

Painting Contest Results!

First-place winner Dr. Shannon Murray invented the plaid crayon. Yet another 3M innovation. Congratulations!

We like Ham with our eggs, man.

Second place winner Dr. Brent MacLean was confused about what the wall is made of. It's obviously bread. Points were deducted, but it's still a marvelous colouring job. Way to go!

Second-place winner Lesley-Anne Bourne made one of the few entries that uses a tasteful colour scheme. And nail polish.
