Mrs. H. T. Donihee Is Elected CWL President

HAMILTON — The new national president of the Catholic Women's League says she has always wanted to be a writer. She has already made a start, in two widely different ways that indicate thevariety of her interests.

Mrs. H. T. Donihee has written a bridge column for the newspaper in Cornwall her home, and she has written a poem that is a prayer as a result of her work with the Cornwall Children's Aid Society.

Mrs. Donihee says the prayer grew out of a report to the Children's Aid on a family of children who had been deserted by their parents. She wondered how something like that could happen in Cornwall without neighbors noticing the children's plight and helping. She discovered that the family lived near her — she was one of the neighbors who had noticed.

She says her prayer for guidance, repeated each night, became a poem. It has the imprimatur of the Bishop of Alexandria, and has been printed.

Mrs. Donihee is an avid bridge player who attends tournaments when she can and who has taught some blind people to play with Braille cards.

She has been a member of the CWL from 1947, has worked with the Girl Guides, the City Planning Board, the Juvenile Court Committee in Cornwall and is president of the local unit of the Canadian Cancer Society.

A widow, Mrs. Donihee has two sons and a daughter.

TWICE Around the World and then Some

If a road existed around the world, and your car, equipped with the new Super-Lastic Safety "99" High Mileage Polyester Tires was set travelling, non-stop, at 50 miles per hour . . . even after it had circled the globe twice and having travelled 50,000 miles — your Safety "99" tires would still have tread enough left to start circling for the third time around.

The Polyester "99" is not only guaranteed to deliver thousands of added safe miles, but having no "thermal set" it has little tendency to "flat spot". You just don't get any "morning thump".

EVEN AT 50,000 MILES Polyester Safety "99" has the original bounce and remains as "shapely" as the day installed — they just don't get that "middle-age droop." Polyester Safety "99" can never weaken from moisture and blow-out. Admittedly it is a little more expensive to buy initially, but compare it by miles of service, comfort and safety, you'll agree that the Polyester Safety "99" High-Mileage Tire is a real bargain. Before you invest in any tire — investigate the special inducement your local Canadian Tire Store is offering to introduce you to Polyester — THE BEST TIRE IN ALL THE WORLD.

WHAT IS POLYESTER? It is the new tire cord that makes all other fibres obsolete — it is the first cord to combine the most desirable features of both nylon and original equipment rayon. Polyester has been 10 years in the making and we are proud that Canadian Tire's Super-Lastic Safety 99 High Mileage Tire is built with this more costly Polyester.
