

M. V. PRINCE NOVA

New Travelling Pleasure Between Wood Islands, P. E. I. and Caribou, N. S.

Constructed in the record time of 55 weeks

It is significant that in this Centennial Year on Prince Edward Island, Ferguson Industries Limited, in a growing bond between the Atlantic Provinces, had the honor of constructing the Prince Nova . . . yet another link in transportation between the "Cradle of Confederation" and Nova Scotia.

Newest addition to the Northumberland Ferries fleet, the Prince Nova is powered by two 1,600 horsepower diesels, with a trial speed of 15 knots. This will greatly speed the transportation between the two provinces.

We congratulate Northumberland Ferries Limited and express our pleasure in having the opportunity to construct this modern ferry.

FERGUSON INDUSTRIES LTD.

PICTOU, NOVA SCOTIA
