issued a statement that prices for Nova Scotia potatoes in that year ranged only from 50 to 65 cents for a 75-pound bag. At the same time, P.E.I. and New Brunswick potatoes were selling for 45 to 55 cents a bushel. That was under a federal marketing agreement and eventually cost the agricultural prices support Board close to \$5,000,000.

The local potato association of farmers discounted a claim by the tariff board that a year-round duty on the U.S. market of 37 and a half cents would be disastrous to Maritime producers. The

luty of 37 and a half cents per wt. on seed potatoes is imposed from June 15 to July 31 only.

President Jess said that, since in terms of field tolerance of plant diseases, Canadian certified seed is graded to the highest standards of any in the world it is to the advantage of USA producers to obtain Canadian seed.

Secretary Parker said that since United States growers had doubled their seed quota in recent years, it would appear that the producers in that country tell the same way.

During the 1953-54 season Canada imported some 2,250,000 bushels of U.S. seed and table stock. In 1951-53 Canada imported almost a million bushels more from the U.S. than we exported to that country. These, the association of farmers claim, are official government figures released by the department of trade and commerce in December 1954.

be focused on milk powder which "will likely become a major food item on our home milk market," the group contended.

In recommending the establishment of "one or two" skim milk powder plants, the committee said a study should be made of the processing methods with a view to eliminating inefficient practices and if it appears reasonable an amalgamation of two or more such plants be carried out.

An epidemic of gastro-intestinal upset among infant children of the City is reported by Deputy Minister of Health, Dr. O. H. Curtis. Stool samples of the affected children have been sent to the Laboratory of Hygiene at Ottawa with an attempt to determine what organism or virus is causing the disease.

Dr. Curtis states that the children suffering from the upset are quite sick but to date he has not learned of any fatalities. Private physicians report several cases, a number of which are serious enough to be hospitalized.
