DAILY CRYPTOQUOTE—Here's how to work it: AXYDLBAAXE is LONGFELLOW

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

NEWSY NOTES

Seasonable Observations of the average of 155.7 hours. This and the chilly north winds have delayed the opening of our buds and farming operations.

Tillage Problems Every year the old problem of when to start work on the land has to be decided. We know from our own experience and the records kept by others, that the earliest sown cereals have given the greatest returns over a period of years, and generally ripen during better harvest weather than later seedings.

All prospect of an early spring season is now past. The slow movement of Gulf ice from the North Shore and the Northumberland Strait has delayed seasonal conditions for the seeding of crops from a week to ten days later than was indicated a month ago.

Improved Crop Prospects Crop prospects have very definitely improved, and many new meadows have a very splendid stand of vigorous clover showing through the old grain stubble all over the fields, which can be seen from the highway.
