AMONG THE FARMERS

FARM COSTS

Last week we made reference to cash income from the sale of farm products and pointed out the consistent increase from a low of slightly over \$3 1/2 million in 1932 to over \$30 million in 1952 with a levelling off for the past six years at approximately \$25 million.

Income figures are of course only one side of the story, there are many expenses and charges to be made under such headings as: taxes, repairs, fertilizer and lime, supplies, depreciation etc. In 1932 these amounted to well over \$4 million which meant that in that year the farm people after

diligently applying themselves for twelve months ended up almost \$1 million poorer than when they started.

Since that bleak year farm operating costs have increased but the balance has improved, for instance the difference on the right side of the ledger in 1952 was almost \$15 million. The high point in expenses was in 1956 when the Island farmer expended over \$19 million to operate his business. Expenses now appear to have settled down to slightly under the 1956 figure.

Over the years certain items have shown a marked increase,

good reason to be excited over the recent announcement on the road building program which will be undertaken during the next six years. Of considerable interest is the fact that many of these new roads will be in areas which have in a sense been neglected and have been waiting for many years for improved facilities. A visit at almost any time of the summer to the National Park will prove what holiday attractions that area provides.

There are many others waiting to be developed and while it can not be expected that we will have a National Park in each county this does not mean that other parts of the province can not be developed in a more modest manner. The road building program will of course never be completed in this province but with the day in sight when almost a thousand miles will be hard surfaced no one can deny that real progress is being made.
